OUR VISION

As the City College of San Francisco moves into the twenty-first century, our foremost vision is that we will continue to value and foster superior levels of educational participation and academic success among our students. Through the outreach to and inclusion of all populations, the provision of an unparalleled learning experience for students, and the enhancement of a supporting and caring environment that sustains and leads them to the successful completion of their educational goals, we are motivated by a compelling and authentic vision.

A Teaching and Learning Community

Above all else, we aspire to be a teaching and learning community whose principal distinction is the quality of instruction delivered by departments with strong reputations in their fields. The quality of success in learning will permeate all levels of the educational experience, from basic skills to advanced honors courses, from vocational/technical to the academic courses, from citizenship preparation and adult retraining to university transfer courses. The breadth of superior learning opportunities extends to a vast array of courses and programs sufficient to offer any student a pathway to educational and career success.

A Service Community

We will continue to reach out to all neighborhoods, ethnic populations, and economic segments of our service area; develop campuses and sites to better serve geographic areas of the city; diversify and improve programs and services for the benefit of the community; build partnerships with public, private, and community-based agencies to better respond to educational, economic and societal needs; and foster informed participation of our students and employees in community life.

A Diverse and Caring Community

We seek to build an inclusive community, where respect and trust are common virtues, and where all people are enriched by diversity and multi-cultural understanding; a responsive environment in which student needs are met in a friendly, caring, and timely manner; and a working environment for all faculty, staff and administrators in which everyone is valued and the climate is supportive, positive, and productive.

A Contributing Community

In the larger realms of the state, the nation and the world, we hope to share our educational resources and contribute knowledge, expertise, and innovation as a post secondary institution of higher education, as members of the community colleges of the state of California and throughout the country, as colleagues in our various fields, trades, and professions, and as educators committed to lifelong educational opportunities for all.

MISSION STATEMENT

CCSF provides educational programs and services to meet the following needs of our diverse community:

- Preparation for transfer to baccalaureate institutions
- Achievement of Associate Degrees of Arts and Science
- Acquisition of career skills needed for success in the workplace
- Active engagement in the civic and social fabric of the community, citizenship preparation, and English as a Second Language
- Completion of requirements for the Adult High School Diploma and GED
- Promotion of economic development and job growth
- Lifelong learning, life skills, and cultural enrichment

To enhance student learning and maintain a commitment to excellence, the College provides an array of academic and student services that support the development of students’ intellectual, cultural, and civic achievements. City College of San Francisco belongs to the community and continually strives to reaffirm its commitment as a resource for the community.
MESSAGE FROM THE BOARD PRESIDENT

The San Francisco Community College District's Board of Trustees reflects the richness of diversity in the City. Each of the seven Board members is elected to a four-year term. The City College Governing Board also includes a Student Trustee, who is elected by fellow students district-wide, and casts an advisory vote. College trustees monitor educational programs and approve an appropriate budget.

Board members have regularly scheduled business meetings on the fourth Thursday of each month starting at 6 p.m. These meetings are held at the neighborhood campuses scattered throughout San Francisco. City College trustees invite community members to participate at these monthly Board meetings. The Board agenda and minutes of Board meetings are posted at every campus and are also available on the College website at www.ccsf.edu. Moreover, the District is raising public awareness by broadcasting Board meetings every Wednesday at 8:30 p.m. on Cable Channel EATV27, and the tapes of the meetings are readily available for the public to view. The members of the Board can be reached through the Office of the Chancellor: Telephone (415) 239-3303, FAX (415) 239-3918.

In addition to the monthly Board public meetings, Board members also meet on the second Thursday of each month at 5 p.m. for work sessions covering a variety of important issues affecting City College. These work sessions are always held at the District Administrative Offices located at 33 Gough Street. Members of the community are also invited to attend these working sessions.

CCSF Trustees invite your participation at their monthly public meetings. Should you need additional information regarding the above meeting dates or locations, please call (415) 241-2234.

Sincerely,

Lawrence Wong,
Board President

MESSAGE FROM THE CHANCELLOR

As you admire the catalog cover’s architectural renderings of the future buildings of City College of San Francisco, I hasten to thank San Franciscans for making these facilities possible through their “yes” vote for the City’s Proposition A Facilities Improvement Bond in 2001 and their most recent support of the statewide Prop 55 (San Franciscans led the state with a 70% approval vote). This proposition provides City College of San Francisco with nearly $60 million in state matching funds for our Prop A Projects.

The Chinatown/North Beach and Mission campuses are among the new CCSF buildings ensured with the successful passage of both bond measures. These new facilities will provide much needed classroom space for students who live and work in these San Francisco neighborhoods. Prop 55 will also benefit students through substantial renovations to the John Adams Campus at 1860 Hayes Street. Additionally, it includes funding for preliminary plans and working drawings for the new City College joint-use facility with San Francisco State University on the Ocean Avenue Campus. Thank you again.

Sincerely,

Dr. Philip R. Day, Jr.
Chancellor
A STUDENT’S RIGHT TO PRIVACY

Occasionally, City College of San Francisco receives requests from various entities or private persons seeking directory information on our students. These entities can be public, private or governmental in origin, e.g., private scholarship search companies, public and private colleges and universities, U.S. Military (Department of Defense and others).

“Directory Information” is defined as information contained in an educational record of a student which would not generally be considered harmful or an invasion of privacy if disclosed. It includes, but is not limited to the student’s name, address, telephone listing, date and any place of birth, level of education, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended.

Directory information may be released at the discretion of the college; however, under Federal and State law, a student has the right to ask that City College of San Francisco withhold directory information about him/her. Once the request is made, directory information will be withheld from all entities. The college assumes no liability for honoring a student’s request that such information be withheld.

Students who believe that directory information (that includes courses of study such as Gay and Lesbian Studies, Ethnic Studies, etc.) may identify their race, ethnicity, sexual orientation or otherwise subject them to discriminatory treatment, should be aware they have the option of not having any confidential information released to any group, agency or organization.

A request by a student to withhold directory information must be directed to the Dean of Admissions and Records in writing. This formal request must be made within the first two (2) weeks of the beginning of the academic year. Students who enroll other than in the beginning of the academic year (fall semester) must submit their request within the first two (2) weeks of the onset of his/her enrollment. This request must be signed and dated by the student. Students may also come to the Office of Admissions and Records and complete a “Request to Withhold Directory Form.”

For further information, please contact Admissions and Records, Conlan Hall, Room E-107, telephone (415) 239-3291.

EDUCATION CODE SECTION 66500 COMPLIANCE

In compliance with Education Code Section 66500, information regarding the obligation of male students to comply with the federal Military Selective Service Act by registering with Selective Service is available in the Financial Aid Office. Additionally, Selective Service registration cards will be available in the office of Admissions and Records at the Ocean Avenue Campus.

STUDENT RIGHT-TO-KNOW

In accordance with federal law, City College of San Francisco is required to publish annually its “Student Right-To-Know” (SRTK) transfer preparation/graduation/completion and other transfers rates. These rates are determined by the California Community College Chancellor’s Office and are based on a limited cohort of students. The rates are derived by tracking a Fall cohort of students over three years and dividing the number of students who successfully become transfer prepared/graduate/complete or actually transfer by the number in the initial cohort. This information is updated annually and is available online at http://www.ccsf.edu/Info/srtk.html

Each spring the Associated Students elects a student trustee to represent their interests on the San Francisco Community College Board of Trustees. Further, AS appoints all student participants for shared governance.

The AS Ocean Avenue Campus funds such diverse programs as the Bookloan program for low income students; an emergency student loan fund; developing a program of cultural events and activities; selecting student representatives on college-wide shared governance committees; Dr. Betty Shabazz Family Resource Center, HARTS, Student Health, Students Supporting Students, Women’s Resource Center, and more than 60 clubs and campus organizations. events. It is also a place where individual students and small groups can study and relax. Other campuses are in the process of creating space for students to meet and organize.

Transfer to Universities and Colleges
To earn the Bachelor’s or a higher degree, or to complete training for a profession, you may transfer from City College to a university or a college as follows:

If, when you enter City College, you have already satisfied the requirements for admission to a university or a college, you may transfer with full credit whenever you have completed the proper university courses satisfactorily. Because the College is accredited nationally and offers preparation for so many fields, you have a wide choice of schools at which to take advanced courses. Generally, to be eligible for transfer, you will need an average final grade not lower than C in all courses that you attempt.

If you need to make up high school courses or grades, you may remove your deficiencies while you take the university courses for which you are qualified. The courses and grades necessary for transfer and the number of semesters you will need to complete depend upon the requirements of the university or college at which you plan to continue your studies.

The section in this catalog entitled “Transfer Information” lists general transfer requirements for the University of California (all campuses) and California State University (all campuses).

Articulation agreements which list detailed information concerning specific majors and which describe course transferability and applicability between City College of San Francisco and public baccalaureate degree-granting institutions in California are available online, www.assist.org. Admissions Policy (Credit Classes)
City College has an open admissions policy. Eligibility to attend is satisfied if you have met at least one of the following requirements:

- You are eighteen (18) years old on or before the first day of instruction for the term which you are applying.
- You are a high school graduate.
- You are the equivalent of a high school graduate, i.e., you have passed the GED or a state’s high school proficiency examination.

Please note that the above requirements are general; other factors may determine eligibility.

Contact the Office of Admissions and Records for more details.

Admissions as a Special Part Time Student (Concurrently Enrolled in High School)
The Board of Trustees of the San Francisco Community College District authorizes certain High School students under the age of 18 years of age to enroll in one or more courses of instruction at City College of San Francisco.

To be considered for admissions as a Concurrently Enrolled High School Student, Section 76011 of the California Code of Regulations requires the recommendation of the high school principal and the consent of the parent or guardian.

For more information regarding admissions and enrollment policies, please call (415) 239-3286.

Advanced Standing
Students who have previously completed course work at other schools of collegiate rank may transfer to City College of San Francisco. One month after enrolling at the College, they may request an evaluation from the Office of Admissions and Records to determine which of their courses are transferable. Only courses from regionally accredited institutions will be considered for transfer.

High School Honors Courses. City College grants advanced standing and units to students who have completed high-school honors courses and present scores of 5, 4 or 3 certified by the College Entrance Examination Board. A grade of Credit will be entered for an appropriate college course or courses when suitable verification is provided to the Office of Admissions and Records.

Readmission to City College
Students who have completed a semester, but have interrupted their attendance by an absence of one semester or more, may not register until they have been readmitted to the College. Such students must be readmitted before the beginning of the semester for which they plan to re-enroll.

If the entire enrollment process (See “Procedures for Enrollment in Credit Classes” outlined in steps two, three, and four have never been completed, they will need to be completed before registering for classes, unless an exemption has been granted. Please see Matriculation Section for exemptions.

Applications for readmission are available in the Office of Admissions and Records.

Reduced Fees Under AB540
As a nonresident you may be eligible to pay the $18 per unit fees just like California residents. **What is AB540?**

AB540 is a new state law that exempts certain students who are not residents of California from paying nonresident tuition at California Community Colleges and California State Universities. **Who is eligible?** Students who meet all of the following requirements:

b. You graduated from a California high school or attained the equivalent of a high school diploma from California (e.g., GED or California Proficiency Exam).

c. You registered in Spring 2002 or later.

d. You completed a City College Student Exemption From Nonresident Tuition (SENT) form.

**What steps do I take to determine whether I qualify?** Complete a SENT form. City College will determine your eligibility based on your application and the SENT form. **If I qualify for nonresident tuition under AB540, how much do I have to pay to attend CCSF?** $18 per unit. **When can I apply?** You can apply at any time. Complete the SENT form and submit it to City College of San Francisco, Admissions and Records Credit Division, Conlan Hall 107, 50 Phelan Aven., San Francisco, CA 94112. **Where can I go for more information and a SENT form?** Contact: Admissions and Records-Credit (Conlan Hall 107); Admissions and Records-Noncredit (31 Gough St.); Admissions and Enrollment (all campuses); Counseling (all campuses); Chinatown/North Beach (940 Filbert); African American Scholastic Programs (Bungalow 500); and Latino Services Network (Cloud 364). **If I am a U.S. citizen, does this apply to me?** Yes. AB540 applies to you if you attended a California high school for three or more years AND you graduated from a California high school or attained the equivalent of a high school diploma from California (e.g., GED or California...
Proficiency Exam). **What if I have more questions?** Contact Maria L. Lopez, Residency Coordinator, Office of Admissions and Records, City College of San Francisco, Conlan Hall 107, 50 Phelan Ave., San Francisco, CA 94112, (415) 239-3287, fax (415) 239-3936 or email resident@ccsf.edu.

Applications are available from the Institute for International Students, City College of San Francisco, 50 Phelan Avenue, Box C-208, San Francisco, CA 94112, USA; Phone (415) 239-3895, Fax (415) 239-3804. E-mail: institut@ccsf.edu

**San Francisco Consortium: Cross-Registration**

City College of San Francisco is a member of the San Francisco Consortium. Through the functions of the Consortium, a variety of educational opportunities are made available to students of the member institutions. For example, currently enrolled, full-time, matriculated students may register for credit in courses offered by the following institutions: California College of Podiatric Medicine; Golden Gate University; San Francisco State University, and the University of San Francisco. Cross-registration is permitted if the course is not currently offered at the home institution, if the course is lower division, if space is available in the course offered by the host institution, and if the student has satisfied course prerequisites. This cross-registration policy applies only to the regular sessions of the academic year and specifically excludes summer sessions, extension courses, and similar programs.

Further information for students whom the Consortium may help is available in the Registration Center, Smith Hall 118 and the Office of Admissions and Records, Conlan Hall E107.

**Matriculation Policy for Credit Classes**

It is the policy of the District to ensure equal educational opportunity for all students. The Matriculation process at CCSF brings the student and the College into a partnership agreement to develop and realize the student’s educational goals.

City College of San Francisco agrees to provide the following services:

1. Basic skills assessment and career guidance
2. Orientation to College programs and services
3. Counseling and advisement
4. Opportunity to develop an educational plan
5. Continued monitoring of academic progress

The student agrees to:

1. Attend classes regularly and complete assigned course work
2. Use support services as needed
3. Consult with counselors and advisors when appropriate
4. Be willing to declare an educational goal following the completion of 15 semester units

**Matriculation Exemption Policy**

All new and readmit students enrolling in credit classes are required to participate in the matriculation process. However, you may be excused from participation in the assessment, orientation, or counseling components if you meet either of the criteria below:

1. You have already earned an A.A./A.S. degree or higher (U.S. accredited institutions only). Or,
2. You do not intend to ever enroll in more than 9 units of courses at CCSF. You do not intend to enroll in courses with prerequisites, enroll in any Math, English or ESL courses, AND do not intend to earn a degree or certificate from CCSF or transfer to a university.

**Matriculation Steps for Enrollment in Credit Classes**

Students are more likely to succeed in college when they have an accurate assessment of their skills, an idea of their educational goals, and an understanding of the course selection and registration processes. Matriculation services are designed to inform students about how the “system” works. Therefore, **unless waived or exempted**, all new students must complete the five-step matriculation enrollment process. Students should complete the process as
early as possible to receive a priority registration appointment, which will increase chances of enrolling in classes of choice.

STEP ONE—APPLICATION FOR ADMISSION. All new students must file an application for admission with the Office of Admissions and Records, Conlan Hall, Room E107.

NOTE: An additional application for admission into specific programs must be submitted to the department chairperson. Consult the department chairperson of the program you are interested in.

STEP TWO—PLACEMENT TESTING. City College of San Francisco placement tests are administered to all new students who plan to enroll in credit classes unless they meet the waiver or exemption criteria. These tests are one way of measuring students’ skills in English or ESL, reading and mathematics. Counselors will use these results along with other information to help students decide on a program of courses that best suits the students’ educational needs and interests. The test results are used for placement purposes only; they cannot be used to prevent any student from studying at CCSF. (See “Placement Testing Waiver” for alternate way to meet the assessment component.)

CCSF placement test results achieved before March 1993 are no longer valid and cannot be used to meet course or program prerequisites. If your placement test results were achieved before March 1993, you must retake the tests if you wish to use the results to meet prerequisites.

Students must bring a picture identification to the test (e.g. driver’s license, passport, or California I.D.). No appointment is necessary. Students should arrive at least ten minutes before the scheduled time in order to be seated. Once the test has started, no student will be admitted. For further information, call the Testing Office at 239-3129.

All students must take one of the following English placement tests:

- **English** - For native English speakers or those whose primary language is English,
  OR
- **ESL (English as a Second Language)** - For those whose primary language is not English.

All students must take at least the Arithmetic portion of the following Mathematics Placement Tests:

- **Arithmetic** - All students take this test.
  Take these tests if you are interested in enrolling in Intermediate Algebra or higher.
  - **Elementary Algebra**
  - **College Level Math**

The English (not ESL) and Math Placement tests may be taken in a computerized or paper-pencil format.

- **Computerized version:** Seating for the computerized version is limited. Reservations are required. To make a reservation, call 239-3129.
- **Paper-pencil version:** Students may attend the paper-pencil version of the tests on a drop-in basis. No reservation is required.

For dates and times of both computerized and paper-pencil testing, consult the CCSF Placement Testing Schedule available in the Admissions Office, Testing Office, or online at [www.ccsf.edu/New_Students/test.htm](http://www.ccsf.edu/New_Students/test.htm)

STEP THREE—ORIENTATION. The orientation session will focus on registration activities, test score interpretation, and information about programs and services that students need to know upon enrollment.

STEP FOUR—MEET WITH COUNSELOR. At the counseling appointment, a student will receive a program of courses and registration information.

STEP FIVE—REGISTRATION. Registration by telephone or in person is by appointment, the time and date of which appear on the registration ticket that each student receives. If a registration ticket indicates there are holds, they must be cleared before registering.

(***New students** will receive registration appointments upon completion of the matriculation process or upon approval of their matriculation exemption forms. **Continuing students** will have registration appointments mailed to them.)

Placement Testing Waiver

An alternate way of satisfying the assessment component is to waive placement testing if you have already taken specific tests and/or courses. You must bring proof (e.g. official transcripts or test result reports) of one of the following to the Matriculation office, Conlan Hall, Room 107.

**ENGLISH**

Students may be excused from taking the English Placement Test and may demonstrate their eligibility for English 1A or 1B by attaching proof of one of the following:

1. Completion of Subject A Course or passing the Subject A Exam at the University of California **Eligibility: English 1A**
2. SAT verbal score of 510 or higher (before April 1995) OR 590 or higher (after April 1995) OR SAT II Writing Subject Test score of 660 or higher **Eligibility: English 1A**
3. Advanced Placement Test of Literature and Composition Score of 3 – **Eligibility: English 1A**
   Score of 4 – **Eligibility: English 1B**
   Score of 5 – Satisfies English 1A and 1B
4. Completion with a “C” or better English 1A (college-level composition) or the equivalent at another college **Eligibility: English 1B**

**MATHEMATICS**

Students may be excused from taking the Math Placement Test and be eligible for at least Math 860 (Intermediate Algebra) by attaching proof of one of the following:

1. SAT I Math score of 600 or higher.
2. SAT II Math score of 550 or higher.
3. ACT Math score of Level I or II or 28.
4. Advanced Placement Exam in Calculus AB or BC score of 3 or higher.
5. Advanced Placement Exam in Computer Science AB score of 3 or higher.
6. Advanced Placement Exam in Statistics score of 3 or higher.
7. Credit at another college (with a grade “C” or better) in a college-level math course that uses Algebra as a prerequisite.

Test Retake Policy

The placement tests are used for initial placement only in English, ESL and Mathematics. Students who have not yet enrolled in
English, ESL or Math can retake the placement test after three months. Students who have completed or withdrawn from English or ESL classes may retake the tests six months after their last attendance in an English or ESL course. Students currently enrolled in English or ESL who wish to jump classes in these sequences must contact the English Eligibility Coordinator at 239-3574 or the ESL Eligibility Coordinator at 239-3427.

Alternative Matriculation Services
You can access alternative services for the matriculation process if you indicate the following:

1. English is not your primary language and you do not feel proficient enough in English to take the regular English Placement Test OR
2. You have a physical, visual, or communication limitation that might require accommodation in an educational setting OR

Enrollment, Nonresident and Foreign Student Tuition Fee Credit Balances

City College of San Francisco allows all enrollment fees, nonresident and foreign student tuition balances to be credited to the students’ accounts, which may be utilized to pay for tuition and/or enrollment fees in subsequent school terms. The students’ account will be held for a period for two years. All balances not utilized within the two-year period will be credited to the District.

