Invitation to Participate in a Focus Group on
“How to Launch a Career in Science”

If you are interested in a possible Science, Technology, Engineering, or Math (STEM) major/degree, you are invited to discuss what you need to know to make this possible. The best way is to talk it over with equally interested students and with advisors/facilitators that can give you important guidance. The facilitator, Dr. Anne MacLachlan, is from UC Berkeley. She has broad knowledge of scientific careers and programs/services that can support your educational/career goals.

She wants to hear from you about what steps you need to take to work towards a successful STEM career. If you would like to participate in this focus group and have your questions answered, please turn in this form and you will be contacted about possible dates and times.

Name: _______________________________________ CCSF ID# __________________

Major or eventual Major(s): ______________________________________________________

E-mail: ________________________________________________________________

Phone Number: __________________________________________________________

Return this form after the workshop or to the MESA/STEM Center (Bungalow 201) or to John Ho (Batmale 208), APASS Counselor & Program Manager for the grant that funds the STEM project.
