

# CCSF Teacher Prep Curriculum for Transfer to CSU For Future Elementary School Teachers

**CCSF Courses Suggested for California State University General Education (CSU/GE), CCSF Graduation and Lower Division Subject Matter Preparation/California Subjects Examination Preparation for Teachers (CSET)**

## 2005-2006

In California, elementary school teachers must teach many subjects in self-contained classrooms. The pathway to becoming an elementary school teacher covers the completion of a wide range of subjects and transfer to a university or college for a Bachelor Degree and teaching credential. The whole process requires at least 4-6 years of college.

The Commission on Teacher Credentialing requires Subject Matter Preparation course completion **AND** a passing score on the California Subjects Examination for Teachers (CSET). **Students who successfully complete Subject Matter Preparation courses (lower division examples listed below) will be better prepared to teach. Due to "No Child Left Behind" federal legislation, all new teachers are required to pass CSET before becoming employed.** Additional upper division Subject Matter Preparation courses are also required and can be obtained at a 4-year college.

The Commission on Teacher Credentialing requires specific courses for the elementary credential. This pathway at CCSF takes the Commission on Teacher Credentialing Subject Matter Preparation course requirements, graduation requirements and transfer requirements into consideration and offers the most expedient options to future elementary school teachers. The Commission approves programs individually at each college. Programs and requirements may vary; however, content must meet the new approved standards for California which changed in 2003. It is always recommended that you contact the college that you plan to transfer to and your CCSF counselor for specific course recommendations.

A cumulative 2.67 G.P.A is required for most CSU Credential Programs. A grade "C" or better is required in all pathway classes. Only 70 units may be transferred to a CSU from a community college. Multiple subjects courses will often count towards the Commission on Teacher Credentialing lower division requirements, **regardless** of the number of units you obtain.

**IMPORTANT: Teacher preparation standards in California have recently changed. Students who began preparing for transfer prior to this change are advised not to redo any GE area courses. Instead, they should transfer when eligible, and consult with an advisor at the university to determine if they need additional multiple subjects courses. To transfer to the CSU with junior status, students must complete a minimum of 56 transferable semester units; at least 30 must be general education and must include Areas A1, 2, 3 and B4. It is essential to complete Areas A1, 2, 3 and B4 before transferring.**

Due to the complexity of this curriculum pattern, it is highly recommended to contact the Teacher Preparation Center for counseling or curriculum workshop information.