Residency Requirements

California Residence

Under the state of California Education Code, in order to establish residency, a person must pair his or her physical presence in California with the following provisions: 1) objective evidence of physical presence (one year and one day prior to the first day of instruction for the term for which he/she has applied as indicated in the Calendar of Instruction) and 2) intent to make California the home for other than a temporary purpose. There are other factors to be considered for non-resident students holding different visa types. These students are advised to contact the Office of Admissions and Records at (415) 239-3287 for clarification. Evidence of intent could include but is not limited to at least two of the following: voting in California elections, paying state income tax, obtaining a California driver’s license, registering a motor vehicle, maintaining continuous residence in California. Act of intent must be accomplished for one year.

City College may determine at the time of admissions or at a later date that such students may not have met the aforementioned residence requirement set forth for all California community colleges.

Such students will subsequently be assessed and billed the nonresident tuition fee per unit at the current academic year rate.

Students who have not reached the age of 18 years are regarded as minors; their residence is that of one or both parents. Therefore, a student who is a minor is regarded as a resident of California only if one or both parents couple their physical presence in California (one year and one day prior to the first day of instruction for the term for which the minor has applied as indicated in the Calendar of Instruction) with objective evidence that the physical presence is with the intent to make California the home for other than a temporary purpose.

It is the student’s responsibility to clearly demonstrate both physical presence in California and intent to establish California residence.

Special residence regulations are in effect for married minors, for minors whose parents are deceased, for certain military members and their dependents, and for various others.

Continuing nonresident students at City College (with the exception of foreign students), who think that they meet the time and intent requirements necessary to establish California residency must contact the Office of Admission & Records for residency verification and adjustment.

For more information regarding California residency please call (415) 239-3287.

Residency Adjustments

Residency adjustments are not automatic. It is the student’s responsibility to initiate a residency inquiry and to provide proof of California residency. Please call the Office of Admissions & Records (239-3287) for the documents accepted as verification.

Students who do not meet the residency requirements will continue to be charged the nonresident tuition as well as the enrollment fee.

Residency Appeals

Students may appeal their residency status as determined by the College through the following procedures:

1. Requests must be addressed, in writing, to the Associate Registrar, within two weeks of receipt of the notification.
2. If further review of residency status is required, a meeting with the Dean of Admissions and Records may be requested within two weeks of the review by the Associate Registrar.
3. Students are required to provide ALL documents required to verify their residency status.

Filing of Students’ Addresses

Every student must file his/her local and legal addresses with the Office of Admissions and Records. Students are required to notify the Office of Admissions and Records promptly concerning change of either address.

Student Classification

Full Time Students - Students carrying 12 or more semester units in the fall or spring semester are full-time students for that semester. A full-time student during the summer session must enroll for six or more semester units in that session.
Half/Part Time Students - Students carrying a minimum of six semester units in the fall or spring semester are half-time students for that semester.

Enrollment Limitations

Students may enroll in a maximum of seventeen (17) semester units, including physical education courses each Fall and Spring School terms. Students may enroll in a maximum of seven (7) semester units, including physical education courses during the Summer Session. Students wishing to enroll in more than the maximum units allowable must receive permission from his/her academic counselor. Approval to take more than 17 semesters unit will not be given unless students need such units to be candidates for graduation, or have completed their last full semester of work at the College with an average grade of B (3.00 grade-point average) or higher.

NOTE: Enrollment maximums are strictly enforced by our computer systems. Therefore, students who have received permission from their counselor to enroll in over the maximum units authorized by College policy must process those units in-person at the Registration Center, Smith Hall, Room 118.

Adding Classes, Changing Sections, Dropping or Withdrawing from Classes

After a student has officially registered in classes, the student may add a course, change a section, drop or withdraw from a course within certain dates specified in the Calendar of Instruction. Information regarding these procedures is available from the Office of Admissions and Records.

A student who stops attending a course and does not file an official drop form with the Office of Admissions and Records may be marked as having failed the course by his/her instructor.

Class Attendance

Attendance at the first class session is very important. Your instructor MAY drop you if you do not attend. If you must be absent during the first few days of class, contact the instructor directly.

Do not rely on the instructor to drop or withdraw you from class for non-attendance. If you have registered for a class, but no longer attend it, or have never attended it, you must drop or withdraw from the class.

Students are expected to attend class regularly and punctually. At the first class meeting, the instructor will give students a written statement of how many times a student can miss class. Excessive tardiness may be considered equivalent to absence. If a student exceeds this number, the instructor may remove the student from the class roll within certain dates as specified in the Calendar of Instruction (see the section under Credits and Grades entitled “W” Withdrawal). If a student disagrees with having been removed from the class roll, the student can appeal to the Vice Chancellor of Academic Affairs. The student will not be allowed back into the class unless the Vice Chancellor of Academic Affairs and the instructor agree.

A student who is absent from a class for any reason is responsible for the content covered during the absence and for making up any course work that was required.

Auditing

In both the credit and noncredit programs, only students who are officially enrolled in a course may attend class. Classes may not be audited. However, some credit classes are offered through a concurrent enrollment option for students who are interested in enrolling in a class but not interested in receiving credit. For a list of credit courses offered through this concurrent enrollment option, students should contact the Continuing Education Office.

Leave of Absence Policy

A student who wishes to drop/withdraw from all courses should file a Leave of Absence. If the student registered for classes in the term he/she is requesting the Leave of Absence, the student’s academic transcript will reflect “Leave of Absence” (see Calendar of Instruction for last day to file).

Students may take a maximum of one (1) semester Leave of Absence. If a student is requesting a Leave of Absence after enrolling in classes, the student will be mailed a registration appointment for the following school term and his/her registration will reflect that of a continuing student. If the student requests a Leave of Absence without attempting to register for classes for the school term, the student must re-submit an application for admissions and his/her registration priority will reflect that of a re-admitted student which has a lower priority than that of a continuing student.

If the deadline for requesting a Leave of Absence has expired and the student requests a waiver of College policy due to extenuating circumstances, the student must submit a Petition for Late Withdrawal to the Dean of Student Advocacy, Rights and Responsibilities. The student will be expected to provide verifiable documentation to support the extenuating circumstances.

Students who have a Hold on their academic records will be denied a Leave of Absence until all HOLDS are cleared.

Admissions Policy (Noncredit Classes)

Anyone 18 years or older can enroll in a noncredit class.

Students may enroll in most classes by attending the first class meeting. Provided space is available, students may also enroll in most classes any time during the semester because these classes are open entry-open exit. Class and program information may be obtained from the individual campuses.

Note: Students enrolling in ESL, Citizenship, or Transitional Studies classes, and many Business, Trade & Industry, Child Development & Parent Education, or DSPS classes must participate in the Matriculation Services outlined below.

Matriculation Services for Students Enrolling in Noncredit Classes

Matriculation is a process that enhances student access to the California Community Colleges and promotes and sustains the efforts of students to be successful in their educational endeavors. Noncredit matriculation services, minimally, include:

- **Assessment** (of English or ESL and math skills, career interests)
- **Orientation** (to noncredit programs and procedures)
Counseling (to assist students in identifying educational and career goals and developing an appropriate program of study)

Please contact the Admissions of Enrollment Office at the campus that you wish to attend for more information.

How to Enroll in Free Noncredit Courses

Students can earn special certificates and/or diplomas by enrolling in the noncredit division. Courses include Adult Basic Education (ABE), Business, Child Development and Family Studies, Citizenship, Consumer Arts and Sciences, Consumer Education, Disabled Students Programs and Services, English as a Second Language (ESL), GED, High School, Older Adults, and Trade and Industry.

Noncredit division courses are tuition free. However, students are expected to secure books and supplies. A few courses require the purchase of additional materials or the payment of a materials fee.

For the most accurate and up-to-date enrollment information, please contact the campus offering the course you want to take. The locations and phone numbers are listed on the inside front and inside back covers of the class schedule. Counselors are available to help you select and enroll in classes.

New students are required to complete a Noncredit Application. Please complete the Noncredit Application in the time schedule and submit it to the Admissions and Enrollment Office at the campus you plan to attend.

In many cases, you can enroll in classes by attending the first class meeting. You can also enroll after the start of the semester. Speak to a counselor or the instructor.

IMPORTANT: Students holding F1 Visas are prohibited from enrolling in noncredit courses.

Eligibility for Noncredit High School Program

Students must be 18 years old or older, or if between 17 and 18 years old they must have an exemption from their home school district.

Eligibility for Differential Standards High School Program

This program is part of the Disabled Students Programs and Services (DSPS). Differential standards are adjustments made for qualified disabled individuals in earning credits for a high school diploma and in taking both proficiency and GED tests. These adjustments are made so that students are not penalized solely because of their disability. Qualifying disabilities for differential standards include learning disability, acquired brain injury, visual impairment, orthopedic impairment, hearing impairment, speech and language limitations, and other health impairments such as seizure disorders and chronic respiratory illness. This program is located at the John Adams Campus. For further information call 561-1001.
GENERAL INFORMATION

History of City College

City College of San Francisco has served the educational needs of its city for nearly 70 years. During that time, the College has evolved into a multicultural, fully-accredited community college which now serves 110,000 students annually.

The College was founded in response to a demand from the citizens for a public institution to serve both the academic and the vocational needs of students as an integral part of the San Francisco Unified School District. It was first housed in temporary facilities at the University of California Extension Division building and at Galileo High School. Classes began on September 1, 1935 with an enrollment of 1,074 students and 74 faculty members. The enrollment rapidly increased, and four years later, the College was holding classes in 22 locations. The San Francisco Board of Education approved a building plan for the College in 1937, which included a 56-acre site bordering Balboa Park at Phelan Avenue. The 1937 groundbreaking ceremony, conducted by Mayor Angelo Rossi, led to the 1940 opening of the Science Hall and the North and South Gymnasiums to approximately 3,200 students.

The once steadily-growing enrollment was reversed when the United States entered World War II; however, the College provided educational training to the Army and Navy personnel. By 1947, the enrollment was on the rise again as returning veterans joined high school graduates pursuing their college degrees. To provide sufficient classroom space, the College acquired the adjoining U.S. Navy WAVES Separation Center across Phelan Avenue, used Excelsior School as an annex, and scheduled its first evening classes. Federal and State grants and the passage of a school bond issue made funds available for the College to continue its building program. Cloud Hall was completed in 1954, Smith Hall in 1955, the Creative Arts Building and the Track and Field in 1961, Statler Wing in 1964, the Horticulture Center in 1965, and the Visual Arts Building and the Student Union in 1970.

In 1970, the College was separated from the San Francisco Unified School District, and the new entity, the San Francisco Community College District, was formed. This new entity included not only the College but also the Adult and Occupational Education Division of the unified district. Responding to the expressed community need, the College maintained these neighborhood education programs composed primarily of noncredit courses. Because of rapid growth, the College subsequently formed two separate divisions: one for credit courses located on the Balboa Park (Ocean Avenue) Campus; and one for noncredit courses offered throughout the City, under the umbrella of the San Francisco Community College District. This growth was also accompanied by additional building. The Arts Extension was completed in 1972, Conlan Hall in 1974, Batmale Hall and the Downtown Campus in 1978, and the Louise and Claude Rosenberg, Jr., Library/Learning Resource Center in 1996.

The two divisions were merged in 1990, and a single City College of San Francisco, offering both credit and noncredit courses at nine campuses and nearly 100 neighborhood sites, was created. The nine campuses are Alemany, Castro/Valencia, Chinatown/North Beach, Downtown, Evans, John Adams, Mission, Ocean Avenue, and Southeast. The College employs 750 full-time and 1,280 part-time faculty, ninety-five percent of whom have master’s degrees and over 150 of whom hold doctorates. They teach over 110,000 credit and noncredit students annually.

GENERAL PROGRAMS OF STUDY

Occupational Program

An important function of City College of San Francisco is to provide occupational education—two years or a shorter period of specialized college-level training designed to qualify students for entry employment or for upgrading in fields in which they have had experience or previous training. The College provides this preparation in both degree and certificate curricula.

Collectively, the degree and certificate curricula offered by the College comprise the Occupational Program. These curricula are specifically designed to meet employers’ and community needs and, in many instances, were developed in cooperation with advisory committees representing business, industry, organized labor, civil service, and the professions. Members of the College administrative and instructional staffs meet with representatives of these groups, as the need arises, in order to revise and to develop curricula and to facilitate the employment of graduates and others.

Award of Achievement and Graduation. Degree curricula in the Occupational Program are designed so that students may satisfy the requirements both for graduation from the College and for the Award of Achievement, which is given to students who have completed a curriculum of 60 or more semester units, normally in two years, in accordance with the requirements of a particular department of instruction. The requirements for the Award are as follows: satisfaction of the College graduation requirements or an Associate or higher degree from an accredited college or university in North America; achievement, in many curricula, of a specified grade average (a minimum of C in most instances) in the student’s major field; and completion of all courses required in a particular curriculum. (Provided that a student’s attendance in regular session is unbroken and that he/she continues in the same curriculum, he/she may elect to meet the requirements in
Students who satisfy the requirements for the Award of Achievement for each curriculum in this section. However, this information is given in the section of this catalog entitled “Announcement of Programs and Courses” where they are listed by department. Please note: Degrees are accepted from foreign universities provided that they are accredited and equivalent to a United States degree; students must meet the College’s English requirement.

Certificate of Completion. Students who satisfy the requirements for a particular certificate curriculum receive the Certificate of Completion. Certificate curricula generally require completion of fewer (generally 12 to 30) than 60 semester units, normally in a period shorter than two years, in conformance with the requirements of a particular department of instruction. The College offers 64 certificate curricula on the occupational level.

The requirements for this award in the various certificate curricula are stated in the section of this catalog entitled “Announcement of Programs and Courses.”

The College offers certificate curricula for two groups of students:

1. those who, for various reasons, desire to prepare for entry-level employment in a period shorter than two years and hence in more limited fields than those normally open to graduates of occupational degree (two-year) curricula; and
2. those who have had previous training or experience, or both, and desire to add to their occupational competence.

Employment. The College attempts to find employment for students who have had training in the Occupational Program, both for those who have completed their training and those who, for various reasons, have been unable to do so. Placement, of course, depends upon economic conditions; upon students’ abilities, aptitudes, and proficiency; and upon students’ records at the College.

Although the College cannot promise employment, it uses various means of helping students find positions: the extensive contacts which instructors in occupational fields maintain with employers, advisory committees for various occupational curricula, recruitment programs through which students meet employers on campus, off-campus work experience programs, Career Development and Placement Center Services, and the online resource, Career Connection.

The College recommends for employment and makes a special effort to find positions for all students who receive the Award of Achievement, with the exception of those trained for positions for which a federal or State license or other certification is required. The College extends its full services, of course, to these students after they have obtained licenses or certification.

Graduates of degree and certificate curricula are employed extensively in business, in industry, in civil service, and in occupational capacities in the professions. Many have earned promotion to supervisory and executive positions, and a number successfully manage their own business.

Course sequence in degree and certificate curricula in the Occupational Program is such that students develop occupational skills early in their training. The College is thus often able to help students find employment, even though they have been unable to complete their studies, entirely on the basis of their preparation in the program.

General Education. In addition to offering specialized occupational training for employment, the College, in keeping with its objectives, undertakes to broaden students’ educational background. The degree curricula in the Occupational Program therefore devote a considerable part of their content to general education. A number of certificate curricula also include courses in general education. Because of the considerable variation in the general education program in the many occupational curricula, it is not feasible to include in this section a statement regarding the required and elective courses in general education in each curriculum. For information concerning these requirements see the “Graduation Requirements” section of this catalog.

Specialized Occupational Courses. A part of the Occupational Program are classes designed for each occupation. Students are trained in skills that are necessary for them to obtain a job upon completion of their selected program. These specialized courses are up-dated to meet changing occupational demands.

Transfer. Although the College does not offer occupational training primarily for transfer students, various universities and colleges accept as credit toward completion of a major or as elective credit the units that students have earned in certain courses in occupational curricula.

Work Experience Education. A variety of structured work-based and school-based learning experiences is provided through a cooperative agreement between the student, the employer, and the instructor in several academic and occupational courses. Students who fulfill the agreement achieve several job objectives and earn transferable college units. The College develops and monitors employment and internships for career exploration in the following departments: Administration of Justice and Fire Science; Aircraft Maintenance Technology; Architectural Technology; Automotive Technology, Broadcast Electronic Media Arts; Business including specialty programs in International Business, Paralegal/Legal Studies, Real Estate, and Travel and Tourism; Child Development; Consumer Education, including Nutrition Assistant; Culinary Arts and Hospitality Studies; Computer Science; Computer Networking and Information Technology; Environmental Horticulture and Floristry; Fashion; Film Production; Graphic Communications; Health Care Technology including specialty programs in Emergency Medical Technician, Health Information Technology, Medical Assisting, and Pharmacy Technician; Health Science, including Community Health Worker; Interdisciplinary Studies, including Multimedia Studies; Journalism; Library Information Technology; Photography; and Radiation Oncology Technology.

The Business Department offers general work experience courses (300 series and 800 series) designed to help students acquire necessary and desirable workplace habits, attitudes, and skills.

In addition, career exploration through structured work experiences is offered in Asian American Studies, Biology and Earth Sciences, and Psychology.

For enrollment requirements, refer to catalog course descriptions.

Transfer Program
Credit earned in City College courses is transferable to universities and colleges, but not on a uniform basis, since the transfer policies
of these institutions vary. Students who intend to transfer may satisfy lower division requirements for the professions or the liberal arts, and transfer to baccalaureate degree-granting institutions.

Articulation agreements which list detailed information concerning specific majors and which describe course transferability and applicability between City College of San Francisco and baccalaureate degree institutions are available at the Transfer Center (Science Hall, Room 132) and online, www.assist.org.

SPECIFIC PROGRAMS OF STUDY

Accelerated High School Program

High school counselors identify and recommend those eleventh- and twelfth-grade students who, in the counselors' judgments, would succeed academically in university-level courses. Students so recommended may then enroll at City College if they meet the course prerequisites and if space is available in the class at the time of registration. Units earned in this manner are offered towards graduation from high school and for college credit. All such courses carry college credit which may be applied toward City College graduation for an Associate degree or transferred to another college. All credit for such courses is accepted by the California State University system. Certain courses may be acceptable for transfer to the University of California.

Continuing Education Program

Continuing Education (CE) is the extended learning program of CCSF. It is a not-for-credit, fee based, self-supporting program offering short term classes and workshops in a wide variety of areas. Class meetings are generally held on evenings and Saturdays. Workshops vary from two to thirty-two hours in length. CE receives no state funding; student fees cover the cost of instruction and all related expenses. Classes and workshops are held in the following subject areas: art, business and finance, computer software applications, food and wine, foreign language, health and fitness, home and garden, music, ornithology, personal development, photography, professional re-licensing, test preparation, theater arts, and writing. On-line classes are also available. Visit www.ed2go.com/ccsf for information on these classes.

Pre-registration is encouraged for these classes; however, some space may be available at the first class meeting. Students may register online at www.ccsf.edu/contined. Scroll down the left-hand side of the screen and click on “online registration”. Registration information and a class schedule may be obtained from CCSF Continuing Education Office, Fort Mason Center, Laguna St. and Marina Blvd., Building B, SF 94123. Telephone: 415-561-1860. Fax: 415-561-1849.

Continuing Education also sponsors College for Teens, a self-supporting program that offers high school credit classes to youth. Visit www.ccsf.edu/collegeforteens for up-to-date information.

Contract Education Program

It is the policy of the San Francisco Community College District to build partnerships with business, industry, government, trade unions, and community agencies. In support of this policy, a unified, District-wide effort has been established to develop and implement not-for-credit and credit contract educational programs.

Contract education consists of those educational services which the District provides for employees and other individuals sponsored by public, private, or community organizations, and for which the District charges a fee to the sponsoring organization. Contract education is an alternative vehicle through which the District can serve all educational needs. Contract education expands access to higher education and, at the same time, affords the faculty an avenue to expand their professional horizons (267-6545).

Ethnic Studies

Through the four ethnic studies departments, the College seeks to promote greater understanding of the culture, history, language, and contributions of African Americans, Asian Americans, Latin Americans, and Filipino Americans. The Program is also designed to serve the broad educational needs and interests of the student body, to provide the courses needed for a general major in ethnic studies, and to provide the curricula necessary to satisfy the degree requirements of the various departments of instruction in ethnic studies.

Admission: Enrollment is open to all students, regardless of their ethnic origin, whether they desire to complete a major or to take a particular course or group of courses. In some instances, however, primarily in certain courses such as English, foreign languages, and social studies, students are required to satisfy prerequisites before enrolling.

