Evidence for II.A.1.a. Descriptive Summary: Meeting the Demands of Industry

New courses meeting demands for educated workers in biomedical equipment technology, green economy, and health and safety include: Biomedical Instrumentation Maintenance; Solar Thermal Panel Installation; Green and Sustainable Organizational Practices; and Group Facilitation and Field Work in Health Education. These have led to new certificate programs in Biomedical Equipment Technician, Green and Sustainable Business, and Youth Worker. Other avenues to investigate how College curriculum reflects industry employment needs are available through advisory meetings and DACUM (Developing A Curriculum) research groups.
