

Student Opinion Survey Comments about International Students

I was unhappy with the transcript evaluation I received as many of the requirements for a general edu. A.S. degree at CCSF I felt I have already covered in the two year full time college course I completed in Europe.

*International student services

The library is great. Staff is great. The conference room NEEDS more construction the. The parking is great. There seems to be a level of difficulty in establishing interpersonal relationships on campus though. I wish there were more information on this, or maybe even have more activities to encourage friendship groups and study group. I know we are in a university, but some of us are high school transfers who are having a hard time coping, especially if you are like me, AN INTERNATIONAL STUDENT

I am an international student who works full-time to support myself. Although I love CCSF and the education I'm getting, I consider the tuition for non-residents to be ridiculously expensive. May be said: the US only wants the richest, smartest or cutest ones.

I hope that counselors for international students would be more patient to listen their questions and nicer to give appropriate directions. Thank you!