Curriculum: The courses offered by the African American Studies Department, the Asian American Studies Department, the Latin American and Latino/a Studies Department, and the Philippine Studies Department are listed under the above titles in the “Announcement of Programs and Courses” section of this catalog.

Family Studies

Programs and courses include infant development, preschool years, school age child, adolescents and their families, child-parent relationship, state preschool, preschool parent participation, the child development center, and foster parent training. Classes are free and offered in convenient locations in the city. For enrollment information call 561-1921. Training for foster parents and those interested in their issues/concerns is available through a special grant from the California Community College State Chancellor’s office. For further information call 239-3172.

Gay, Lesbian and Bisexual Studies

In the fall of 1972, an English Department instructor launched one of the first Gay Literature courses in the country. The durability and popularity of Gay Literature resulted over time in the development of gay and lesbian identified courses in other departments of the College and, in the spring of 1989, to the establishment of the first Gay and Lesbian Studies Department in the United States. In Spring 1996, the name of the department was changed to Gay, Lesbian and Bisexual Studies. The courses offered in this department explore the social and cultural dimensions of the phenomenon of homosexuality and include bisexuality. They aim to promote objective understanding of the complexity of the gay, lesbian, bisexual, and transgender experiences while serving the broad educational needs of the student body. The department hopes to increase social awareness with regard to the gay, lesbian, bisexual, and transgender subcultures while recognizing the contributions of their members to society at large.
**Honors Program**

The Honors Program offers students an enhanced educational experience along with potential transfer and scholarship benefits.

Honors courses provide students with an enriched curriculum either in:

- specific sections of core transfer courses or
- honors contracts (Students complete an agreement with the faculty member for Honors work in addition to the regular course work.)

**Transfer Benefits of Honors Work.** In either case, the course is designated “Honors” on the student’s transcript.

Many universities and colleges recognize the academic achievement represented by Honors courses with preferential transfer tracks, supplemental points in transfer evaluation, scholarships for honors students, etc. Successful completion of honors course work can be a big asset especially in transferring to programs in heavy demand at universities.

CCSF Honors students may also look forward, after transfer, to participation in honors programs in many universities and colleges.

**Eligibility for Honors Courses.** While any CCSF student may take an honors course, to participate fully in the Honors Program and have your work recognized on your diploma, you need to meet ONE of the following criteria:

- GPA of 3.0 or higher
- SAT score of 1100 or higher, ACT score of 24 or higher
- TOEFL score of 650 or higher
- Score of 4 or higher on AP classes in high school

To remain in the program, you must maintain a GPA of 3.0 or better. To receive an Honors designation on your diploma, you must complete at least 15 units in Honors. By completing at least 15 units of honors work you may also be eligible for our Honors Transfer Partnerships, which will give you preferential treatment when applying for a variety of colleges and universities.

**Honors Courses Offered.** Check the Time Schedule for the list of courses in honors each semester. Look under “Honors Courses.” To date, honors courses at City College have included the following instructional areas: anatomy, anthropology, art, Asian American Studies, biology, broadcasting, business, Chinese, English, French, geography, interdisciplinary studies, Japanese, music, political science, psychology, sociology, Russian, Spanish, speech, and Women's Studies.

For questions concerning the Honors Program, please call the Honors Office at (415) 239-3376 or e-mail skuds@ccsf.edu. Additional information is also featured on our web page: http://www.ccsf.edu/Departments/Honors.

**Intensive English Study Program**

The Institute for International Students offers an intensive English program for college-oriented students on F-1 (student) visas. The program is one semester or nine weeks in length, 20 hours per week, and prepares the student for further academic study and to achieve a higher score on the TOEFL. Counseling services reinforce the overall goals and objectives of the College. Adults seeking assistance and guidance are helped to become financially, educationally, and personally self-sufficient.

**GED Testing Center.** The center offers the GED test at specific hours during the week. The test is available in English and Spanish. Special editions are available for the legally blind. Modifications and special accommodations for learning or physically disabled students can be made by prior arrangement and approval of the Chief Examiner. The test is used as a basis for awarding high school equivalency certificates. By California law, the equivalency certificate is considered equal to a high school diploma for purposes of employment in all state and local public agencies. The certificate is also accepted nationally by most employers, colleges, and universities. To schedule a test for you or for further information, call the center at 561-1824.

**Older Adults Classes.** Taught at 40 different locations throughout the City, no-fee classes are available in a variety of subject areas including art, music, literature, sewing, health, writing, crafts, discussions, theater, computers and more. Courses can also lead to GED in either English or Spanish, or to the Adult High School diploma. Students may enroll at any time during the semester. Telephone: 561-1015.
Online Courses

Online courses allow students to decide when and where they will attend classes using a computer and the Internet. Students work with the instructor and other online students through the world wide web. These courses open the classroom to a world of dynamic, diverse content using the resources available on the web. While the student is physically remote from professors and fellow students, the many forms of communication available on the Internet often make all of the participants feel surprisingly close and personal. Some courses may require on-campus orientations, examinations, and/or labs. Students should have some basic experience with the Internet and access to the web.

However, students should also understand that online courses are not for everybody. To succeed, students have to be self-motivated, possess good study skills, and be mature learners. Most students find that online courses are as difficult as on-campus courses. Fees for online courses are the same as fees for other credit courses at City College. Registration may be done in the normal manner. Specific information on course offerings each semester is listed in the Class Schedule and at http://www.ccsf.edu/Departments/Telecourses/.

Study Abroad Programs

The Study Abroad Programs Office provides students with the opportunity to study and live in another country while receiving CCSF credit and continuing to work towards their academic goals. Both semester length and short term programs are offered. Students are encouraged to explore the use of financial aid and scholarships in order to help finance a study abroad experience. International study provides unique insights into culture, language, history and oneself. Participants will gain a more global perspective on international, political, and economic issues; interpersonal relationships; and career choices. For more information contact the Study Abroad Coordinator by calling 239-3778, or visiting Cloud Hall, Room 212. Students can request program brochures by e-mailing studyabroad@ccsf.edu. Program information and brochures are also available on the program website: www.ccsf.edu/Studyabroad.

Telecourses

By enrolling in Telecourses, students can complete a majority of the graduation area requirements needed for a general AA degree. In addition, students can complete a majority of the total number of units needed for a degree.

Telecourses are college level courses which are offered via television. City College Telecourses are broadcast on the San Francisco educational access cable Channel 27. Students take Telecourses primarily by watching their video lessons at home on Channel 27. In addition, students must attend three required meetings on the City College Ocean Avenue Campus - an orientation, a midterm and a final. Other optional and/or required meetings may be offered for different classes. The instructor of each Telecourse is available via telephone during scheduled office hours every week in order to answer questions about the course. Each video lesson is available in the Media Center in the Rosenberg Library on the Ocean Avenue Campus. Some Telecourses are broadcast on local public television stations, and most courses are available for rent from private firms. Support material and newsletters for each class are sent directly to students’ homes by the instructor of the class. Fees for Telecourses are the same as the fees for other credit courses at City College. Registration for Telecourses may be done in the normal manner. Textbooks are available in the College bookstore. Specific information on course offerings each semester is listed in the Class Schedule and at http://www.ccsf.edu/Departments/Telecourses/.

Women’s Studies

In Spring 1971, City College of San Francisco offered its first course directed specifically to women’s interests and educational objectives - Interdisciplinary Studies 20, Women in the Modern World. Its success led to the institution of the Women’s Studies program, one of the first in the nation. The program’s 30 courses, taught in various disciplines, focus on the complex role of women in society. Women’s Studies courses are open to all students. In some instances, students are required to satisfy prerequisites before enrolling. Please see “Women’s Studies” in the “Announcement of Programs and Courses” section of this catalog for details.

City College also sends students to usher at many performing arts houses in exchange for free admission to the shows. More information can be obtained from Creative Arts Building, Room 213.
Financial Aid, CalWORKS, and the Scholarship Office

Student Financial Resources are the offices of Financial Aid, CalWORKS, and the Scholarship Office. Together they serve students who need assistance in meeting the basic cost of their education. This section outlines the application procedures and how student need and eligibility are determined. Because funds are limited, federal and state regulations require that Financial Aid and CalWORKS funds go to students who demonstrate financial need. Funds available through the Scholarship Office are competitively awarded and based on the criteria specified by the donor.

FINANCIAL AID

Ability to Benefit Policy

Federal regulations, effective July 1, 1991, require post-secondary institutions to certify whether a student without a high school diploma or its equivalent has the ability to benefit from the instruction provided by the institution prior to the awarding of any federal financial aid funds.

In order for the student to demonstrate his/her “ability to benefit”, and thereby become eligible to receive Title IV (federal financial aid), the student who lacks a high school diploma or its equivalent must pass an independently administered test approved by the U. S. Secretary of Education.

Please call the Testing Office at 239-3128 for information regarding testing sites and schedules.

How to Apply for Aid

1. Apply for admission to the College.
2. Pick up current Free Application for Federal Student Aid (FAFSA) from the Financial Aid Office, fill it out and mail to the Federal Central Processor, or file FAFSA on the web. A new application must be filed every academic year a student wishes to receive financial aid.
3. Complete and return all forms necessary to complete your file according to the instructions given by the Financial Aid Office. All necessary documentation must be completed before the processing of a student’s financial aid award begins. Awarding priority is given to early applications with files completed by May 2 of the award year.

Eligible students will be offered a financial aid package consisting of a combination of grants, work, and/or loans. Along with the Award Letter, the Financial Aid Office will mail a check disbursement schedule to financial aid recipients.

College Policy on Financial Aid

All financial aid at CCSF is administered in accordance with policies and philosophies which have been established nationally. The basis of such programs is the belief that STUDENTS AND THEIR PARENTS HAVE THE PRIMARY RESPONSIBILITY to meet educational costs and that financial aid is available only to fill the gap between the family’s and/or student’s contribution and allowable educational expenses. The amount of expected student or family contribution is determined by a careful analysis of financial strength: income and net assets which the family may have versus the allowable expenses.

Educational expenses which are considered a basis for establishing student need include nonresident tuition, fees, books and supplies, room, board, transportation, and personal expenses. The CCSF Financial Aid Office has an established student budget to reflect the costs of each of these items based on a statewide cost survey and local cost data.

General Eligibility for Financial Aid

Specific eligibility requirements vary from program to program. The following criteria apply to all financial aid programs. To receive financial aid, a student must:

1. Be accepted and enrolled as a regular student in an eligible program leading to an Associate Degree, a certificate, an Award of Achievement or transfer to a four-year college or university;
2. Be a U.S. citizen or an eligible non-citizen;
3. Demonstrate financial need for need-based programs;
4. Maintain satisfactory academic progress in a course of study according to the standards and practices of CCSF;
5. Not owe a refund on a Federal Pell Grant or Federal SEOG;
6. Not be in default on any Federal Perkins (formerly National/Direct Student Loan), Federal Stafford Loan (formerly Guaranteed Student Loan), or California Loan to Assist Students/PLUS;
7. Male applicants between the ages of 18 through 25 must be registered with Selective Service;
8. Have a valid Social Security Number;
9. Have a high school diploma (or equivalent) or pass an independently administered test (ability to benefit test); and
10. Must not have federal benefits suspended due to drug offense conviction.

Determining Financial Need

The amount of financial aid is subject to available federal and state funds. The type of aid and amount...
received by each student will be determined by the Financial Aid Office. Need-based financial aid awards are based on demonstrated financial need which is the difference between allowable educational expenses and the family’s expected contribution, or the student’s own expected contribution and other resources. Contribution is determined from the financial aid application and other required documentation, such as the 1040 Federal Income Tax Return of the parents and/or student. All information is held in strictest confidence.

**Satisfactory Academic Progress**

Federal regulations require that all students receiving financial aid comply with the financial aid Satisfactory Academic Progress Policy established by the College. To receive financial aid, students must maintain the standards described below.

LENGTH OF ELIGIBILITY – Federal regulations require colleges to establish a maximum time frame during which students are eligible to receive financial aid. City College of San Francisco (CCSF) has established a maximum time frame of 90 cumulative units attempted. Students are no longer eligible for financial aid after attempting 90 units, whether or not financial aid was received. All transfer units are also counted in the 90 units.

GRADE POINT AVERAGE (GPA) – To maintain satisfactory academic progress and remain eligible for financial aid, students must maintain a minimum cumulative GPA of 2.0.

UNIT COMPLETION REQUIREMENT – CCSF will review each student’s record at the end of each academic semester. To maintain satisfactory academic progress, students must earn a total of 67% of all the units attempted and a cumulative grade point average (GPA) of 2.0 or better.

For noncredit students the requirements for satisfactory academic progress are:

1. The student must make up any hours owed for prior terms before receiving any further aid.
2. The student must maintain a passing grade in all eligible courses during their probationary term.
3. The student must attend at least 80% of all courses as determined by their enrollment status during their probationary term.

For example:

1. If a student declares that he or she is going to carry 25 or more hours per week for 18 weeks, he or she must complete at least 18 weeks x 25 hours/week x 80% = 360 hours.
2. If a student declares that he or she is going to carry 16 hours per week for 18 weeks he or she must complete at least 18 weeks x 16 hours per week x 80% = 230 hours. 3) If a student declares that he or she is going to carry 12 hours per week for 18 weeks, he or she must complete at least 18 weeks x 12 hours per week x 80% = 173 hours.

**Financial Aid Probation or Disqualification (Noncredit)**

A student’s status with regard to satisfactory academic progress is reviewed by a Financial Aid Assistant at least once per semester. If a student does not maintain satisfactory academic progress, he or she will be placed on financial aid probation. Students on probation may still qualify to receive financial aid under the following conditions:

1. Must maintain at least 80% attendance in all courses as determined by their enrollment status during their probationary term.
2. Must maintain a passing grade in all eligible courses during their probationary term.
3. Must attend at least 80% of all courses as determined by their enrollment status during their probationary term.

Summer sessions are governed by the same satisfactory academic progress standards as fall and spring semesters. Students may use summer course work to make up hours and/or grade point deficiencies from the previous semester preceding the summer semester, to restore them to good standing. Summer course work must be part of the student’s declared academic major. The summer academic term is not included in the maximum time frame as a separate semester.

Students who do not make satisfactory academic progress during a probationary semester will be denied financial aid until satisfactory progress has been maintained for one semester. However, students may petition for reconsideration.

Additional information regarding financial aid policies and procedures is available in the Financial Aid Office.

**Right to Information**

Students have the right to a full explanation of CCSF financial aid programs, policies, and procedures. Complete information is contained in the CCSF Financial Aid Policies and Procedures Manual and other written regulations available in the Financial Aid Office.

For information on academic programs and facilities, faculty, accreditation, refund policies and non-discrimination policies, see appropriate section of this Catalog.

**Financial Aid Programs**

Financial aid consists of programs which are funded and regulated by the federal and state governments. The programs are of three different kinds: Grants, Work and Loans.

**Grants**

A grant is money which students do not have to work for or repay. Students with bachelor’s degrees are not eligible for grants.
Federal Pell Grant - Grants may range from $400-$3000 per year depending on Federal allocations.

Federal Supplemental Educational Opportunity Grant (FSEOG) A grant is awarded at CCSF according to a formula based on student need and generally will range from $100 to $500 per academic year.

Board of Governors Fee Waiver (BOGW) - A financial assistance program to offset enrollment fees, the Financial Aid Office determines student eligibility based on state guidelines and authorizes the Tuition and Fees Office to use BOGW funds to waive the fee charges. BOGW is available to California residents only.

Cal Grant: A, B, and C - The State of California, through the Student Aid Commission, offers and administers several grant programs for undergraduate students. These include Cal Grant A, B, and C. A student can receive only one type of Cal Grant.

Cal Grant A is to be used when a student transfers to a four-year institution in California. This grant provides tuition assistance. If the student qualifies for a Cal Grant A and wants to attend a public community college, the Student Aid Commission will hold the Cal Grant A award until the student transfers to a four-year college.

Cal Grant B is awarded to disadvantaged students who will not have completed more than one full-time semester or 16 part-time semester units of course work by the end of the previous award year.

Cal Grant C helps vocational program students with tuition and training costs.

Federal Work Study Program

The Federal Work-Study Program provides jobs for students with financial need, allowing them to earn money to help pay education expenses. The program encourages community service work and work related to the student’s course of study. Students who receive a Federal Work Study award may contact the Career Development and Placement Center in Science Hall 127 regarding job placement. If the student works off campus, the employer will usually be a private non-profit organization or a public agency, and the work performed must be in the public interest. The amount earned cannot exceed student’s total Federal Work Study.

Loans

Loans are monies which are borrowed now and must be paid back after leaving school.

Federal Perkins Loan - This loan is awarded at CCSF according to a formula based on student need and generally will range from $200 to $1,500 per academic year. A student may borrow a cumulative total of $15,000 throughout his undergraduate career.

The Federal Perkins loan comes with a 5% interest, to be repaid six months after the student borrower drops below half-time, withdraws, or leaves school. A loan may be cancelled in part or entirely under certain circumstances. The minimum repayment per year is $480.

The Student Account Services, located in Bungalow 404, is responsible for collections of the Perkins (NDSL) loans.

Federal Stafford Loan. Stafford Loans are certified by the Financial Aid Office and are obtained from private lenders such as banks or credit unions and are guaranteed by the guarantee agency. City College has a multi-disbursement schedule for the issuance of Stafford checks. Interest on the Federal Unsubsidized Stafford Loan accrues on the unpaid principal balance on each loan from the date of disbursement by the lender until the entire principal balance is paid in full. Students do not have to demonstrate financial need to qualify for Unsubsidized Stafford Loan. Interest on the Federal Subsidized Stafford Loan is paid by the federal government while borrowers are enrolled in school or in deferment. Students have to demonstrate financial need to qualify for Subsidized Stafford Loan.

Repayment on the Federal Stafford Loan begins six months after the student borrower drops below half-time, withdraws or leaves school.

NOTE: If the student transfers to another school and does not wish to begin repayment, a deferment request is obtained and submitted to the lender.

Noncredit Financial Assistance

Financial assistance consists of grants and student employment programs offered singly or in combinations to students who demonstrate financial need. The purpose of financial assistance is to provide monetary assistance to students who could benefit from furthering their education but cannot without financial assistance. Among federal financial assistance programs available to eligible students of City College of San Francisco are:

1. Federal Pell Grant
2. Federal Supplemental Educational Opportunity Grant (FSEOG)
3. Federal Work-Study (FWS)

Among the State of California financial assistance programs available to eligible students of the City College of San Francisco are:

1. Cal Grant “B”

The Learning Assistance Center

The Learning Assistance Center and its associated programs assist students in learning their course material, enabling them to become efficient, independent learners. These programs are located in the Rosenberg Library, Room 207.

The Tutorial Center provides one-to-one and small group tutoring in mathematics, English, ESL, chemistry, physics, accounting, economics, psychology, anatomy, physiology, statistics, music, nursing, and foreign language courses. Academic peer tutors are students who received high grades in their courses and recommendations from their instructors. These trained tutors assist students in their weekly assignments as well as with their study techniques. Students drop in daily to meet with tutors.

The Reading Laboratory assists students who want to improve their reading skills using computer software, self-paced materials, and cassette tape recordings. Tutors assist students with their reading and study techniques when they encounter difficulties in their academic classes. Instructors are available to assist students with material selection.

College Success Classes are offered through the Learning Assistance Department (LERN 50) and through the Interdisciplinary Studies Department (IDST 50). These classes are especially valuable to students attempting to raise their grade-point averages, re-enter college, or succeed as college freshmen. The focus is on life management, learning styles, personal and educational values, instructor-student relations, maintaining health, memory and concentration, lecture notetaking, textbook studying, subject-specific studying, test taking, using the library, critical analysis, problem solving, and creative thinking. Drop-in workshops are also available.

The Academic Computer Laboratory offers access to the Internet, e-mail, word processing and printing to all City College students. It also offers educational CD ROM and software programs for students taking identified academic classes such as anatomy, business, CIS, English, ESL, mathematics, and science. Laboratory assistants help students in selecting and using the laboratory’s hardware and software.

The Write Place Computer Laboratory offers word processing facilities for students enrolled in courses that require writing assignments. Tutors assist students both with word processing programs and composing and editing their compositions for their English classes and for other college courses.

The Writing Laboratory provides tutoring for students taking courses with writing assignments. English and ESL instructors and Learning Assistance Center tutors assist students in composing and editing their essays. Tutors do not correct student compositions; they point out areas in need of attention and show students how to correct their own mistakes. Students sign up daily for appointments.

The Writing Success Project provides an intensive writing tutorial program for a limited number of students. Those who are accepted into the project make a commitment to complete a minimum number of hours of small group instruction, tutoring, and academic counseling. Successful candidates must meet certain federal requirements.

