Facilities Review Committee
March 23, 2005
Revised Minutes

Present: Leonard Arnold, Nicolas Atencio, Julia Bergman, Christian Bonifacio, Sunny Clark, Peter Goldstein, Terry Hall, Larry Lauser, Charles Metzler,

FRC Resources, Members of Subcommittees, & Others: Susan Baker, Ann Clark, Wendy Kaufmyn, David Liggett, Madeline Mueller, Barbara Thomas

Subcommittee Reports

Parking & Transportation
Susan Baker provided an update on issues from the most recent meeting. The installation of new bicycle racks will be postponed until after May 23. An article will be written for the Guardsman about the new bicycle boot, now being used by Campus Police. Access to the parking garage at the Alabama Street Mission Campus has been improved by issuing additional clickers. Recent vandalism in the north Balboa Reservoir parking lot to the parking permit vending machines will require them to be replaced at a cost of $11,000 each. Discussions are continuing with City Car Share.

Science Building Parking, south lot
A recent effort to restrict parking in the south lot to police and facilities visitors only raised many questions by faculty and staff who park there. A heated discussion about the situation, the issue of double parking, blue spaces, etc., resulted in a FRC recommendation to return this topic to the Parking & Transportation Subcommittee for further research, discussion and resolution.

Works of Art
An Art Dept. student has submitted a formal proposal to clean and paint the Jacques Overhoff concrete test piece mounted near the Visual Arts Building. This structure was created by the artist in preparation for his work Bicentennial Wings & the Batmale Deck. The artist does not consider the piece to be art and told us that we could do with it as we wish. So it will be painted. The FRC directed Julia to contact the artist, who lives in Germany, regarding this proposal.

Projects Committee
The last meeting was cancelled.

Health & Safety
Telephones will be installed in the Cafeteria so staff can quickly contact Campus Police as needed.

Facilities Update
Chinatown/North Beach-the numerous problems encountered with the Colombo & Fong buildings motivated the District to seek a new site nearby for the campus. Two vacant lots in the same block may be purchased and the project will continue. In the end, the cost of the project should be less than the original proposal.

Mission-the State Architect has approved the construction drawings

Health & Wellness Center-There is a backlog of work at the state and approval of drawings has been delayed.

Student Health Center-the date for ground breaking has been pushed back, perhaps until the end of May, possibly to mid-late summer. Sunny Clark would like to have students present for the celebration.

Greenhouses-the site will be cleared soon.

Accreditation
The draft of the Accreditation Standard IIIB document was distributed to committee members; suggested changes/corrections should be submitted to Peter in writing.

Meeting schedule:
Wednesday, April 20, 2pm
Wednesday, May 11, 2pm
