

Immunity Lab

Dr. J. Lim

Viewer Set 229 **Immunity**

Limit your drawing to the most important region of each of the micrographs described below. Since this is not an art class, please refrain from reproducing the entire slide unless necessary. Be sure to label at least two details on each of your sketches

1. Phagocytosis once again

2. Monocyte/Macrophage
Top: note monocyte is larger than erythrocyte (RBC)
Bottom: macrophages in action!

3. Bone marrow & lymph gland

4. Thymus gland

5. T-cells and AIDS virus
great shots of T-lymphocytes both when normal and when
compromised by the AIDS virus

6. Plasma cell

- 7-8 optional
