Facilities Review Committee
Minutes
March 21, 2007

FRC Members Present: Julia Bergman, Jim Blomquist, Sunny Clark, Olallo Fernandez, Peter Goldstein, Terry Hall, Jim Keenan, Charlie Metzler

Resources Present: David Liggett

Subcommittee Rep: Muriel Parenteau

Other CCSF: Lani Battiste, Winnie Kwofie, Madeline Mueller, Barbara Thomas

1. Parking & Transportation Subcommittee Report
Muriel provided the group with an update on various parking and transportation projects and issues:
• new bike racks have been installed on the Ocean Campus;
• the pedestrian crosswalk across Phelan to the Bookstore Annex is in Peter Goldstein’s hands;
• the path to the footbridge over Ocean has been painted bright red;
• a meeting with JAD DeAvila neighbors regarding various issues was held; two neighbors attended; the white zone for the van & shuttle will be moved; all seems to be okay;
• City Car Share is on the Ocean Campus; 75 employees have signed up;
• a solar-powered flashing stop sign has been installed in front of the Rosenberg Library/LRC;
• Facilities staff will meet soon with MTA to discuss the plans for the West Campus, entrances, signals, and use of Lee Street;
• blue zones near the Rosenberg Library/LRC will be re-painted to replace the temporary signs on Cloud Circle; the construction fence will be in place for about three weeks;
• a notch will be created in the sidewalk for the DSPS vans in front of the Rosenberg Library/LRC so they don’t block Cloud Circle;
• MSP by consensus that the College proceed with the design and painting of blue zones & parking for police vehicles at north and south Science; space that can not be used for vehicles will be allocated for motorcycle parking.

2. MSP by consensus that the FRC recommends the Five Year Construction Plan as slightly revised and submitted to the Board of Trustees as Resolution 070125-B3.

3. David Liggett opened a discussion about possible FRC review of future building letter designations and room numbering; it was agreed that the FRC is the appropriate place for recommendations to be reviewed and discussed.
4. It is hoped that the Sustainability Plan can go to the Board of Trustees in April; Dr. Day directed Mark Robinson to work with students for their input and suggestions.

5. Joint Use Facility Program – This document was distributed to FRC members for review before the next FRC meeting. Julia will contact Larry Klein to invite him and the building users group to the next meeting. Madeline Mueller asked Facilities staff to clarify the state standards and codes on classroom size as the JUF shows classrooms of different sizes, a condition not permitted in the Performing Arts Complex.

6. The artwork planned for the Mission Campus will be the largest Aztec calendar in the world. Two methods have been proposed to construct this $200,000 project – either fiberglass or painted ceramic tile. A small sample of the calendar produced in ceramic tile will be sent from Tucson for further evaluation.

Julia commented about the uneven application of the District Policy for Art Enrichment of Construction Projects, which commits funds for art in each new building; nothing was done for the Student Health Center. And the status of art for Health & Wellness is very unclear.

7. Health & Safety Subcommittee Report
   Peter reported that a consultant will be hired to create a District emergency response plan.
   Fumes from the Heath & Wellness Center construction site blowing into the Rosenberg Library/LRC have been reduced.

8. Works of Art Subcommittee Report
   • The cleaning, sealing and restoration of the Batmale Plaza by artist Jacques Overhoff will be conducted in several phases. The artist, who is here from Germany, brought a box of the original red and blue tiles used on the piece; these will be installed first. The restoration work will take place in brief increments over the next several months.
   • www.whalesatcitycollege.com will be constructed so that donations for the restoration project can be collected from the website.
   • Images from the Rivera Mural currently available as full-color backers on CCSF business cards will soon be for sale as greeting cards in the CCSF Bookstore Annex. The next revenue generating product might be a collectable collection of 12 coffee mugs, each printed with one of 12 images from the CCSF art collection.
   • Cleaning and touching-up of the Student Union Mural has been postponed by A.S. students until the Fall.
   • The ceramic mural “Jungle Scene” will be installed on the new Child Development Center, which, as a pre-fab building, will go up very quickly in the next few months. Julia needs to contact the artist.
   • Keep thinking about how to remove the Sargent Johnson bas reliefs from the gymnasium walls.
9. **Student Health Center**
Sunny Clark reported that taxi cabs called to pick up an ill student need a specific address for the new Student Health Center. The group recommended 180 Phelan Avenue. Sunny will have a sign made.

The next meeting will be **April 25, 2pm, R518;** this location would be a good opportunity for architects of the many buildings “in process” to make presentations to the FRC.