Disabled Student Programs and Services (DSPS)
Disabled Student Programs and Services (DSPS) offers supportive services and classes for students with a wide range of disabilities. Emphasis is given to those services which allow the student with a disability to fully participate in all regular academic and vocational programs for which they are otherwise qualified.

Students who participate in these programs include those who are: blind/visually impaired, deaf/hard of hearing, learning disabled, physically disabled, speech and language disabled, students with a psychological disability, students with an acquired brain impairment, and developmentally delayed learners or those with other medical conditions.

Students who have a verified disability, or think they may have a disability and who wish to use Disabled Students Programs and Services need to meet with a DSPS counselor. Students who wish to use a service animal on campus also need to see a DSPS counselor. Due to specific State and Federal guidelines, a student may be required to provide medical and/or educational verification of his/her disability in order to receive special services or accommodations. All DSPS services are provided in compliance with Section 504 of the Vocational Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990.
All programs at City College of San Francisco are accessible, but certain classrooms may not be. If this applies to the class you are registered in, check with the Disabled Students Programs and Services (DSPS) to resolve this situation. The majority of programs and services are offered at two main locations: the Ocean Avenue Campus and the John Adams Campus. Besides offering programs at these locations, additional classes are provided for students with disabilities at community sites throughout San Francisco.

DSPS assists in arranging accommodations/academic adjustments such as: priority registration; specialized test arrangements; notetaker arrangements; academic, personal, and employment counseling; sign language interpreters and referral to campus and community resources.

All qualified students with disabilities will receive appropriate classroom accommodations. Accommodation decisions are made on a case by case basis depending on the needs of the individual student. Some services are very specialized and are designed to meet the needs of a particular disability group. Other services, such as Workability III, the High-Tech Center and Counseling, are available for all disability groups. Students may be enrolled in credit and noncredit classes simultaneously.

In accordance with the Right to Privacy Act, all disability related contacts with the DSPS office will be kept confidential and will not be released without the student’s consent unless the college is required to do so by law.

For information about programs and services for students with disabilities on the Ocean Avenue Campus: Rosenberg Library, Room 323, or telephone: voice - 452-5481, TTY - 452-5451. The office is open Monday through Saturday and evenings on Tuesdays and Thursdays.

Group and individual counseling, tutoring, and other activities supplement the traditional mathematics lecture. Students also learn to develop skills that will be useful in other college courses. Call (415) 239-3933 for more information regarding admission to the program.

Mentoring and Service-Learning
The Office of Mentoring and Service-Learning offers two types of programs to increase student success and transfer, and enrich the college experience with hands-on application of classroom learning. In the Mentoring program, a student is matched with a peer mentor. A mentor is “a kind of guide who, despite having been far enough ahead to know something of what’s down the path, comes back to walk with you, and thus leads without leaving you to follow.” Mentors are currently available to students taking specific courses in science, social science, and liberal arts.

In the Service-Learning program, students enrolled in courses offering service-learning as an option are placed in the community,
where they apply both academic and practical skills for the benefit of society. Service-Learning integrates community service with academic instruction so that each strengthens the other, and provides time for reflection and critical thinking while making significant contributions to individuals, organizations, and neighborhoods. For example, students taking biology courses may contribute to habitat restoration. In Project SHINE (Students Helping in the Naturalization of Elders), students in political science, psychology, sociology, foreign languages, and health prepare elders to take the citizenship exam.

Students involved in service-learning or volunteer opportunities may enroll in IDST 12 - Reflection on Service-Learning to share their experiences with other students (see course description). For more information about mentoring or service-learning opportunities, call (415) 239-3771.

**Peer Advisors**

The Peer Advisors are a group of students who have been trained extensively to offer support toward students’ success at CCSF. The program is open to all interested students. For more information call (415) 239-3932.

**Re-entry to Education Program (REP)**

Whether one is seeking to enhance his/her knowledge, learn new job skills, or prepare for a professional career, REP seeks to ease the transition for the re-entry student’s return to school. The staff understands that barriers can exist to beginning or re-entering college as well as to completing one’s educational goals. Credit for Military Training. City College will grant six semester units of credit to students who present to the Office of Veterans Educational Benefits official documentation showing that they have completed one year or more of active duty in any of the Armed Forces of the United States. Veterans who have completed military-training courses equivalent to courses offered at City College will be awarded up to a maximum of ten units. These are based on the recommendations made by the American Council of Education. Students may use such credit in partial unit satisfaction of the requirements for the degree of Associate in Arts or Associate in Science. Since many universities and colleges do not accept credit that other schools have granted for military service, students who desire to transfer such credit should consult the policy of the school to which they intend to transfer.

Academic Progress Policy for Veteran Students. If the student has been on either academic probation or on progress probation or on both academic and progress probation for more than two consecutive semesters, he or she shall be subject to termination of veteran’s education benefits.

Associate Degree Graduation Requirements
ASSOCIATE DEGREE GRADUATION REQUIREMENTS

City College of San Francisco is dedicated to the principle that the highest quality education possible be provided to all students. Central to this philosophy is the belief that all students granted an Associate degree should be required to study a variety of general breadth courses in addition to those courses which are required by a student’s major. These courses shall introduce the student to the languages, the methods of inquiry, and the achievements of the major academic disciplines. Consistent with this philosophy, it is the intent of the College to involve students in the various disciplines in such a way that students will develop an interest in learning that will continue and expand throughout their lives.

Goals of the General Education Program

Through its general education program, the College intends to graduate students who have developed:

a. skills in the principles and applications of language toward logical thought, clear and precise expression, and critical evaluation of communication in whatever symbol system the student uses.

b. English language skills so that they can communicate clearly, both orally and in writing, and can evaluate what they hear and read.

c. an appreciation and understanding of the scientific method, of the achievements of at least one of the natural sciences, and of the relationships between the natural sciences and other human activities.

d. an appreciation and understanding of the methods of inquiry used in the social and behavioral sciences and of the ways people act and have acted in response to their societies.

e. an appreciation and understanding of the ways in which people throughout the ages and in different cultures have responded to themselves and to the world around them through artistic and cultural creation, and have developed aesthetic sensitivity and skills as well as an ability to make informed value judgments.

f. an appreciation and understanding of American history and government so that they can be responsible and active citizens.

g. an appreciation and understanding of the physical skills and health knowledge essential for mental and physical well-being.

h. an appreciation and understanding of the history, culture, and perspective of diverse ethnic groups, of women and of gays, lesbians and bisexuals.

Catalog Rights

City College of San Francisco issues a new catalog yearly. The courses required for a specific degree or certificate may change from one catalog to the next and often change during a student’s tenure. For the purposes of meeting graduation requirements based on catalog rights, students may elect to meet the requirements of either:

1. The catalog which was in effect at the time the student began his/her course work at City College of San Francisco, or

2. Any catalog that is or has been in effect during the time that the student has maintained continuous enrollment before graduation.

Students maintain catalog rights through continuous enrollment at City College of San Francisco. Continuous enrollment is defined as enrollment in at least one course per academic year (fall or spring semester). Any of the following academic record symbols (A-F, CR, NC, I, UG, IP, RD, W and MW) shall constitute continuous enrollment. Documented military or medical leave, not exceeding two years, will not be considered an interruption of enrollment. If an interruption in enrollment occurs, catalog rights are re-established as defined in items one and two above. Students planning to transfer to a four-year institution are advised to review that institution’s catalog for “rights” accorded community college transfers. City College of San Francisco reserves the right to not offer course work which has been offered in the past.

Graduation Requirements

A student may be graduated from City College of San Francisco with the degree of Associate in Arts (A.A.) or Associate in Science (A.S.) by satisfying the requirements established by the Board of Governors of the California Community Colleges, the Governing Board of the San Francisco Community College District, and the faculty of the College. b. completion of 18 or more semester units in a particular field of study or as required in a curriculum specified by the
The following majors are offered at the City College of San Francisco: Accounting, Administration of Justice, Architecture, Architectural Interiors, Electronic Engineering Technology, Engineering, Fire Science Technology, Graphic Design, Mechanical Engineering Technology, Photography, and Print Production.

**Option B: CCSF Transfer Associate Degree (CSU)**

The student may satisfy the graduation requirement for a major by completion of the CSU General Education requirements.

### 4. Unit Requirement (Options A and B)

To satisfy the unit requirement for graduation, the student must complete a minimum of 60 semester units of college-level work that include the courses and units

- a. required for the student’s major, and
- b. specified in the general education requirements described above.

### 5. Grade-Point Requirement (Options A and B)

To satisfy the grade-point requirement for graduation, a student must maintain a cumulative grade point average of at least 2.0 in all associate degree applicable courses at City College of San Francisco. The student must also have at least a 2.0 combined grade point average which includes the cumulative grade point average for all associate degree applicable courses at City College of San Francisco combined with the grade point average of all transferable units completed at other accredited postsecondary institutions.

### 6. Residence Requirement (Options A and B)

The student may satisfy the residence requirement for graduation

- a. by completing at City College of San Francisco the last 12 of the 60 semester units required for graduation, or
- b. by completing a minimum of 45 semester units at City College of San Francisco.

### 7. Petitioning for the Associate Degree (Options A and B)

Students seeking the Associate in Arts or the Associate in Science Degree must complete and submit a Petition for Graduation Form to the Admissions and Records Office on or before the dates specified in the “Calendar of Instruction.”

Students should not petition for the Associate Degree until all the requirements are met or about to be satisfactorily completed in the current school term. Students are requested to review the completion of all requirements with their counselor or advisor prior to submitting the Petition for Graduation Form.

---

**Petitioning for Award of Achievement and/or Certificate of Completion**

**Requirements for the Award of Achievement.** To qualify for the Award, you must also have completed the requirements for the Associate Degree at CCSF and applied for graduation at CCSF. Students who have earned the required Associate or higher degree from another accredited U.S. institution must have an official transcript on file with the degree posted. Degrees from foreign institutions may also be accepted, providing they are accredited and equivalent to a U.S. degree; students must also meet CCSF’s English requirement.

**Requirements for the Certificate of Completion.** Students who have fulfilled the certificate program course requirements as stated in the CCSF college catalog may petition to receive a Certificate of Completion.

Petitions are available at the Office of Awards and Certificate Evaluations, Conlan Hall, Room E2 and the Admissions and Records Office, Room E107. Petitions should be submitted by the deadline posted in the Calendar of Instruction.

**Guidelines for both petitions are as follows:**

- Discuss the curriculum requirements with your program advisor or department chair to assure that all program requirements are met.
- Submit your petition before the deadline indicated in the current College Catalog or Schedule of Classes.
- If you are applying for both the Certificate and the Award, please complete separate petitions for each.
- Please be aware that an official transcript, not a diploma, is the legal document to be presented as proof of graduation, if needed.
- If any of the requirements for the Certificate of Completion or the Award of Achievement you are applying for (as published in the CCSF Catalog) are being substituted by courses taken at another college or university or substituted with CCSF coursework, or are being waived by the department, be sure the department chair or faculty advisor completes and signs the appropriate areas of the petition form.

If your petition is denied because you have not met all the requirements, consult the College Catalog. If you need further clarification, contact the department chair or a faculty advisor. DO NOT call the Certificate and Award of Achievement Department or the Admissions and Records Office to request a waiver of requirements. The requirements for the Certificate of Completion and Award of Achievement have been established by the faculty and the administration and approved by the Governing Board. The Admissions and Records Office does not have the authority to change or waive any of the requirements.
Transfer Information

The Cliff House
General Information

This section of the College catalog contains general information for students planning to transfer to any of the University of California (UC) campuses or to any of the campuses of the California State University (CSU). Listed in this section of the catalog (in the order given below) are five categories of information: (1) Courses which satisfy the general education requirements for all campuses of the California State University; (2) Courses from City College of San Francisco acceptable at all campuses of the University of California for elective credit; (3) Courses from City College that satisfy the Intersegmental General Education Transfer Curriculum (IGETC); (4) Courses which satisfy the American Institutions requirement for the University of California, and breadth requirements for only the College of Letters and Science of the University of California, Berkeley (note that breadth requirements are different for individual colleges within the University); and (5) Courses from City College which have California Articulation Number System (CAN) numbers.

Transfer Information

Courses numbered from 1 through 799 are university courses except for some listed as “Credit, non-degree applicable” and a few others. With these exceptions, courses numbered 1 through 799 are considered to be baccalaureate in nature and carry transfer credit. However, according to their transfer policies, some universities and four-year colleges may not grant transfer credit for every City College baccalaureate course. Courses named with one of the letters from A through Z are foundational courses: for example, English K. Credit earned in these courses is not accepted for graduation from City College and is generally not transferable to a university or a four-year college. Credit earned in courses numbered 800 through 899 is generally not transferable to a university or a four-year college. Such credit, however, is accepted for graduation from City College. Courses numbered 0001 through 9999 (the zeroes are significant) are noncredit courses. No college credit is given for these.

The California State University grants transfer credit for all courses numbered 1 through 799, except for some courses in English, English as a Second Language and Engineering Technology. Those courses which are transferable to the California State University for elective credit are labeled with “CSU” following the description of the course content in its announcement.

Courses designated as “UC upon review” are independent studies or variable topics courses which may earn UC elective credit, but which must be evaluated by the UC campus at the time the student is admitted for transfer before credit can be granted.

Those courses for which a California Articulation Number System number has been established have “CAN” following the description of the course content in their announcement.

Students are advised to see their counselors or advisors for further information beyond that which is given on the following pages regarding transferring to a four-year college or university.

Articulation Agreements

Articulation agreements which list detailed information concerning specific majors and which describe course transferability and applicability between City College of San Francisco and CSU and UC campuses are available at WebAssist, www.assist.org. Articulation agreements with private or out-of-state colleges may be found on the City College Articulation website: www.ccsf.edu/artic.

Transfer of Credit to the California State University (All Campuses)

The campuses of the California State University accept credit from City College of San Francisco as follows:

1. They accept as elective credit toward graduation the units earned in all City College courses numbered 1 through 799, except for ESL 75, 85, 110, 112, 120, 122, 130, 132, 142; ENGL 90, 92 and ET 108A.
2. They do not accept credit earned in City College foundational courses. (These courses are named with only one letter—for example, English K. Other of these courses are numbered from 800 through 899—for example, Mathematics 840.)
3. They accept transfer credit as indicated above, but do not accept more than 70 semester units of community college credit to be used to satisfy the unit requirements for the baccalaureate degree.
4. They accept partial or full certification of completion of the Lower Division General Education requirements for graduation from the California State University for courses completed at City College.
5. They do not necessarily accept credit that City College has granted for work completed at other collegiate institutions or for The College Board’s AP examinations.
6. They grant six units of credit for one year or more of military service.

Admission as a Transfer Student
Applicants who, since high school graduation, have registered in any collegiate institution and who have completed work in community colleges, summer school (other than a summer session immediately following high school graduation), or extension courses must apply for admission as a transfer student. An applicant may not disregard her or his previous college record and apply as a freshman. A transfer student who has earned fewer than 12 semester units of college credit subsequent to high school graduation must satisfy the examination requirement for freshman applicants. The examination requirement may be disregarded in determining eligibility for freshman standing if the applicant has earned more than 12 semester units of college credit subsequent to high school graduation. The requirements for admission as a transfer student vary according to the high school record. Current regulations applying to admission for transfer students who are California residents are as follows:

1. A student who was eligible for admission from high school, meaning that he/she satisfied the Subject, Scholarship and Examination Requirements, or was eligible under the Eligibility in the Local Context (ELC) program, is eligible to transfer after establishing a grade point average of 2.00 or better in all transferable coursework.

2. A student who has met the Scholarship Requirement but has not completed the Subject Requirement in high school may establish eligibility by:
   a. completing with a final grade of C or better appropriate college courses in the required “a-g” high school subjects and
   b. establishing an overall grade-point average of 2.00 or better in all transferable college coursework.

3. A student who was ineligible for admission as a freshman because of the Scholarship Requirement must:
   - Complete 60 semester units (90 quarter units) of transferable college credit with a grade point average of at least 2.4, and
   - Complete a course pattern requirement to include:
     a. Two transferable college courses (3 semester units or 4-5 quarter units each) in English composition; and
     b. One transferable college course (3 semester units or 4-5 quarter units) in Mathematical Concepts and Quantitative Reasoning; and
     c. Four transferable college courses (3 semester units or 4-5 quarter units each) chosen from at least two of the following subject areas: the arts and humani-
ties, the social and behavioral sciences, the physical and biological sciences.

The current admission requirements for nonresident transfer applicants are the same as those for residents except that nonresidents must have a grade point average of 2.8 or higher in all transferable college course work.

The University accepts transfer credit as indicated above, but does not accept more than 70 semester units of such credit toward graduation. Courses in excess of 70 semester units will receive subject credit and may be used to satisfy University subject requirements. The University does not accept credit that students have been granted for military service, nor does the University necessarily accept credit that City College of San Francisco has granted for work completed at other institutions.

General Graduation Requirements

Students may satisfy the general University requirements in American institutions and United States history and in Subject A as follows:
IGETC can be certified. All courses must be completed with The course requirements for all areas must be completed before LAR major.
PUS-specific requirements for your particular may use IGETC or if you must follow the campus general education requirements.

Note: the new IGETC for 2004-05 is available in the Counseling Office, the Transfer Center or WebAssist, www.assist.org.

Completion of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) will permit a student to enter high unit majors, such as those in the sciences, can follow the IGETC but must be careful to complete any needed lower division major preparation.

### CITY COLLEGE COURSES IN THE CALIFORNIA ARTICULATION NUMBER SYSTEM (CAN)

The California Articulation Number (CAN) System is a course numbering system in use by postsecondary educational institutions in California. The numbering system provides a cross reference course identification number (the CAN System subject identifier plus a number) for semester courses which are transferable, lower division introductory courses commonly taught on California college and university campuses. Participating campuses agree to accept identically numbered CAN courses in lieu of their own courses from all other participating campuses for all purposes, recognizing that CAN courses are not necessarily identical in content, but are acceptable “in lieu of” each other. Below are the City College of San Francisco courses and their corresponding CAN System numbers as of January 2003. An updated CAN list can be found on the web at [http://www.cansystem.org](http://www.cansystem.org).

PROGRAMS AND COURSES

Degree and Certificate Curricula
City College of San Francisco offers degree, credit certificate, and noncredit certificate courses of study on the occupational level.

Degree Curricula. A degree curriculum requires completion of 60 or more semester units (normally two years of full-time work) in conformance with the requirements of a particular department of instruction. (Students who have not satisfied course prerequisites may need more than two years to complete a degree curriculum.) Students who satisfy these requirements receive the degree of Associate in Arts or Associate in Science, and also the Award of Achievement if they have maintained a specified grade-point average. The College offers some 46 degree curricula on the semiprofessional level.

Degree curricula, because they are offered for a two-year period, with training in theory, related practice, and general education, offer students broad opportunity for employment. These curricula are therefore recommended for those desiring preparation for employment in any of a wide variety of capacities on the semiprofessional level.

Certificate Curricula—Credit. A credit certificate curriculum generally requires completion of 12 to 30 semester units in conformance with the requirements of a particular department of instruction. The College offers certificate curricula in some over 100 areas. The College offers certificate curricula for two groups of students:

1. those who desire to prepare for entry-level employment in a period shorter than two years and hence in more limited fields than those normally open to graduates of semiprofessional degree (two-year) curricula; and
2. those who have had previous training or experience, or both, and desire to add to their occupational competence.

All credit that students earn in a certificate curriculum may also be used toward satisfaction of the requirements for graduation from the College with the degree of Associate in Arts or Associate in Science.

Students who have completed courses equivalent to any required in semiprofessional curricula, or who have otherwise satisfied the requirements for such courses, are exempt from taking them. The Office of Admissions and Records or department heads and program advisers will advise students regarding matters of equivalency.

Certificate Curricula—Noncredit. The noncredit offerings of City College include many certificate programs, some of which meet required guidelines for student financial assistance. Some programs are vocationally oriented. They provide training in entry-level, pro-
ter, and new technological areas. Students may receive a Certificate of Completion upon successful completion of all required courses.

General Information
Students should check the time schedules, published separately, for the times when courses are offered. The schedules also identify the locations at which the courses will be taught. The Time Schedule is available at the College Bookstore; the Office of Admissions and Records, Room 107, Conlan Hall; the Registration Center, Room 104, Smith Hall; and San Francisco Public Libraries. To see Time Schedule online, visit: http://www.ccsf.edu/Schedule.

In choosing courses, students who desire to be graduated from City College should consult the College graduation requirements elsewhere in this catalog. When choosing courses to satisfy “Additional requirements” listed for a curriculum, students should consult their program adviser or counselor.

