Subject: Next steps: Program Review -- outcomes assessment impacts
Date: Tuesday, September 10, 2013 9:10:26 AM

Next steps for outcomes assessment at CCSF? PROGRAM REVIEW and ongoing ILO #1 assessment!

Program Review: The annual program review process is in progress this Fall. Here's something EVERY program can get started on today. Review your outcomes-assessment data and activities over the past year (2012-2013) and summarize those to answer the following Program Review question:

Summarize overall departmental/program improvements implemented, in progress, or under consideration as a result of the assessment of learning, service, and/or administrative unit outcomes. (Be sure to reference the data/reports that underlie these new directions.)

And consider that if you plan to ask for resources this year in your Program Review (time, positions, budgets, software, instruments, etc.), you'll want to link those requests back to what your assessment data show. Start working on that now.

Fall 2013 ILO #1 assessment: stay tuned for more details in our next email. This ongoing assessment affects nearly every program undergoing assessment this Fall. ([Find more on our Fall 2013 ILO assessment website.](#))

Need help? Drop-in SLO help lab -- Mondays 1-2 pm in Science 37.

Our momentum is excellent. Let's keep directing it forward sustainably and thoughtfully.
