

How to Find Your Airport ID: OS X Tiger

(Special thanks to Erick Vargas)

1. A Media Access Control Address is composed of 12 Hexadecimal digits usually written 00:0D:56:2C:0A:E8 or 00-0D-56-2C-0A-E8. You can think of it as a serial number.
2. These instructions are for OS X (10.4.2). Other version may differ.
 - a. Click on the **Apple** Icon and the click on **System preferences**

- b. This will open the System preferences window. Click on the **Network** icon.

- c. This will open the Network window. Choose AirPort in the **Show:** pull down menu. The physical address for the wireless card is the **AirPort ID**.