Course Information
Courses are identified by a subject and a number (for example, MATH 97) or by a subject and a letter (for example, ENGL W).

In some instances course numbers are followed by letters to indicate that the course is one of a closely related series of courses more than one semester in length: for example, English 1A-1B (a two semester series) and Art 170A-170B-170C (a three semester series).

In such a series of courses, each course is prerequisite to the succeeding part unless there is a statement to the contrary.

The number or numbers in parentheses following the title of a course indicate its semester unit (s.u.) value. Note that the semester unit is not equal to a quarter unit (q.u.). (2 s.u. = 3 q.u.).

The letters “fa,” “sp,” or “su” appearing after the course title indicate that the course is offered only during the fall, the spring, or the summer term (semester) respectively.

Courses that have no term-designating letters associated with them still may not be offered every semester. Also the indication of the semester or term during which the course is offered is subject to change without notice. Check with the department head to see when the class will next be offered.

The number of weekly meetings (lecture hours (lec), conference hours (conf), laboratory hours (lab), field trips, work hours (work)) is given for each course. For example, “Lec-3” means that the class meets three hours each week (a college hour is 50 minutes long); “lab-3” means that three hours of laboratory work are required each week of the semester. The average number of hours of study per week is given for independent study (ind st) courses. Note that patterns of course delivery other than the semester-long pattern may be chosen by a department. Other patterns include, but are not limited to, one-half semester (about eight weeks), one-third semester (about 6 weeks), or a ten-week summer session. The length and number of meetings for these different patterns is determined by the required number of contact hours needed to satisfy the semester-unit value of the course.

Some courses may be taken on a credit/no credit or a letter grade basis. Others may be taken only on a credit/no credit basis. This is indicated by “CR/NC avail.” and “CR/NC only” respectively on the same line as the delivery pattern. In this symbolism “avail.” means the “CR” (credit) or “NC” (no credit) grades are available for the course instead of the regular grades of “A” through “F” if the election to take the course for credit/no credit is made at registration or by the end of the first 30% of the term of offering for the course. If no notation occurs regarding credit/no credit, the course is a “letter grade only” course.

Other pertinent information about the course including prerequisites (Prereq:.), corequisites (Coreq:.), advisories on recommended preparation (Advise), repeatability (Repeat:), and exclusions follow the delivery pattern. Sometimes a course listed as a prerequisite may be taken concurrently with the course being described; in which case, “concur.” in parenthesis following the course number indicates that.

A basic description of the course content generally concludes the course announcement. At the end of this description, theabbrevia-

Fire Science Technology

General Information

The curriculum in Fire Science Technology is designed to provide training for three groups of students: those who plan to seek employment as members of city and county fire departments and other governmental agencies that involve fire prevention, fire investigation, fire suppression, and fire protection engineering; those who are employed in the fire service who want further technical training to prepare for promotion; and those who plan to seek private employment as safety instructors in industry, insurance adjusters, fire-protection technicians, fire equipment salespeople, and fire-equipment installers.

Admission. Enrollment is open to all interested students.

Course of Study. The California Community College Association of Fire Technology Directors recommends that five courses be offered as a basis for all fire technology programs in the State of California. These courses are: introduction to fire protection, fire prevention, fire protection equipment and systems, building construction for fire protection, fire behavior and combustion. These courses serve as the basis of the fire science technology program at City College of San Francisco along with a pre-hospital emergency care course. The six courses represent the base knowledge, the foundation, upon which a student can build, regardless of where he/she works in the fire protection field.

They also provide a course of study for the student who is currently employed in public fire suppression that leads to a rating of fire officer after completing the eight two-unit courses which mirror the California State Fire Marshal’s course content. These programs also provide an opportunity for students returning to college after completing a degree in other fields to earn a certificate in fire protection or earn a rating of fire officer without completing the general education requirements for graduation from City College. Two certificate programs are available, a certificate in fire protection and a certificate as a fire officer which can also be applied for through the State Fire Marshal’s Office.

Aircraft Maintenance Technology

Announcement of Curricula

Degree Curriculum

(Options in Aircraft Powerplant Maintenance Technology, Airframe-Maintenance Technology, and Avionics-Maintenance Technology)

City College of San Francisco offers two years of specialized training for students desiring preparation for employment as aircraft technicians maintaining powerplants, airframes, or avionics equipment.

Employment. This training qualifies students who complete the course of study satisfactorily for employment in various positions, including those indicated in any of the following fields:

- **Powerplant Maintenance**—Entry positions as accessory mechanic, general powerplant mechanic, maintenance-crew member, ramp service-crew member, and hangar-crew member. Positions to which graduates may advance after obtaining experience and further training include those of aircraft powerplant technician (licensed), supervisor, and inspector.

- **Airframe Maintenance**—Entry positions as general aircraft-overhaul mechanic, accessory mechanic, electric-shop mechanic, general cabin-equipment mechanic, maintenance-crew member, ramp-service crew member, and hangar-crew member. Positions to which graduates may advance after obtaining experience and further training include those of airframe technician (licensed), supervisor, and inspector.

- **Avionics Maintenance**—Entry positions as avionics technician, radio/electric line mechanic. Positions to which graduates may advance after obtaining experience and further training include those of lead systems specialist, supervisor and inspector.

Required Permission to Enroll. Because the number of applicants for admission to the curricula greatly exceeds the staff and facilities the College can provide, enrollment is necessarily limited. Permission to enroll in the curriculum must be obtained from the Aircraft Maintenance Technology Department. Telephone (415) 239-3901 for counseling appointments and applications. To be considered for admission to the curriculum, student must:

1. File with the Office of Admissions and Records an application for admission to City College.

2. Submit an application to the Aircraft Maintenance Technology Department for admission to the curricula in aircraft maintenance technology. Applications are available from the Aircraft Maintenance Technology Department, San Francisco International Airport, or from the student’s assigned counselor on campus.

3. Take the City College of San Francisco placement tests on the dates announced by the College.

Communication and Computation Skills: Federal Aviation Administration (F.A.A.) regulations require that a student must be able to read, speak, and understand English and perform basic computation. Therefore, it is highly recommended that 1) Applicants prior to enrolling in the Aircraft Maintenance Technology program complete ESL 82 with a final grade of “C” or higher or receive a CCSF placement of ENGL 94 or 2) Students enrolled in English classes complete ENGL 92 with a “C” or higher or receive a CCSF placement of ENGL 94 and 3) Students complete MATH E, BSMA G, H, or J or receive a placement of MATH 840.

Special Regulations and Policies. The Aircraft Maintenance Technology Program is regulated by the Federal Aviation Administration. As a result, all students will be issued a “Department of Aircraft Maintenance Technology Student Handbook.” Contained in the handbook are special regulations regarding attendance, performance levels, conditions of academic probation and dismissal from the program. Also included are notices concerning personal safety equipment, hand tools and supplies which the student will be responsible to purchase. Approximately $150 will cover the required items.

Previous Aircraft Job-Related or Educational Experience. Applicants with previous aircraft job-related experience and training must have the experience and training documented according to Federal Aviation Administration regulations. This experience will not guarantee admission to the program, nor may it waive any requirements in the Department, but will usually provide the student with a greater chance of success in both training and placement in the industry. If the training and experience are accompanied with official verification, in limited cases and upon Aircraft Maintenance Technology Department approval, they may substitute for certain course requirements.

Counseling. Since students in this curriculum may prepare for employment in a variety of positions on different levels, the Department of Aircraft Maintenance Technology adviser consults individually with students to help each select the training best suited to his/her abilities and interests.

Training in the Major. Within their first three semesters, students in this curriculum obtain broad background in aircraft maintenance by taking the following technical courses common to all options in the curriculum: Introduction to Aircraft Maintenance, and Basic Electricity and Electrical Systems. In their second, third, and fourth semesters, students enrolled in the various options take specialized technical courses.

Airport Training. Instruction in the technical courses in the curriculum is given in the College Airport Campus, located at the San Francisco International Airport.

Associate in Science Degree and Award of Achievement. The course of study is designed so that students may satisfy the requirements for graduation from the College. Students who satisfy these requirements and complete any of the options in the curriculum with the final grade of C or higher in their major technical courses
receive the Award of Achievement and a certificate from the Federal Aviation Administration. This certificate permits students to take the written, oral, and performance tests for a technician’s rating from the Federal government. Passing these tests qualifies students to seek employment in their field.

**National Approval.** The Federal Aviation Administration has approved the Option in Aircraft Powerplant Maintenance Technology in this curriculum and therefore permits those who hold the Award of Achievement (or the Certificate of Completion) to take the examination for the F.A.A. Powerplant Certificate. The Federal Aviation Administration has approved the Option in Airframe-Maintenance Technology in this curriculum and therefore permits those who hold the Award of Achievement (or Certificate of Completion) to take the examination for the F.A.A. Airframe Certificate.

Those who satisfactorily complete the Option in Avionics-Maintenance Technology in this curriculum and who hold the Certificate of Completion are qualified to take the Federal Communications Commission (F.C.C.) examination and meet job entry requirements of the avionics-maintenance field.

**Transfer to San Francisco State or San Jose State University.** Although students in the Aircraft Maintenance Program generally enter industry upon graduation, for those students who may prefer to earn the Bachelor’s degree, San Francisco State and San Jose State University offer graduates this opportunity. Those students who intend to transfer should consult the counselor in the Aircraft Maintenance Technology Department at City College of San Francisco.
Permission to Take F.A.A. Examination. The Federal Aviation Administration has approved the Certificate Curriculum in Aircraft Powerplant Maintenance Technology, since training is planned so that students may achieve a level of proficiency acceptable under the standards of the aviation industry. The Federal Aviation Administration therefore permits those who hold the Certificate of Completion in Powerplant Maintenance Technology to take the examination for the F.A.A. Powerplant Certificate.

Construction Management

Degree Curriculum

Graduates who have satisfactorily completed the Curriculum in Construction Management, a two-year course of study, are qualified for employment in the building and construction industry in a wide variety of positions ranging from those of field assistant and expeditor to those of materials clerk and assistant estimator. With experience and further training, graduates may become licensed building
 contractors, detailers, estimators, foremen, construction superintendents, building inspectors, appraisers, and cost analysts. The California State Contractors License Board gives graduates who receive the Award of Achievement credit for two of the four years of practical experience required of applicants for the State building contractor's license. Upon successful completion of the curriculum students receive the Associate in Science degree. Students who complete the curriculum with final grades of C or higher in their major technical courses receive the Award of Achievement in Construction Management.

The course of study includes instruction in the following: architectural technology, basic architectural drawing, structural detailing, surveying, estimating and construction costs, business operation, business records, and legal aspects of contracting. Instruction in general education is included so that students may satisfy the College graduation requirements in this area.

Biological Sciences

Announcement of Curricula

The following certificate programs are offered by the Biological Sciences Department.

Biomanufacturing

Over the past several years an important change has been taking place in the biotechnology sector. Biotech companies are shifting their focus from exclusively research and development to a mix of drug production and research. This change has been precipitated by a rapidly increasing collection of FDA-approved biotech pharmaceuticals. The San Francisco Bay area has the highest concentration of biotech companies of the world.

The shift towards increasing production of biotech products created a demand for a new set of skills among entry-level workers in the field. The requirements for the certificate in biomanufacturing described here will prepare students for entry into the field as a bioprocess technician, media prep technician, pharmaceutical materials specialist, or pharmaceutical manufacturing technician.

The one-year certificate in biomanufacturing described here requires a subset of the courses required for the two-year Certificate in Biotechnology.

Admission. The biomanufacturing certificate program is open to anyone. High school algebra, biology and chemistry are recommended. For more information, call 415-239-3627.

**Real Estate**

**Degree Curriculum**

The curriculum in Real Estate, a two-year course of study, is  
designed to give students a sound foundation in theory and practice  
so that they may hold a salaried position while they prepare for spe-
cialized realty work, and to help them obtain the California real  
estate salesperson’s license. The curriculum is sponsored by the  
Department of Real Estate of the State of California, the California  
Association of Realtors, and the San Francisco Board of Realtors.

Entry positions open to graduates who pass the California State  
examination for a salesperson’s or broker’s license include those of  
sales agent, junior appraiser, rental agent, or property manager for a  
bank or land-development company; or in the property department  
of a corporation, a savings-and-loan company, or an insurance com-
pany. Graduates may also search titles and close transactions in the  
escrow departments of any of these establishments or for escrow  
companies.

Students interested in obtaining a real estate salesperson’s or a bro-
er’s license may obtain information by telephoning the San  
Francisco office of the State of California Department of Real  
Estate at 557-2136.
The course of study includes instruction in the following: principles of real estate, real estate practice, real estate economics and investments, legal aspects of real estate, principles of real estate appraisal, and principles of real estate finance.

Students who complete the Curriculum in Real Estate with an average final grade of C plus (2.50 grade-point average) or higher receive the degree of Associate in Science and the California Real Estate Certificate.

**Credit Certificate Curriculum**

The California Real Estate Certificate is currently awarded by 90 community colleges in California. City College of San Francisco participates in this Statewide program and awards the California Real Estate Certificate to any day or evening student who completes a prescribed program of 24-semester units.

A student may complete only those courses required for the California Real Estate Certificate, since this is awarded independently of the Associate in Science degree. However, students who complete the full course of study leading to that degree will automatically have completed the requirements for, and will be awarded, the California Real Estate Certificate.

Training for the Certificate is designed so that those seeking entry employment may prepare themselves to take the State licensing examination for real estate salespersons, and so that those already employed in various branches of real estate work may gain further knowledge and develop additional competence.

Travel and Tourism

Degree Curriculum

The curriculum in Travel and Tourism offers two different Certificate of Completion, as well as a two-year course of study with special emphasis in either Marketing, Management, or Destination Development. The specific course of study that the student will follow is an integral part of the course content of the Principal of Travel and Tourism classes. Upon completion of TRTV 157 and TRTV 159, the student will know if they will pursue their Travel and Tourism Degree in marketing, management, or in destination development.

The Travel and Tourism program prepares students for jobs with the airlines as reservation agents, marketing representatives, customer service personnel to name just a few of the jobs, the same kinds of jobs with hotels, tour companies, cruise lines, consulates and tourist information offices and with travel agencies (corporate, leisure, special interest, group or meeting and planning agencies). The curriculum in Travel and Tourism provides practical training in the specific vocabulary used in the industry, the reference books used in all sectors, how to read and design tour and cruise brochures, common business practices, airline computer operations and formats, airfare constructions, group sales pricing, special interest tour development. The Destination classes are designed to advise the student of all there is to know about travel in a specific region of the world. Students learn about visa requirements, how to get there, competitive airfares to the destination, which tour companies sell the destination, languages, religion, what to see, what to do. Completion of the two-year degree will give students a necessary foundation in computer skills, communication skills as in learning to qualify the client, written and spoken English, psychology, anthropology, marketing skills, management styles, and specific tourist destinations in the world.

Introduction. The CAHMP offers three degree programs that prepare students for employment in a wide range of careers in the hospitality industry: Culinary Arts; Food Service Management; and Hotel Management. Each program is a two year, four semester, course of study where students earn an Associate in Science degree
and an Award of Achievement. All programs include management related course in their respective fields. Upon graduation, students may also apply for a Certificate of Completion from the Accrediting Commission of the American Culinary Federation.

Course of Study. All three CAHMP programs are two year, four semester courses of study. All degree program students must take a core group of courses. Students choosing the Food Service Management or the Culinary Arts Program must take sequential laboratory courses in food preparation and service, CAHS 10 or CAHS 10Q, CAHS 20 and CAHS 30. These courses are taught in the department’s four kitchens, bake shop, snack bar, cafeteria, and fine dining restaurant. These programs include extensive hands-on training in the department’s facilities. The Hotel Management program includes laboratory course in Front Office Operations and lecture classes specific to the rooms division of a hotel, only. All students must complete an unpaid industry internship for which they earn class credit (CAHS 40W). Students secure these internships with the assistance of the Program Advisor. Students should confer with the Program Advisor as to the specific classes necessary to complete their program and the order in which courses should be taken. All lecture classes are open to the general public, on an available basis. Laboratory classes (CAHS 10, CAHS 10Q, CAHS 20, CAHS 30, CAHS 40W) are restricted.

History. Established in 1936, the Culinary Arts and Hospitality Management Programs was the first community college program in the United States offering training in hospitality subjects. Over 4,000 hospitality professionals have graduated from the program. The industry supported Hotel and Restaurant Foundation, located in our facility, funds scholarships for CAHMP students, equipment for the department and books and supplies for our Alice Statler Library, the largest hospitality library in the western United States.

Employment. CAHMP graduates find employment in many facets of the hospitality industry including hotels, restaurants, clubs, cafeterias, cruise ships, retirement communities, catering companies, educational institutions and as purveyors, to name just a few. The jobs that students receive immediately upon graduating vary greatly, depending upon their career goals and practical experiences. Graduates may accept positions such as: line cook, pastry cook, baker, host, food servers, hotel reservationists, desk clerks, cashiers and night auditors; to entry level management positions, such as: sous chef, assistant restaurant managers, hotel reservations manager, assistant front office manager, and purchasing agent. Graduates progress in their careers to such positions as: Executive Chef, Restaurant and Hotel General Manager, Executive Pastry Chef, Concierge, Restaurant Owner, Food and Beverage Director, Garde Manger Chef, Sales Manager, Bakery Owner, Catering Director, Food Service Director, Sous Chef, Country Club Manager, Certified Public Accountant, Hotel Director of Sales and Marketing, Director of Banquets, Food Service Distributor, Consulting Firm President, Food Writer and Food Stylist, to name only a few.

Costs. In addition to tuition, fees, books, and other such college expenses, students in Food Service Management and Culinary Arts programs will need to purchase uniforms and kitchen tools at an approximate cost of $350.

Admission. Applicants to the Culinary Arts and Hospitality Management Programs must complete the Department’s application form, which may be obtained at the CAHMP office located at Statler Wing, Room 156, by calling the office at (415) 239-3152, or by printing the application from our website: www.ccsf.edu/cahs. Completed applications must be submitted by the second Monday in November for the following spring semester and by the second Monday in April for the following fall semester (unless these dates are displaced by a holiday). Applicants should call (415) 239-3152 for the exact deadline dates for each semester. Applicants whose primary language is not English must have completed ESL 140 or 62 or 68, or be eligible to enter ESL 150 or 72, or higher, based on the CCSF ESL placement test. Prior to being admitted to Culinary Arts and Hospitality Management Programs, applicants must complete the procedure for admission to the college.

Probation. Probation occurs when a student fails to maintain a 2.00 cumulative grade point average. Students are removed from probation when their cumulative grade point average is increased to a minimum of 2.50.

Disqualification. Students may be disqualified from the Program for any of the following reasons:
1. Receiving a final grade of “F” in CAHS 10 or CAHS 10Q.
2. Remaining on probation for two consecutive semesters.
3. Receiving a final grade of “D” or “F” in a laboratory class being repeated, because of receiving an initial grade of “D” or “F”.
4. For reasons described in various sections of this catalog.

Students receiving a final grade of “D” or “F” in any of the consecutive laboratory series class (CAHS 10, CAHS 10Q, CAHS 20, CAHS 30) must confer with the Program Advisor and repeat those classes before progressing to the next class in the sequence.

Announcement of Curricula

Engineering and industrial practice in the United States is based to a considerable extent on the team concept. Engineers, scientists, experts in management and production, and others coordinate their work with that of technicians, craftsmen, and workers with varying degrees of skill in order to complete particular projects. To meet the varying needs of students and industry, the Engineering and Technology Department at City College of San Francisco offers an Engineering Program along with a series of Engineering Technology programs to train technicians. The programs are designed so that students may satisfy the requirements for graduation from the College and receive a degree of Associate in Science and an Award of Achievement. In addition, The Engineering Technology programs provide a good foundation for transfer to a bachelor degree program in engineering technology or industrial technology.

Courses in the Engineering Department are identified according to the following headings: Computer Aided Drafting (CAD), Electronics (ELEC), Engineering (ENGN), Engineering Technology (ET), and Welding (WELD).

Engineering Program

General Information

Engineers develop the skill to design functional products and systems based upon a foundation formed from engineering, physical science, and mathematics course work. They pursue rewarding careers in a professional environment with good employment and advancement opportunities.

City College of San Francisco offers courses leading to the Associate of Science Degree and Major in Engineering. Graduates generally transfer to four-year institutions as juniors where they can major in computer, electrical, electronics, mechanical, civil, industrial, chemical, manufacturing or other engineering. Others seek employment as an engineering assistant.

