How to Find Your Wireless Card Physical Address: Win XP

1. A Media Access Control Address (MAC) also known as physical address, is composed of 12 Hexadecimal digits usually written 00:0D:56:2C:0A:E8 or 00-0D-56-2C-0A-E8. You can think of it as a serial number.

2. These instructions are for Win XP SP 2. Other versions may differ.
   a. Click on the Start button

   ![Start Button](start.png)

   b. Click on Run…

   ![Run Window](run.png)

   c. A Run window will open. Type “cmd” (without the quotes) in the white box next to Open: then hit Enter or click OK.

   ![Command Prompt](cmd.png)
d. A DOS window will open. Type “ipconfig /all” (without the quotes) and then press Enter.

e. The header is **Ethernet adapter Wireless Network Connection** and the physical address starts with 00.
