## Standards and Criteria - Title 5 Section 55002(a) Credit Degree Applicable Course

Using the (current) official course outline of record and the (proposed) special section addendum, please verify that this course meets, at a minimum, the standards and criteria listed below, as required by Title 5.

1. The outline shall specify the unit value, scope, outcomes, and content in items of a specific body of knowledge, skill practice or required reading and writing assignments, and other outside-of-class assignments, instructional methodology, and methods of evaluation for determining whether the stated objectives have been met by students.
2. The major learning outcomes are the same for all students in the course.
3. Measurement of student performance is in terms of the outcomes and results in a formal recorded grade in accordance with Title V, Section 55750. Grades are permanently recorded and are based on demonstrated proficiency in subject matter and the ability to demonstrate that proficiency, at least in part, by means of essays, or, in courses where the instructor deems them to be appropriate, problem exercises or skills demonstrated by students.
4. The course grants units of credit based upon a relationship between the number of units assigned to the course and the number of lecture and/or laboratory hours or performance criteria specified in the course outline; and requires a minimum of three hours of work per week including class time for each unit of credit, prorated for short term, lab and activity courses.
5. The course treats subject matter with a scope and intensity which requires students to study or practice independently outside of class time consistent with Item 4 above.
6. The course requires, when the department recommends and the curriculum committee approves, entrance skills and consequent prerequisites for the course before students are enrolled.
7. When language or computational skills are approved by the curriculum committee as prerequisites or co-requisites, the minimum pre-co-requisites shall be eligibility for enrollment in degree credit courses in English or mathematics.
8. For participation, the course requires the ability to think critically and to understand and apply concepts at levels recommended by the department and approved by the curriculum committee as college level.
9. The course requires learning skill and a vocabulary which the department recommends as appropriate and the curriculum committee approves for a college course.
10. The course requires that educational materials used be judged to be college level by the department, and approved by the curriculum committee as part of the course outline.
11. The course allows repeated enrollment only as permitted by provisions of Division 2 (commencing with Section 51000), Sections 55761 - 55763, and 58161.