The degree program is based upon the recommendation of the Engineering Liaison Committee which represents the University of California, California State Universities, private universities, and community college engineering schools and departments.

Prerequisites. Beginning courses in engineering require one-year high school courses in algebra, geometry, advanced algebra, chemistry, physics, and mechanical drawing and a half-year course in trigonometry. The equivalents to these courses may be taken at City College.

* It is recommended that you complete ENGL 1A if you plan to transfer to a four-year school.
‡ Consult the catalog for specific requirements and courses available to satisfy the graduation requirements for the Associate of Science Degree. So as not to duplicate course work, it is recommended that you try to satisfy the requirements of the transfer institution as well as those of City College.
† If you wish to substitute another class because of specific requirements of the transfer institution you will attend, consult with the Engineering Department Advisor.
NOTE: Four-year universities may have additional course requirements for completion of lower division. Consult the Transfer Center and the Engineering Advisor for additional information. Other technical courses that transfer in engineering include CHEM 101B; ENGN 1A, 24, 36, 37, 45; MATH 115, 120, 130; PHYC 4D and 4DL.

Engineering Technology Program

General Information

In the Engineering Technology Programs, City College trains students for employment as engineering technicians - persons who work with or under the directions of engineers and perform duties requiring a combination of the theoretical knowledge of an engineer and some of the skills of a craftsman.

The College offers two-year curricula in engineering technology in two fields: Electronics Engineering Technology and Mechanical Engineering Technology. The curricula in these fields comprise the Engineering Technology Programs. Students should be aware that any change in major, such as a change from one technical curriculum to another or from one program to another, requires additional time for the completion of their revised educational objectives.

Prerequisites. High school prerequisites are one-year courses in elementary and advanced algebra, geometry, trigonometry, machi-
Students should possess a minimum level of competency in English communication skills. The completion of English as a Second Language 79 is recommended.

**Broad Preparation for Employment.** Because emphasis in the Program is on both fundamental engineering theory and basic industrial practices, graduates may qualify for employment in many fields: CAD operator, production planning and control, manufacturing, testing, inspection, sales, installation, maintenance, or servicing.

Each curriculum in engineering technology includes courses in subjects common to all branches of engineering. In general, these subjects include the following: graphics, mathematics, orientation to engineering, and physics. Through this related study, students obtain a better understanding of the work in their majors and develop a broad technical background.

**General Education.** The curricula also include instruction in general education so that students may satisfy the College graduation requirements in this area.

**Associate in Science Degree and Major.** The Engineering Technology Program is designed so that students may satisfy the requirements for graduation from the College. Students who satisfy these requirements and complete any of the curricula with final grades of C or higher in their major technical courses also receive the Associate in Science degree in Electronic Engineering Technology or Mechanical Engineering Technology. The Major may be considered a recommendation by the faculty of the Engineering and Technology Department which, in conjunction with the Career Development and Placement Center, will aid the graduate in finding a position.

**Transfer to Other Colleges and Universities.** Students in the Engineering Technology Programs may either enter industry upon graduation or transfer to a four-year institution to earn a bachelor’s degree in engineering technology. Several campuses of the California State University such as the Sacramento, Long Beach, and Pomona campuses, as well as private institutions, such as DeVry University, offer graduates this opportunity. Engineering Technology students may also choose to transfer to a bachelor degree program in industrial technology offered at several campuses of the California State University, such as the San Francisco, San Jose, and Chico campuses. The time required for completion of curriculum to graduates at these schools is normally two additional years. Students who intend to transfer should consult their advisers and the section in this catalog entitled “Transfer Information.”

**Common Core.** All students in Engineering Technology initially enroll in the following common core courses:

Graphic Communications

Announcement of Curricula

General Information
The Graphic Communications Department provides instruction in graphic design for print and new media, industrial design, digital and traditional print production. Successful completion of this program prepares students for entry-level employment or transfer to a four year institution for further study. The program consists of degree curricula in graphic design or print production, credit certificate curricula in production art, prepress, digital printing and press and finishing, and a noncredit certificated program with an emphasis on offset printing technology. These programs are described on the following pages. Enrollment in the various program areas is open to all interested students.

Industrial Design. The Graphic Communications Department offers a concentration in Industrial Design, combining course work in the Graphic Communications and Art Departments. The courses are accepted for credit by four-year institutions offering degree programs in Industrial Design. The program emphasis is on consumer product design, with development of skills related to materials selection, computer plan drawing, manipulation and fabrication techniques, and the history and evolution of the profession through slide presentations, lectures, and field trips. Prospective students should meet with an advisor for more information on program specifics and articulation with four-year schools.
Degree Curriculum

Associate in Arts Degree in Graphic Design. We are living in an information society—surrounded by an ever increasing number of words, pictures and sounds. The role of the graphic designer is to form this information in a meaningful way, visualizing and communicating ideas in the most effective manner possible.

The Graphic Design emphasis was created to provide students with a strong foundation in the fundamental aspects of the designer’s art. Students develop creativity and ideation skills, learn the elements of communication design and then apply this knowledge to a wide range of design problems. Communication in all forms—visual, verbal and written—is stressed. The program has a unique, hands-on approach, integrating conceptual design studies with traditional and digital tools and production methods. In the fourth semester, students have the opportunity to further develop their skills through an in-house internship program that provides quality communications pieces to the campus community. An elective work experience course allows students to broaden their design vocabulary through supervised work in local design firms.

This course of study is designed so that students may satisfy the requirements for graduation from the College. Students are encouraged to meet with a program advisor to discuss program planning and articulation agreements for continued study.

Print Production

Degree Curriculum

Associate in Science Degree in Print Production. Print Production is a dynamic and rapidly-evolving industry, thanks to the integration of digital workflow in print manufacturing. Students seeking a degree in print production will learn both traditional and digital skills so they will be versed in the concepts and processes of the print manufacturing as it exists today. Each area of production has basic concepts introduced using traditional production methods, followed by advanced study using digital tools. All classes are taught with industry standards as guide. Advanced students have the opportunity to develop their skills in an in-house internship program that provides quality print pieces to the campus community. An elective work experience course allows students to broaden their production knowledge through supervised work in local printing firms.

Students successfully completing the program are qualified for entry-level employment in service bureaus, prepress houses, small and large printing companies, bindery shops, and other allied businesses.

This course of study is designed so that students may satisfy the major requirements for graduation from the College. Prospective students are encouraged to meet with a program advisor to discuss program planning and articulation agreements for continued study.

**Health Information Technology**

**General Information**

The Health Information Technology Program provides students with the knowledge and skills necessary to collect, store, process, retrieve, analyze, disseminate, maintain and communicate information related to research, planning, provision, financing, and evaluation of health care services. A career as a health information professional offers a unique opportunity to be a member of the health care team and combine an interest in health information, business, and computer information systems.

The U.S. Bureau of Labor predicts a 46% shortage of credentialed Health Information professionals by the year 2010 (>90, 000 jobs). Increasing legislation and computerization of health information allows more career opportunities for trained health information technicians. Projected to be one of the most fastest growing occupations. For more information call 561-1900.

**Accreditation.** This program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) in cooperation with the Council on Accreditation (COA) of the American Health Information Management Association (AHIMA). Graduates of the Associate Degree in Health Information Technology program are eligible to write the national qualifying
examination for certification as a Registered Health Information Technician (RHIT).

Degree Curricula

Upon completion of the two-year curriculum in Health Information Technology, graduates are qualified to perform a variety of specialized functions in medical/health information departments. Employment opportunities are available in acute care, clinic, ambulatory, long-term rehabilitation, and State and Federal health agencies; professional review organizations, insurance companies, educational settings, consulting firms, and mental health/chemical dependency facilities. Competencies include the review of medical/health records for completeness and accuracy, coding of diseases and operations using proper nomenclature and classification systems, compilation of statistical information, release of information from the medical/health record, participation in medical care evaluation studies, assistance to medical staff and the preparation of special studies, reports, and the supervision of the day-to-day operation of a medical/health information departments of a health care facility.

Admission. Enrollment is open to all interested students who fulfill the following admission requirements:

1. Eligible for credit classes (See admission requirements.)
2. Strongly recommended for success in the HIT program:
   - Eligible for ENGL 92 or ESL 82 or more advanced.
   - Attend a HIT orientation session. Allows students a chance to ask questions about requirements and structure of the program.
   - Certain programs have prerequisites that must be met prior to enrollment in individual classes.

Credit by Examination. Refer to College Catalog

Award of Achievement. Students who complete the curriculum with an average final grade of C (2.00 grade point average) or higher in technical courses will receive the Award of Achievement in Health Information Technology.

Associate of Science Degree in Health Information Technology. Upon completion of the academic program in Health Information Technology, the College will grant an Associate of Science degree and an Award of Achievement in Health Information Technology. The graduate is then eligible to write the national certification exam approved by the American Health Information Management Association. Upon passing this examination, the candidate earns the credential of a Registered Health Information Technician (RHIT). Students who already possess an associate, bachelor’s degree, or higher in a discipline must apply for an Associate of Science degree and Award of Achievement in Health Information Technology.

Course of Study. Each option, in addition to an emphasis in the major field, includes training in the following subjects common to all branches of Health Information Technology: health information data collection and processing, retention and retrieval, coding according to ICD-9-CM and CPT coding guidelines, legal aspects, quality assurance, and personnel supervision. Supervised professional practice in the third and fourth semesters gives students practical clinical experience in medical record departments in various health care facilities.

Basis for Disqualification. Students who receive a final grade lower than C in any Health Information Technology course will be disqualified from continuing in the program. Students will be permitted to repeat a course only once and must achieve a grade of C at all evaluation periods. Students may also be disqualified for other reasons consistent with College policy.

**Sexual Health Educator**

The curriculum for the Sexual Health Educator Certificate will train students as paraprofessionals in safe and healthy sexuality including violence prevention and intervention, HIV/STD prevention, and the promotion of mature intimate relationships.

The integrated program offers students an opportunity to identify various markers of sexual health, which will enable them to promote healthy and safer sexual relationships in their client populations. They will be able to teach others to negotiate sexual situations with more confidence, knowing their limits, recognizing danger zones, assessing risk factors, and respecting their own and their partners’ needs.

Through academic preparation, practical skills training, and service to the CCSF community, certificate candidates will learn how to a) provide accurate timely information; b) apply behavior change theory to real-life situations; c) create and provide sexual health education events (interactive presentations; health fairs; guest lectures and video screenings; publicity campaigns); d) provide general sexual health advice that is sensitive to diverse cultures and sexual orientations; e) make appropriate agency referrals. Students will also learn to recognize and address cofactors which increase the risk of AIDS/HIV infection such as alcohol and drug use, sexual abuse and assault, low self-esteem and poor communication skills. Finally, students will identify and address signs to look for in an abusive personality, strategies for leaving an abusive relationship, and rape prevention techniques as well as characteristics of a healthy, mature, non-violent intimate relationship.

**Requirements for the Certificate of Completion.** The certificate requires completion of 15 units, which can be completed in two semesters. Each course must be completed with a final grade of C or higher or Credit.

**Credit toward Graduation.** Credit earned to obtain the Certificate of Completion satisfies the G2 and H2 graduation requirements, and coursework is transferable to the California State University.

**Credit toward Community Health Worker Certificate.** Three of the courses required for the Sexual Health Educator Certificate meet the elective requirement for the CHW program.

Journalism

Announcement of Curricula

General Information

The Journalism Program prepares students for a two year degree, transfer to a four year program, or professional development in select areas of study. All journalism classes are credit classes and are offered on the Ocean Avenue Campus. Enrollment in the various program areas is open to all interested students. Prospective students are encouraged to meet with a program adviser to discuss program specifics and articulation agreements.

Degree Curriculum

City College offers a degree in Journalism that gives students the research, writing, and production skills that are essential to a career in journalism. Current technology, from on-line research to electronic pagination, will be taught during the first two semesters. Third and fourth semester students use these skills to write, design, and edit the Guardsman. They cover a beat within the larger college community, learning the art and applying the crafts of journalism.

Award of Achievement. The degree curriculum in Journalism is designed so that students can satisfy the requirements for graduation from the College. Students who satisfy general education requirements and complete the major courses with final grades of C or higher receive an Associate Degree. Students receive an Award of Achievement in Journalism when they complete the required program of study with final grades of B or higher.

Certificate Curricula

City College offers two certificate programs in Journalism, On-line Research Techniques and Editorial Management and Design. A student will receive a certificate of completion after finishing the course of study with grades of C or higher in all courses. The Certificate programs are designed for working journalists interested in upgrading skills, students returning to school in search of new career opportunities, or currently enrolled students in the program. A student may receive a certificate while still working on a degree.

**Nursing, Registered**

**Announcement of Curricula**

**Degree Curriculum**

The Associate in Science curriculum in Nursing is accredited by the California Board of Registered Nursing (BRN). Students who complete the course of study in accordance with City College requirements are eligible to take the National Council Licensure Examination of Registered Nurses (NCLEX-RN). Those who pass the NCLEX-RN are qualified for entry-level positions of R.N. in health facilities and agencies.

NOTE: The licensing process for becoming a registered nurse in California is under the jurisdiction of the BRN. The BRN requires disclosure of all misdemeanor and felony convictions for all license applicants and disclosure of all disciplinary actions taken against a license applicant who already has a practical nurse, vocational nurse or other professional license. Fingerprinting is also required.

**Course of Study.** The Nursing course of study includes instruction in applied nursing science and related life sciences, and clinical experience in San Francisco Bay Area cooperating clinical settings. The required course of study for Nursing includes courses that may also satisfy certain general education requirements.

**Associate in Science Degree.** The Nursing curriculum, supplemented by general education courses, is designed so that students may satisfy the requirements for graduation from City College with the degree of Associate in Science. It is required that all students who wish to enroll in the Nursing Program take the CCSF placement tests before enrolling.
Enrollment. Enrollment in the Nursing Program follows the City College policy of equal educational opportunity. Because of facility and staffing limitations, as well as health and safety requirements, not all students who wish to enroll in the Nursing Program can be accommodated. Selection from among students who are eligible to enroll is made each semester for the following program cycle.

Requests for information regarding enrollment should be addressed to:
Enrollment Committee
Nursing Department
City College of San Francisco
50 Phelan Avenue
San Francisco, CA 94112

Dates for Filing Required Enrollment Forms. For the fall semester, enrollment forms must be received by the Nursing Department no later than February 20 and for the spring semester, no later than September 20. If either date falls on a weekend or a holiday, the receipt date is moved to the next calendar day.

Expenses. Students should expect to incur expenses of approximately $2500 covering the two years of nursing curriculum. This does not include expenses that may relate to non-nursing classes. The expenses related to nursing classes include the cost of required books, uniforms, and individual equipment.

Enrollment to the Program. Because of facilities and staff limitations, 50 new students may be enrolled in the Nursing Program each semester. For further information call the (academic adjustments and auxiliary aides) are arranged when accessible to students with disabilities. It is the intent of the District that such individuals be served by regular classes and programs whenever possible. To that end, students with disabilities shall be admitted to courses and programs and matriculate through such courses and programs on an equal basis with all other students. To ensure equality of access for students with disabilities, academic accommodations and auxiliary aids shall be provided to the extent necessary to comply with state and federal law and regulations. The District will maintain specific criteria and procedures to implement the policy.

Waiver Policy
There may be extenuating and unusual circumstances when the nature of the disability is such that a course substitution is not a recommended or realistic option. - All graduation requirements must have been met satisfactorily with the exception of the subject for which a waiver is being petitioned.

### Petitions for Waiving Regulations

A student may petition the Dean of Student Affairs, Conlan Hall, Room 201, to waive a local college regulation.

### Privacy of and Access to Student Records

City College of San Francisco protects the privacy of student records and maintains the right of students to inspect and review their records. City College has established guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Should the College be unable to resolve the complaint of a student concerning the accuracy or clarity of the student’s records, the student has the right to file a complaint with The Family Educational Rights and Privacy Act Office of the U.S. Department of Education.

### Privacy of Student Records

The California community college student has a legal right to privacy of records. A student record is defined as “any item of information directly related to an identifiable student...which is maintained by a community college....” However, applicable law provides for certain exceptions. Appropriate District employees are authorized to collect only that information which is relevant to a student’s admission, registration, academic history, career, student benefits and services, extracurricular activities, counseling and guidance, discipline or matters related to student conduct.

In addition to restrictions on the collection of information about students, there are significant restrictions on the release of student information. Except under limited circumstances, District employees do not have the authority to release student records except to the student. In general, District employees should consider information they acquire about students, in their capacity as employees, to be confidential information.

In any area where records are filed, we maintain a student record log to record who asked for and received student information in accordance with applicable law. In each area, a dean or his/her designee is responsible for maintaining the student record log. A student record log is maintained in the following areas:

### Kind of Record - Log Maintained By

- Admissions and Records - Dean of Admissions and Records
- Counseling Records - Dean of Counseling
- Disabled Student Records - Dean of the School of Behavioral and Social Sciences
- Financial Aid Information - Dean of Financial Aid
- Student Discipline, Complaints, Appeals - Associate Dean of

### Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day City College receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The City College official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the City College official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate. Students may ask City College to amend a record that they believe is inaccurate. They should write the City College official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate. If City College decides not to amend the record as requested by the student, the College will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by City College in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Upon request, City College discloses education records without consent to officials of another school in which a student seeks or intends to enroll. Other than the foregoing, the college will make a reasonable attempt to notify the student of a record request.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the Community
College to comply with the requirement of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-4605

The following categories of information about students are considered “directory information” pursuant to section 76240 of the Education Code: student’s name, address, telephone number, date and place of birth, field of study, participation in activities and sports officially recognized by the San Francisco Community College District, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous public or private school attended by the student. The District may limit or deny the release of specific categories of directory information based upon a determination of the best interest of students. Directory information may be released at the discretion of the College to persons or agencies which the College deems to have legitimate reason for access to the information. To prevent disclosure, written notification must be delivered personally to the Office of Admissions and Records.

Information other than directory information will not be released without the student’s written consent unless the College is required to do so by law as, for example, in the case of a court order. Questions about policies and procedures concerning privacy of records and rights of access to them may be referred to the Dean of Admissions and Records.

Electronic Communication Privacy Statement

The college expects electronic communication privacy protections comparable to those traditionally given to paper mail and telephone communication.

Persons who have questions about the collection or dissemination of student information may call the Dean of Admissions & Records at 239-3291 or the Dean responsible for maintaining the information.

Regulations Governing Student and Other Organizations or Persons Desiring to Conduct Noninstructional Activities on Campus

Under State law and local regulations, the Administrative Staff of City College of San Francisco is responsible to the Governing Board and the Chancellor of the San Francisco Community College District for the organization, operation, and supervision of a sound educational program designed to provide transfer, general, and occupational education; essential student personnel services; and extracurricular activities. To discharge this responsibility, the Administrative Staff is required under the California State Education Code and the regulations of the Board of Governors of the California Community Colleges and the Governing Board of the San Francisco Community College District to take all steps necessary to prevent the conduct on campus of any activity that interferes with instruction or is otherwise inimical to the welfare of the student body or of individual students.

City College has therefore established various regulations, including those governing the following: student activities and government; noninstructional student meetings held on campus; guest speakers at such meetings; the use of City College facilities by student or other organizations or movements; and the distribution, posting, or other use of bulletins, circulars, and publications of any kind on campus. These regulations, like all others in effect at City College, have been established in conformance with the responsibilities assigned to and under the authority vested in the Administrative Staff under State law and College District regulations.

2. The guidelines are reviewed by the Chancellor of City College in order to ensure conformance with State codes and local policies and regulations.
3. Upon approval by the Chancellor, the guidelines are submitted to the Governing Board of the College, with a request for approval. The guidelines become effective upon approval by this agency.

Part B. Procedure for Revision

The policies, regulations, and procedures stated in the following pages were established in accordance with the procedure described above, and may be revised only in accordance with that procedure or to meet legal requirements.

Part C. Definition of the Term “Student”

The term student, as used in connection with the foregoing College policies, regulations, and procedures is defined as follows: a person officially registered in at least one course at City College of San Francisco.

Section II. Students and Student Organizations

Part A. Student Government

1. Student Government
   Under State law and the Governing Board policy, the Chancellor of City College may authorize the establishment and continuance of the Associated Students, approve its membership fees, and delegate to it, as set forth in the Education Code and in the Constitution of the Associated Students, the specified fiscal and legislative powers and responsibilities concerning the affairs of its membership.

2. Fiscal Policy of the Associated Students
   The Chancellor of City College is responsible for the fiscal soundness of the Associated Students of City College of San Francisco. It is his/her responsibility to ensure that the financial operation of the Associated Students is in accordance with the provisions of the laws of the State of California and the policies of the Governing Board of the College.

