Health Education Major

The Health Education Department offers a Major in Health Education designed to prepare students for transfer to the California State University (CSU) system for further study in health education, public health and related academic fields. With a Bachelor’s Degree in Health Education, students are prepared for careers with a wide range of public and private employers. The Health Education Major is open to all students who are admitted to City College of San Francisco and who have satisfied the prerequisites listed next to each course before enrolling in that course.

The purpose of CCSF’s Health Education Major is to provide students with coursework in public health content to prepare them to transfer to the California State University system in health education, public health and related academic fields. The major prepares students with an analysis of the major determinants of health and illness, in-depth health content, an overview of necessary skills in the field, including interpersonal and quantitative reasoning skills. The goal of this program is to prepare a diverse student body to address the health needs of our communities.

The 23-unit Associate of Science degree program in Health Education includes core courses related to public health and health education and a selection of electives from a variety of health-related subject areas. The course of study is designed to give flexibility to students who want to pursue specific areas of interest within health. The degree may be combined with any of the programs or certificates offered by the Department.

Core courses in the major: The major consists of 17 units of required courses. It is recommended that students take a health and wellness course (HLTH 53, 25 or 27) prior to taking Introduction to Public Health (HLTH 54) and Urban Health Policy (HLTH 231). Students interested in the major should note that the quantitative skills courses all have mathematics prerequisites and should plan their course of study accordingly.

Electives in the major: Students majoring in Health Education are required to take at least six (6) units of approved electives described below. Requirements for Bachelor’s Degrees in the Health Education or Health Science field vary widely. Students are advised to check the specific major requirements for the institution they plan to transfer to.

Prerequisites: There are no specific prerequisites for the Health Education Major except for those prerequisites and advisories required of certain classes. This includes one of the core classes in the major, Psychology 5, which requires students to take the Math Placement Test and to either place into the class or take Math 860 as a prerequisite. Some of our elective courses also have prerequisites.

Dance - Performance Art Major

The Dance Program has been an integral part of City College of San Francisco's Physical Education Department since its inception, over 70 years ago. Due to the integrity, diversity and excellence in teaching this program has steadily grown, evidenced by student enrollment in dance that exceeds 3,000 per semester. Owing to the longevity of high standards and quality of instruction the prestigious Izzy Award for Sustained Achievement was awarded to the CCSF Dance Department in 2007.

The curriculum for the Associate Degree in Dance allows students to develop skills to pursue careers in choreography, dance performance, dance anthropology, dance education, and performance studies as well as fulfills most of the lower division requirements for many four-year institutions. We are dedicated to creating the "whole" dancer: nurturing mind, body, and spirit. The Dance Program provides comprehensive studies including history, theory, choreography, technique, and performance. Additional classes such as: Anatomy, Nutrition, Music, and Theater Arts are included to support the student's development.

The program highlights dance technique (ballet, modern, and African Haitian) and performance, while providing the student with all of the tools necessary to become a healthy and well-rounded dancer. The student will also have the opportunity to explore the sciences, history, and the Theater Arts as part of our diverse program. Good nutrition and proper alignment are emphasized and ample performance, choreography, and production opportunities are available. Special focus is given to prepare the dancer for transfer to upper division courses at a four year college or university.

Learning Outcomes

The emphasis of the Dance - Performance Art Major is to promote dance as an art form. Students majoring in Dance will develop a functional understanding of the fundamental concepts associated with dance as a performance art. The focus of the major will be dance technique, movement theory, repertory performance, and dance composition. Additionally, the major intends to promote dance as a community asset while supporting the student's ultimate objective, whether it is to transfer to a four-year institution, or to pursue a career in dance performance or education. The focus is on the individual dancer, and the aim of the major is to provide all of the tools necessary to make the student's journey successful. Students will acquire proficiency in dance technique, performance technique, body alignment, dance history, choreography, anatomy and physiology, and nutrition. Additionally, the dance student will develop skills in critical thinking, creative and innovative thinking, problem solving, observation, and evaluation, which can be applied to all aspects of life.

A placement audition will be required prior to enrollment in the major program. Students not placed into Intermediate or Advanced level Ballet or Modern classes will be required to take beginning level classes as prerequisites.
