

## How to Connect iPhone or iPod touch to the CCSF Wireless Network

1. These directions are for iPhone or iPod touch.
2. This assumes your computer is located where you can get a signal from the CCSF Wireless Network and your wireless card is connected and operational.
3. Tap on Settings.

4. Tap on Wi-Fi.

5. Wi-Fi should say "On" and you should see "CCSF Wireless" (if Wi-Fi is Off, tap Off to turn it on), then tap CCSF Wireless.

6. Enter the WPA key (**freewireless4all**) in the Password field and then tap Join.

7. If you have successfully joined the CCSF Wireless Network, you should be able to see a check mark right next CCSF Wireless.

8. Your iPhone or iPod touch should now be able to get on the Internet through the Wireless network if you have signed up for more than two business days.

**Special thanks to Abdul Aziz and Yoshiki Sakagami for the pictures of iPhone.**