Part B. Student Organizations

1. Registration of Student Organizations
   An organization not prohibited by law may become a regis-
2. Policy Regarding Discrimination in Choice of Members
   Membership regulations of student organizations must specify that eligibility for membership shall not be determined through discrimination based on race, age, physical disability, sexual orientation, creed, color, or sex. Questions of discrimination on these and other bases shall be reviewed by the Associate Dean, Student Activities. The Dean’s decision may be appealed to the Associate Dean of Student Advocacy, Rights and Advocacy.

3. Sponsors of Registered Student Organizations
   The Chancellor of City College may appoint sponsors for and establish regulations concerning sponsorship of registered student organizations.

4. Standards of Conduct and Discipline
   Student organizations are required to comply with College policies, regulations, and procedures. Members of these organizations are subject to disciplinary action for violation of such policies, regulations, or procedures.

5. Use of the Name of City College of San Francisco
   Only a duly registered on-campus student organization may use the name of City College of San Francisco as a part of its own name. A student organization may advocate its own views and positions, but at no time shall an organization or a coalition of student organizations purport to represent the entire student body of City College of San Francisco.

6. Use of College Facilities by Student Organizations
   College facilities may be used by registered student organizations for meetings, social functions, raising funds, recruiting participants, and posting and distributing literature only in accordance with State law, Governing Board policy, and College rules, regulations, and procedures. Requests for use of facilities shall be made to the Associate Dean, Student Activities, sufficiently in advance to permit proper planning for the proposed use.

7. Collection of Fees
   Registered student organizations, in accordance with State law, Governing Board policies, and College rules, regulations and procedures may collect dues and initiation fees, conduct sales, and charge admission fees to certain student activities. Funds collected through these activities are subject to financial accountability as specified in the Guidelines for the Management of A.S. Funds. Raising of funds for charitable organizations shall be in accordance with established policies of the Governing Board.

**Part C. Free Speech and Advocacy**

1. Statement of Policy
   The Constitution of the United States guarantees freedom of assembly or association. However, this guarantee does not prohibit a governing board or a college administration from adopting reasonable regulations governing the exercise of these rights on a college campus. The right of freedom of speech, for example, is not paramount to the right of privacy. Guidelines governing the exercise of free speech on the City College campus are developed, therefore, in order to ensure that other equally important legal rights are protected as stipulated in State law and local regulations.

2. Regulations Governing Free Speech
   In order to facilitate the equitable application of the principles of free speech on campus, City College has established the guidelines enumerated in Part D as the means of ensuring orderly conduct, noninterference with College functions or activities, identification of sponsoring groups or persons, and protection of persons against practices that would make them involuntary audiences on campus for another person’s exercise of free speech. Whenever the Chancellor of City College considers it appropriate, he/she may require that either one or both of the following conditions be observed in connection with a campus meeting addressed by speakers: (1) that the chairperson of the meeting be a person approved by the Chancellor; and (2) that the speaker be required to answer questions asked by the audience. It shall be the responsibility of the Chancellor to allow opportunity for the expression of a variety of viewpoint.

3. Regulations Governing Guest Speakers
   a. Request Procedures:
      The chairperson or president of a registered on-campus organization requesting facilities for an off-campus speaker should sign up with the Associate Dean, Student Activities, for the time and place desired (see Rule 5 and Part D).
   b. Review of Request for a Speaker:
      If a decision on a request for an off-campus speaker is to be reviewed, the Associate Dean, Student Activities, and/or the on-campus organization making the request (represented by the student chairperson and the faculty sponsor) may refer the matter to Associate Dean of Student Affairs for his/her specific recommendation to the Chancellor.
   c. Sponsorship:
      Sponsors of student organizations are required to review all requests for off-campus speakers in advance, and students are required to present to the Associate Dean, Student Activities, a form signed by their sponsor when requesting a time and a place for an off-campus speaker’s address. Every sponsor of a campus organization is expected to make arrangements for a guest speaker’s appearance before his/her group on campus, and should be present during the address. A substitute should be appointed if the sponsor cannot be present.

4. Regulations Governing the Scheduled Use of the Free-Speech Area
   The following guidelines are established to facilitate the equitable use of the City College free-speech area by all students:
   a. Only registered students (not substitutes) who have signed up in advance for use of the free-speech area are permitted to use the area.
   b. A sign-up list governing use of the area for at least two weeks in advance must be maintained in the Office of the Associate Dean, Student Activities, in order to permit proper scheduling.
   c. Students wishing to use the area for impromptu speeches or presentations must sign up for a single half-hour period at a time, and must use that period before signing up for another one. If more flexible scheduling permits, however, the Associate Dean, Student...
Activities, at his/her discretion, may allow a student to sign up for more time on the two-week master calendar.

d. For a special event, such as an address by a sponsored off-campus speaker or an organized, planned debate, more than the half-hour period may be made available for use of the free-speech area. Chairpersons of on-campus organizations should sign up for such special events at least three College days in advance, but a week’s notice is recommended.

e. Students desiring to use the free-speech area for impromptu use or special events must
   i. sign up for the time period available, and
   ii. indicate the general topic to be discussed or entertainment activity to be scheduled.

f. If the schedule governing the use of the free-speech area cannot be followed, the following rules will apply:
   i. If a student does not arrive at the area for a scheduled appearance, another student may be permitted to sign up for the time not being used. In such instances, however, at least ten minutes must be allowed for the scheduled event to take place before anyone may sign up for the unexpired time.
   ii. A scheduled activity must be allowed to continue at the free-speech area until the next scheduled event, at which time the podium must be vacated promptly.
   iii. If time becomes available during the day because of cancellation of a scheduled event, a student scheduled for another time may be permitted to sign up for the area in addition to his scheduled activity, but may not deliver his initially scheduled address until the time originally scheduled.

g. A speaker scheduled to use the free-speech area should permit another student or students to speak in reply to his/her remarks while he/she is using the area, without the others signing up in advance as scheduled speakers. However, this provision does not apply to students denied the right to use the area because of prior disciplinary action by the administration (see Section 4 above).

h. If verification is needed to demonstrate priority for use of the free-speech area, the Associate Dean, Student Activities, will issue special scheduled cards to verify student sign-ups for particular periods and dates.

i. If necessary, and then only if a serious disturbance arises at the free-speech area, campus police or other persons delegated by the administration are authorized to ask for the identity of persons claiming the right to use the area.

j. For rules for the distribution of literature, commercial free speech rights, the manner of collecting funds on the City College campus, or for additional information, contact the Office of the Associate Dean, Student Activities.

5. Use of Bulletin Boards and Distribution of Materials on Campus

   Individual students or authorized student organizations desiring to distribute or post bulletins, circulars, or publications on the City College of San Francisco campus must obtain permission from the Associate Dean, Student Activities. Materials originating from sources outside City College must bear the official approval of the Associate Dean, Student Activities. College bulletin boards and tackboards may not be used for commercial purposes.

6. Violation of Regulations

   Students who violate the preceding regulations regarding student governance and the use of bulletin boards and distribution of materials on campus will be subject to disciplinary action.

7. Observance of Regulations

   Program officially registered students desiring to take part in an activity of the Associated Students of City College of San Francisco or of any other organization sponsored by City College may do so only in conformance with the rules and regulations of the Associated Students, the particular organization, and the College.

Part D. Use of College Facilities

Under the California Education Code sections 82537 to 82548 and the Administrative Regulations of the San Francisco Community College District, organizations or persons not directly connected with the City College of San Francisco may use campus facilities only under certain limited conditions, and must make application for such use through the Office of Facilities and Planning of the San Francisco Community College District. Under the preceding law and regulation, ad hoc student groups are subject to the policy governing organizations and groups not directly connected with City College.

Regulations/Guidelines Governing Solicitation/Recruitment at CCSF

The following guidelines are established to grant permission to off-campus organizations and individuals to table, distribute literature and post flyers.

1. The recruiter or solicitor must report to the Student Activities office to fill out an Area Request Form for tabling and/or distribution of literature. This form must be filled out at least 5 working days in advance and not more than 20 working days in advance of the requested activity. Requests that vary from this scheduling pattern will be approved by the Student Activities Associate Dean on a case-by-case basis or on a space available basis. During the activity, a copy of this form must be in the possession of the recruiter or solicitor at all times.

2. The designated area for recruiters and solicitors at Ocean Avenue Campus is the RAM PLAZA area between Smith Hall and the Student Union. Assignment of the area is at the discretion of the Student Activities Dean; criteria is based on the smooth operation of the College, traffic flow, and/or special activities planned by the College. The recruiter or solicitor must remain in the area designated on the form.

3. Tables may be set up only in the approved area designated on the form. Recruiters and solicitors must bring their own signs, tables, chairs, and materials. Free gifts (other than food and drink) may be given away. Literature/newspapers and/or other items cannot be sold nor can donations be solicited.

4. Literature may also be distributed in the designated area on the form; however, recruiters and solicitors may not walk up...
to students and force them to take literature, follow students to classes or elsewhere on campus, nor obstruct the flow of traffic and/or students walking to and from buildings.

5. Recruiters and solicitors can bring 15 copies of flyers no larger than 11”x17” for approval for posting by the Student Activities Office. The Student Activities Office staff might post the flyers on the bulletin boards throughout Ocean Avenue Campus. If not, they will provide a map of the campus with the locations of the approved bulletin boards.

6. Recruiters and solicitors are expected to conduct themselves in a respectful manner toward all students and college personnel and to follow a code of conduct which prohibits the following:

- Abuse or any threat of force or violence directed toward any member of the College or to an authorized College visitor while on College property;
- Willful misconduct which results in the injury or death to a student or College personnel or injury to property belonging to a member of the College or to an authorized College visitor while on the property;
- Unauthorized entry to or use of College facilities, supplies, or equipment;
- Obstruction or disruption of classes, administration, or authorized College activities;
- Violation of College rules and regulations including those concerning the use of college facilities, or the time, place, and manner of public expression or distribution of materials;
- Disorderly or offensive conduct or expression which interferes with the College's primary educational responsibility;
- Failure to comply with the directions of College officials, staff, or campus public safety officers who are acting in performance of their duties;

There are consequences for these guidelines not being followed including being denied access to CCSF.

Recruiters who want to find out more information about participation at Career Days at CCSF call Career Development and Placement Center at 239-3117 and for Transfer Days at CCSF call Transfer Center at 239-3748.

These regulations/guidelines are specific to Ocean Avenue Campus but apply to all campuses of CCSF. Locations and forms may vary. For campuses other than Ocean, recruiters and solicitors must see the campus dean at the campus where they seek permission.

The College reserves the right to make modifications to the agreement as to when, where, and how recruiters and solicitors may table, distribute literature and/or post flyers in order to address the unanticipated conditions of the College. The College also reserves the right to change its policy on recruitment and solicitation.

**Student Rights and Responsibilities**

**Purpose and Scope.** Community and college districts are required by law to adopt standards of student conduct along with applicable penalties for violation (Education Code Section 66300). The San Francisco Community College District has complied with this requirement by adopting PM 6.11.01 and AR 6.11.01, Rules of Student Conduct. The purpose of this Board Rule is to provide uniform procedures to assure due process when a student is charged with a violation of these standards. All proceedings held in accordance with these procedures shall relate specifically to an alleged violation of the established standards of student conduct.

Students of City College of San Francisco are expected to help maintain an environment in which there is freedom to learn. The College believes that each student has an earnest purpose; that he/she will adhere to acceptable standards of personal conduct; and that students and student organizations will participate in the development of proper standards of conduct and good taste; and that they will abide by all College regulations. Students or student organizations making inappropriate use of the opportunities, rights, and privileges should expect to have them withdrawn or curtailed.

In the development of responsible student conduct, disciplinary proceedings play a role substantially secondary to example, counseling and admonition. In the exceptional circumstances when these preferred means are not appropriate or fail to produce student acceptance of responsibility commensurate with student freedom, due process shall be observed to protect the student from the unfair and arbitrary imposition of serious penalties.

When an issue of student conduct arises, the college community will take action as the particular occurrence, judged in the light of attendant circumstances, seems to require.

**Rules of Student Conduct**

Student conduct in the San Francisco Community College District must conform to District rules and regulations. The rules and regulations of student conduct prohibit the following:

4. Dishonesty, such as theft or the unlawful taking of property from the rightful owner, or knowingly furnishing false information to the District, or forgery, alteration, or misuse of District documents, records, or identification;
5. 15. Failure to comply with directions of District officials, faculty, staff or campus police officers who are acting in performance of their duties;

Procedures for implementation of these rules shall be adopted by the Chancellor or designee.

Types of Discipline

WARNING: Notice to the student that continuation or repetition of specified conduct may be cause for other disciplinary action (May be written or oral notice).

REPRIMAND: Written reprimand for violation of specified regulations or misconduct. A reprimand places on record that a student has violated college regulations. A student receiving a reprimand is notified that continued violations may result in formal disciplinary action.

RESTITUTION: Reimbursement by the student for damage to or misappropriation of property. Reimbursement may take the form of appropriate service by the student to repair property or otherwise to compensate for damage.

DISCIPLINARY PROBATION: Specific period of conditional participation in campus and academic affairs, which may involve exclusion from designated privileges or extracurricular activities. If a student violates any condition of probation, he/she shall be subject to further disciplinary action to be taken in accordance with these procedures.

REMOVAL: Should be exercised when warning or reprimand fails to bring about proper conduct. Removal may be immediate if student presents a present danger. Instructor may remove a student for cause from class for the day of the class and the next meeting for a maximum of two class meetings.

SUSPENSION: Suspension from classes for up to the remainder of the school term or from all classes and activities of the College for one or more terms. Suspension is the termination of student status for that period of time.

EXPULSION: Termination of student status, for an indefinite period, requires the approval of the Governing Board. The student may be readmitted to City College only with the specific approval of the Governing Board.

Suspension or expulsion of a student shall be accompanied by a hearing to determine if good cause warrants such suspension or expulsion. Good cause shall include, but is not limited to, conduct identified above as prohibited.

Due Process

A student has a right to due process. The Office of the Associate Dean of Student Advocacy, Rights and Responsibilities (Conlan Hall, Room 106) has the responsibility to assure the implementation of this due process.

Student Complaints

A student complaint is an allegation by a student against a faculty member that the member has harmed a student by violating a policy, rule, or regulation, or otherwise engaged in inappropriate conduct. A complaint does not include a grade or file challenge, or an allegation of discrimination or sexual harassment, or other conduct for which immediate disciplinary action or suspension could result.
Student complaints are governed by the following procedure:

**Informal Process**

1. A complaint should first be raised directly with the faculty member concerned.
2. If a direct meeting does not resolve the complaint, or if either party is unable or unwilling to meet, the complaint should be taken to the faculty member’s supervisor.
3. The supervisor may take the following action including, but not limited to:
   a. Investigating the complaint.
   b. Meeting with any party separately or facilitating a joint meeting.
   c. Recommending appropriate action to any party.
   d. Recommending an evaluation of the faculty member to the Chancellor.
   e. Redirecting the matter as appropriate.
4. If the supervisor fails to resolve the complaint within 20 semester instructional days then the student may file a formal complaint in accordance with the process set forth below. Semester instructional days include only regular business days during the Fall and Spring semesters, and not summer sessions.
5. If, after the failure of the supervisor to resolve the complaint at the informal level, the student fails to file a formal complaint within an additional 20 semester instructional days then the matter will be considered dropped unless renewed by the student within the first 20 semester instructional days of the next semester.

**Formal Process**

1. If any party is dissatisfied with the result of the informal process, that party may appeal the matter to the Dean of Student Advocacy, Rights and Responsibilities whose role is to channel the complaint to the appropriate Vice Chancellor and to the Academic Senate. If any party chooses to pursue the matter to the formal level, all parties shall be given written notice of that fact.
2. Any party who appeals a complaint to the formal level must complete a form which describes:
   a. The specific nature of the complaint and its history;
   b. All efforts which have been made to resolve the complaint;
   c. What the appealing party would consider a fair and appropriate resolution of the complaint.
3. Upon receiving a formal complaint, the appropriate Vice Chancellor and the Academic Senate shall each appoint one member to a committee whose function shall be to hear and decide the matter.
4. In reaching its decision, the committee may take any action which could have been taken pursuant to the informal process, except that the committee may not redirect the matter.
5. The findings and decision of the committee must be made in writing and provided to the student, the faculty member, and the member’s supervisor, and must encompass some or all of the following results:
   a. Resolution of the complaint to the satisfaction of all parties.
   b. Dismissal of the complaint with or without the consent of all parties.
   c. Recommendation of appropriate action to the faculty member’s supervisor.
   d. Recommending an evaluation of the faculty member to the Chancellor.
   e. Redirecting the matter as appropriate.
6. Formal complaints should be resolved as quickly as possible. Except under unusual circumstances, the written findings and decision of the committee should be provided within forty [40] semester instructional days of its receipt of the formal complaint.
7. Any student or faculty member involved in a student complaint may, by his/her own initiative, provide representation of their choice.

Notice: Student complaints may have serious consequences for the faculty member concerned. Students should recognize that differences in personality, opinion, and perception do occur, and can often be resolved by discussions between the parties. Whenever possible, students are encouraged to address such differences directly with the faculty member.

**Student Grade and File Review**

**FUNCTION AND PURVIEW**

The Student Grade and File Review Board, composed of students, faculty and administrators, reviews individual student grievances respecting course grades and file contents. After reviewing a particular grievance, the Board recommends appropriate action to the Chancellor, the instructor and the student. The Board acts as arbitrating body and does not have the power to change grades directly. Students should be aware that there is also a Grading Policy Committee that addresses general grading practices and policies at the College.

**REVIEW PROCEDURES: POLICIES, GRADES, AND FILES**

1. **Review of Policies**
   The Student Grade and File Review Board reviews and proposes revision, when necessary, of policies, regulations and procedures affecting student grade and file grievances.

2. **Review of Grades**
   If a student thinks a discrepancy exists between the grade given by an instructor and the grade he/she believes was achieved, the student should follow the steps of the appeal procedure below.
   **Important:** For midterm grades, step two of the procedure below must be completed within ten (10) calendar days after receipt of the grade; and for final grades, step two of the procedure below must be completed within forty-five (45) calendar days from the start of instruction in a student’s next regular semester of attendance (fall or spring), or no later than one year from the last day of instruction in the semester in which the grade was given.

   **Appeal Procedure:**

   **STEP 1:**
   A student wishing to appeal a grade must first discuss the issue with the instructor in an office-hour conference. If, for any rea-
4. Review of Student Files

It is expected that City College will maintain student files for the purpose of documenting academic progress as well as documenting any events that have aided or deterred academic progress. (Note: Grade and File Review petitions do not become part of a student’s file.) Such student files are confidential and information therein contained shall be released only (a) at the written request of the student or (b) in such circumstances that, in the opinion of the Associate Dean of Student Advocacy, Rights and Responsibilities, the information is needed for the safety and well-being of the student, other students and the personnel of City College or (c) when subpoenaed by a court of law.

Every student has the right to review his or her City College files. File reviews are conducted in the office in which the file is kept with the following steps:

a. The student presents a written request, signed and dated, to review his/her file(s).

b. An appointment is arranged for the student to review his/her file under the supervision of the department chair or dean or designee. No documents are to be added or removed in this review.

c. If the student believes that material contained in his or her file(s) is inappropriate or inaccurate, the student may bring the matter to the attention of the department chair or dean in charge of the file(s) and ask for a correction of the situation.

d. If the department chair or dean in charge of the file(s) is unable, for any reason, to comply with the student’s request for correction, the student may submit a typewritten request for file correction to the Associate Dean of Student Advocacy, Rights and Responsibilities. This request must explain specifically which documents are inappropriate or inaccurate, why the student considers them so, and what specific correction is requested.

e. This request will be reviewed by the Dean of Student Advocacy, Rights and Responsibilities and, if deemed appropriate, will be forwarded to the Grade and File Review Board. The Board will review the request in the same manner as petitions for grade reviews, that is, through the subcommittee process (see 3 above) and will submit a recommendation to the Chancellor.

Further information and assistance may be obtained from the Associate Dean of Student Advocacy, Rights and Responsibilities, Conlan Hall, Room 106.

318 College Rules and Regulations

CCSF Bookstores

Purchasing Textbooks, Supplies, And Equipment

In accordance with State law and local regulation, City College does not supply textbooks. The cost of these varies according to students’ programs. Students are expected to secure textbooks, laboratory books, workbooks, pens, pencils, and paper for most courses. In addition, in some courses, students are expected to provide tools, equipment, clothing, materials, or pay a special materials fee. An estimate of the cost of additional materials or fees for any class may be obtained from the appropriate department or center.

