

## How to Connect iPhone or iPod touch to the Wi-Fi Network

1. These directions are for iPhone or iPod touch.
2. This assumes your computer is located where you can get a signal from the CCSF Wi-Fi Network and your wireless card is connected and operational.
3. Tap on Settings.

4. Tap on Wi-Fi.

5. Wi-Fi should say On and you should see CCSF WiFi (if Wi-Fi is Off, tap Off to turn it on), then tap CCSF WiFi.

6. Enter the WPA key (**freewireless4all**) in the Password field and then tap Join.

7. If you have successfully joined the CCSF Wi-Fi Network, you should be able to see a check mark right next CCSF WiFi.

8. Your iPhone or iPod touch should now be able to get on the Internet through the Wi-Fi network if you have signed up for more than two business days.

**Special thanks to Abdul Aziz and Yoshiki Sakagami for the pictures of iPhone.**
