How to Find Your Wireless Card Physical Address: Win 7

1. A Media Access Control Address (MAC) also known as **physical address**, is composed of 12 Hexadecimal digits usually written 00:0D:56:2C:0A:E8 or 00-0D-56-2C-0A-E8. You can think of it as a serial number.

2. These instructions are for Win 7. Other versions may differ.
   a. Click on the Start button
   b. Type “**cmd**” (without the quotes) in the search field to start the command line tool.
c. A DOS window will open. Type “ipconfig /all” (without the quotes) and then press Enter.

d. The header is **Wireless LAN adapter Wireless Network Connection** and the physical address starts with 00.