The San Francisco Community College District Bookstore Auxiliary operates several bookstores to serve the City College population. Textbooks and many supplies for City College courses may be purchased at the CCSF Bookstore serving the campus where the course is taught. Books are usually available from the first day of class.

Because of the size of the stores, services may vary from location to location. Current hours and store policies are available at each store.

Bookstore information is available on the bookstore web page at http://www.ccsf.edu/bookstore.

The schedule of classes issued each semester also contains current information about bookstore services.
San Francisco Community College Police Department

On May 5, 1980, the governing board of the San Francisco Community College District established a “Community College Police Department,” (to be known as the Department of Public Safety). Under the California Education Code, sections 72330 and 72334 and California Penal Code, section 830.32(a), personnel, when appointed and duly sworn, are designated as peace officers.

San Francisco Community College Police Department is a certified P.O.S.T. police agency and all officers are sworn and are identified by their distinctive patches and silver color stars. The Department operates 7 day a week, 24 hours per day from its main headquarters located at City College, Cloud Hall, Room 119, telephone 239-3200.

The San Francisco Community College Police Department is responsible for the overall law enforcement protection and duties for the entire San Francisco Community College District city-wide, including the Airport School located at San Francisco International Airport. Members patrol all City College campuses daily in district emergency patrol vehicles and on foot ensuring public safety for students, faculty and staff. Public Safety Department information is available on the Public Safety web page at www.ccsf.edu.

City College Student Police

The Chief of Police of San Francisco, with the approval of the San Francisco Police Commission and at the request of the Chancellor of City College of San Francisco, pursuant to section 3.535 of the City Charter, has granted the legal authority and special police powers to the City College Student Campus Police Officers necessary to control the police and traffic problems of the campus and of the public streets adjacent to City College.

City College’s student officers have special police authority granted through the San Francisco Police Department and the Chancellor of City College to perform the following duties: control pedestrian and vehicular traffic and parking; issue municipal parking citations; enforce rules and regulations for student code of conduct as stated in the City College Catalog; request personal identification, as stated in the City College Catalog, from persons on campus; make arrests when necessary for violation of the California Penal Code, Education Code, Health and Safety Code, Welfare and Institution Code, and Business and Profession Code; investigate criminal activity on campus; protect life and property; aid the San Francisco Community College Police Department with all formal investigations and arrest warrants; and make incident reports of criminal activity and coordinate all information with the San Francisco Community College Police Department (239-3200).

The following services are also provided for the campus community by the City College Student Campus Police: Lost and Found Center, fingerprint service, emergency notification, parking permit control and enforcement; vehicle lock-out aid; and first aid assistance. The Campus Police are located in Cloud Hall, Room 119, telephone 239-3200.

Smoking

Student Identification

Student identification must be carried at all times and displayed upon request by City College staff, faculty, administrators, student campus police officers, and District police officers.

Student Lockers

Lockers in the gymnasiums are assigned to students in physical-education courses. Students must remove the contents of these lockers, together with padlocks, not later than Monday during the final examination period each semester.

Lockers are also assigned to students in various laboratory courses. Students must follow the department regulations in using these lockers.

Student Parking

The campuses of City College are easily accessible by public transportation. Students are encouraged to use MUNI or BART or to use carpools.

Ocean Avenue Campus has a limited number of parking spaces available for student parking. Students are required to pay a fee for a semester parking sticker. Sales of parking stickers are available on a first-come-first-served basis before the start of each semester. Information regarding rules and regulations for student parking, including fees for semester stickers and rates for daily parking are available through the Public Safety Department in Cloud Hall, Room 119, the Student Accounting Office in Conlan Hall, Room 104, and the Class Time Schedule.

Other campuses of City College have no on-site parking or very limited parking for students. For the exact situation on a particular campus, contact Campus Information Center.

Visitors on Campus

Visitors to the campus are welcome. Vehicle parking in all parking lots is by permit only. Vehicles without a permit will be ticketed. Day School visitors may park in student lots after 10:30 a.m. with the purchase of a $1.00 permit from the vending machine. After 5:00 p.m., visitors may park in all lots (except Cloud Circle, Science Circle, Marston Rd. and “E” lot) with a purchase of a $1.00 permit from the vending machine. Information and directions are available from the Information Center located in the lobby of Conlan Hall. Visitors are required to observe College rules and regulations. A copy of the rules and regulations are available in Conlan Hall, Room 104 and Cloud Hall, Room 119 (Campus Police Office). Violation of any of these regulations are grounds for automatic revocation of the right to remain on campus. Prior permission must be obtained from the instructor before visiting classrooms. Since auditing of classes is prohibited, visits must be limited.
Academic Policies and Procedures
CREDITS AND GRADES

Unit of Work

The standard unit, a measurement of college work, represents one college hour (50 minutes) of classwork weekly for one semester. In some courses, however, such as those in physical education and the laboratory arts and sciences, a greater number of hours of classwork are required weekly for each unit than in other courses. In general, two or more clock hours of preparation outside class are needed weekly for each unit of classwork.

Semester and Quarter Units

Most universities and colleges in the United States use the semester or quarter system and hence grant credit in semester units (s.u.) or quarter units (q.u.). For example, City College uses the semester system and grants credit in semester units; some California State University campuses and most University of California campuses use the quarter system and grant credit in quarter units.

Two semester units are equivalent to three quarter units. Therefore, to convert semester units to quarter units, multiply the number of semester units by 3/2 (or 1.50); to convert quarter units to semester units, multiply the number of quarter units by 2/3 (or 0.667).

Academic Record Symbols and Standards

A system of letter grades and grade points is used to indicate the quality of work done by students. The meaning of each evaluative symbol, with its value in grade points, is as follows:

Standard English is expected in all College course work and is a consideration in grading. Its use is not an exercise limited to English classes alone.

Credit (CR)/No Credit (NC) Courses

Certain courses offered at City College of San Francisco are designated as credit/no credit courses. Such courses are shown in the catalog with the statement “CR/NC only” meaning that only grades of CR and NC are given for the course. Other courses are designated as optional credit/no credit courses. Such courses are shown in the catalog with the statement “CR/NC avail.” meaning the course may be taken on a credit/no credit or on a letter grade basis; i.e., the credit/no credit option is available. Note: 1) credit/no credit courses are counted toward graduation and for transfer and 2) in an optional credit/no credit course the student must file a petition with the Office of Admissions and Records to take the course on a credit/no credit basis no later than the deadline date established in the Calendar of Instruction. (See Calendar of Instruction for this date.) Petition forms are available from the Office of Admissions and Records. In the absence of a “Petition for Credit/No Credit” students will be evaluated on a letter-grade basis. The “NC” symbol shall be used only in calculating units attempted for probation and dismissal.

Although City College does not limit the number of units a student may take on a Credit/No Credit basis, students planning to transfer should inquire of the transfer institution its policy on credit/no-credit course work. Some institutions may require a letter grade in course work used to satisfy specific requirements for admission and/or major preparation.

Noncredit Grading

Some noncredit classes do issue grades. Letter grades (A, B, C, NC) or CR/NC grades are issued in all noncredit vocational/occupational classes, including VESL, Business, Trade Skills, Automotive, Health (except Tai-Chi), Labor Studies and Consumer Arts and Sciences. (Each department determines whether to give letter or CR/NC grades and all classes/sections use the same grading mode.) All students on financial aid receive grades in all their noncredit classes, even if grades are not usually assigned in those courses. All students enrolled in high school classes in Transitional Studies leading to a high school diploma receive letter final grades comparable to those issued in local secondary schools as agreed to with the county superintendent. Grades are not issued in Older Adult, Consumer Education, General ESL, DSPS, non high school diploma Transitional Studies, and CDEV and Parenting classes that are not vocational/occupational in nature.

Other Symbols

Symbol = Definition
“EX” = Exclusion
“I” = Incomplete
“IIP” = In Progress
“MW” = Military Withdrawal
“RD” = Report Delayed
“W” = Withdrawal

“EX” Exclusion. The “EX” symbol shall be used to denote grades of D, F, or NC the student has chosen to exclude from his or her academic history.
“I” Incomplete. A student may be given a final grade of Incomplete only if illness or other unavoidable circumstances prevent taking the final examination or satisfying the other requirements in a course.

A student must make arrangements for an Incomplete with the instructor for the course. The instructor will file a record of Incomplete with the Office of Admissions & Records and give the student a copy. This record shall note the condition(s) for removal of the Incomplete and the grade to be assigned if the work is not completed.

A grade of Incomplete must be removed within one month of the first day of instruction in a student's next regular semester of attendance, or no later than one year from the last day of instruction in the semester of issuance, whichever date comes first.

A final grade shall be assigned when the work stipulated has been completed and evaluated or when the time limit for completion of the work has passed.

A student should make arrangements for the removal of an Incomplete with the instructor for the course. In the absence of the instructor, the student should contact the department chair.

If a student is, due to extenuating circumstances, unable to complete the work within the time specified the student may, after contacting the instructor, petition the Associate Dean of Student Advocacy, Rights and Responsibilities for an Extension of an Incomplete.

An Incomplete shall not be used in calculating units attempted nor for grade points, but shall be used in calculating units for purposes of evaluating probation and dismissal.

“IP” In Progress. The “IP” symbol shall be used to denote that the class is scheduled to extend beyond the normal end of the semester or summer session. An “IP” symbol indicates that work is in progress and that assignment of a grade will occur upon its completion. The “IP” symbol shall remain on the student’s permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit credit shall be assigned and appear on the student’s record for the term in which the course is completed. The “IP” symbol shall not be used in calculating units attempted, nor for grade points.

Late Withdrawal. Late withdrawals are those requested by students after the last day for an official student- or instructor-initiated withdrawal and up until a period of two years after a final grade has been given. A late withdrawal will be granted only for verifiable extenuating circumstances that prevented the student from academic participation. Extenuating circumstances are defined as: institutional error, health, jury duty, military service, accident, family emergency, incarceration, extended litigation, or work conflicts that occurred only between the last day for a student- or instructor-initiated withdrawal and the final examination. For more information please consult with the Office of the Associate Dean of Student Advocacy, Rights and Responsibilities, Conlan Hall, Room 106.

“MW” Military Withdrawal. “Military Withdrawal” occurs when a student who is a member of an active or reserve United State military service receives orders compelling a withdrawal from courses. Upon verification of such orders, a withdrawal symbol may be assigned at any time after the period established by the governing board during which no notation is made for withdrawals. Military withdrawals shall not be counted in progress probation and dismissal calculations.

“RD” Report Delayed. Only the Office of Admissions and Records may assign the “RD” symbol. This symbol is to be used when, for reasons beyond the control of the student, there is delay in reporting the student’s grade. “RD” is to be replaced by a permanent symbol as soon as possible. The “RD” symbol shall not be used in calculating units attempted, nor for grade points.

“W” Withdrawal. If a student withdraws from a class or if an instructor withdraws a student from a class between the last day to drop and the last day for withdrawal, a “W” symbol will appear on the student’s permanent record. (See Calendar of Instruction for specific dates.) If a student stops attending a class after the last day for a student-initiated or instructor-initiated withdrawal, the instructor must report a grade symbol (consistent with the grading policies) other than “W.”

The “W” symbol shall not be used in calculating units attempted nor for grade points, but shall be used in calculating units for purposes of evaluating probation and dismissal.

If a student drops a class prior to the last day to drop, no notation will appear on the student’s permanent record. (See Calendar of Instruction for specific dates.)

Course Prerequisites, Corequisites, and Advisories (Recommendations)

City College has established prerequisites, corequisites, and advisories to maintain academic standards and ensure student success. The CCSF Governing Board recognizes that if these requisites are established unnecessarily or inappropriately, they constitute unjustifiable obstacles to student access and success. Therefore, the San Francisco Community College District, in compliance with Title V Matriculation Regulations, has adopted a policy to provide for the establishment, review and enforcement of prerequisites, corequisites, advisories on recommended preparation, and certain limitations on enrollment in a manner consistent with law and good practice. Elements of this policy follow:

Definition of Terms

Prerequisite: A condition to enrollment that a student is required to meet in order to demonstrate current readiness for a course or educational program. If a prerequisite is a course, a student must pass the prerequisite course with a grade of “C” or higher.

Corequisite: A course that a student must take concurrently with another course.

Below are the different types of pre/corequisites:

1. Standard prerequisite or corequisite: A pre/corequisite to a course, the equivalent of which is offered at three or more California State University and/or University of California campuses with an equivalent prerequisite.

2. Sequential course within and across disciplines: A course that serves as a pre/corequisite to an articulated course in the same discipline or in another discipline.

3. Course in communication or computation skills: A course in communication or computation skills that serves as a pre/corequisite to a course other than another communication or computation skills course.

4. Placement level: A Mathematics, English, or English as a Second Language course placement level determined by the
College placement assessment process, which consists of the use of State-approved assessment instruments, validated cut-scores, and multiple measures.

5. Program prerequisites: A pre/corequisite to enrollment in a program such as Nursing, Culinary Arts and Hospitality Studies, or Aircraft Maintenance Technology.

6. Health and safety: A pre/corequisite to enrollment in a course or program in which health and safety of the student or others may be endangered if the pre/corequisite is not met.

7. Recency: A pre/corequisite skill-level that a student must possess within a specific time period prior to enrollment in a course or program.

Advisories on Recommended Preparation: A condition of enrollment that a student is advised, but not required, to meet before or concurrently with enrollment in a course or educational program. Students are strongly encouraged to follow the advisories since having the recommended preparation will greatly increase the likelihood of success in the target course.

Limitation on Enrollment: A condition of enrollment that a student must meet (in addition to any prerequisites and corequisites) prior to enrolling in the following types of courses:

1. Performance courses: Courses in this area include intercollegiate athletics, theatre arts (drama), and music, for which an audition or tryout may be required.

2. Honors courses: These courses, which are generally designated for high school students, require a specific scholastic aptitude prior to enrollment.

3. Blocks of courses or sections: a “block” refers to at least two or more courses or sections of courses in which enrollment is limited to a specific group of students. Examples at CCSF include the African American Achievement Program and the Puente Project.

Challenge of a Prerequisite or a Corequisite
A student who does not meet a stated prerequisite or corequisite to a course may be dropped on the first day of school. However, the student may file a petition to Challenge a Prerequisite or Corequisite on one or more of the grounds listed below. The student shall bear the initial burden of showing that grounds exist for the challenge. Challenges shall be resolved in a timely manner, and if the challenge is upheld, the student shall be permitted to enroll in the course or program in question.

Grounds for challenge:
A. The student has the knowledge or ability to succeed in the course or program despite not meeting the prerequisite or corequisite.

B. The student possesses the skills/knowledge necessary to protect the health or safety of himself and others despite not meeting the stated health and safety prerequisite.

C. The prerequisite or corequisite is either unlawfully discriminatory or is being applied in an unlawfully discriminatory manner.

D. The student will be subject to undue delay in attaining the goal of his/her educational plan because the prerequisite or corequisite course has not been made reasonably available.

E. The prerequisite or corequisite has not been established in accordance with the District’s process for establishing prerequisites or corequisites.

F. The prerequisite or corequisite is in violation of Title 5.

Any student may appeal the decision of the challenge to the Office of the Vice Chancellor of Academic Affairs or the Vice Chancellor of Student Development.

Procedures for Filing a Petition to Challenge a Prerequisite/Corequisite
CAUTION: The student shall bear the initial burden of showing that grounds exist for the challenge. A student who wishes to challenge a pre/corequisite should file a petition as early as possible prior to the first day of class.

Instructions:
1. Obtain a Petition to Challenge a Prerequisite or Corequisite from the Office of Matriculation Services (Conlan Hall, Room 204) or the chair of the department of the course.

2. The student should file the completed petition at the appropriate department office (see the petition form) as early as possible before the first day of school, but must file no later than the end of the add/drop period. The department office will give the student a date-stamped copy of the petition and provide him/her with a decision by the end of the add/drop period.

3. If the challenge is upheld, the student will be eligible for the course; the student should retain the approved petition as proof of his/her eligibility. If the challenge is denied, the student will not be eligible for the course and will be required to drop if he/she has already registered for the course.

4. The student must file the approved petition to the Office of Matriculation for final processing. The department will keep a copy of the petition for its own records.

5. A student may appeal a decision to the Vice Chancellor of Student Development or the Vice Chancellor of Academic Affairs.

Challenge of a Limitation on Enrollment
Any limitation on enrollment may be challenged by a student on the grounds listed below. The student shall bear the initial burden of demonstrating that grounds exist for the challenge. The District shall resolve the challenge in a timely manner. If the challenge is upheld, the student shall be allowed to enroll in the course. If no space is available in the course when a challenge is filed, the challenge shall be resolved prior to the beginning of registration for the next term.

Grounds for Challenge of a Limitation on Enrollment: A student may challenge a limitation on enrollment in a course if:

A. The course is required in order for the student to receive a degree or certificate and no other course is offered during the semester of the challenge to meet the requirement, and

B. the student’s graduation from the degree or certificate pro-
gram will be delayed if (s)he is unable to enroll in the course during the semester of the challenge.

Procedure for Challenging a Limitation on Enrollment:
1. Obtain a Petition to Challenge a Limitation on Enrollment from the Office of Matriculation Services (E-204) or the department chair of the course.
2. The student should file the petition with the department chair prior to the first day of class, but must file no later than the end of the add/drop period in order for the petition to be considered.
3. The student must attach a current CCSF Student Educational Plan indicating that the course is required to receive a degree or certificate. The student must prove that his graduation will be delayed by one or more semesters if (s)he is not allowed to enroll in the course. The department chair will retain a copy of the petition and forward a copy to the Office of Matriculation Services.
4. The department chair will provide the student with a decision by the end of the add/drop period and give the student a copy of the petition with the decision indicated. If the challenge is denied, the student will not be eligible for the course and will be dropped if already enrolled in the course.
5. The student may appeal the department chair’s decision to the Dean of Matriculation Services.

Grades and the Grade Point Average
A student’s grade point average (GPA) shows numerically the relationship between the number of units attempted and the grade points received. It may be determined by dividing the number of grade points earned by the number of units attempted. Grades of CR, NC, W, I, IP, EX and MW do not affect a student’s grade point average. A 4.00 quotient indicates an A average; 3.00, a B average; 2.00, a C average; 1.00, a D average; 0.00, an F average.

Students grade point averages are used in various ways. For example, a requirement for graduation from the College is that a student must have completed a minimum of 60 semester units of lower-division college work in which he has maintained an average final grade of C (2.00 grade point average) or higher in all lower-division courses he has attempted for grade points. The College also uses grade point averages in awarding various scholarships and in determining whether students may be disqualified from further attendance because of scholastic deficiencies. In addition, universities and colleges use grade point averages in admitting transfer students.

All credit courses offered by City College of San Francisco are graded courses as defined by Title V, California Administrative Code.

Probation and Dismissal

Probation:
There are two types of probation: academic and progress. A student may be on either type of probation or on both. If a student is on either type of probation or on both,

- there will be a permanent notation placed on the student’s academic history;
- a student will not be in good academic standing at the College;
- the student will not be removed from probation until there is improvement in the overall academic record, even if there is improvement in the current semester academic record.

Students on probation may be contacted by the General Counseling Department or the EOP&S so that they may be provided individual counseling and guidance on how to improve their academic standing. The students’ programs may be regulated so as to help them move off probation.

Academic Probation: A student who has attempted at least 12 units as shown on the official academic record will be placed on academic probation if the student has earned a grade point average below 2.00 in all units in which grades were given.

Progress Probation: A student who has attempted at least 12 units as shown on the official academic record will be placed on progress probation when the percentage of all units in which a student has enrolled and for which the student has been given a “W,” an “INC.,” or a “NCr.” is 50% or more.

Removal from Probation: For removal from academic probation, a student must have an overall cumulative grade point average in all City College units of 2.00 or higher. For removal from progress probation, a student must have been given marks of “W,” “INC.,” or “NCr.” in less than 50% of all City College units in which the student has enrolled.

Dismissal:

Academic Dismissal: A student who has been on probation is subject to academic dismissal if the student has been on either academic probation or on progress probation or on both academic and progress probation for more than four consecutive semesters. If students are academically dismissed, a notation of “Academic Dismissal” will be placed on the permanent academic record. Consecutive semesters means four semesters in a row of the student’s attendance at City College. Summer sessions are not counted as regular semesters when semesters are being counted for academic dismissal.

Appeal of Academic Dismissal and Request for Reinstatement: Students may appeal academic dismissal and petition to be reinstated so they may continue their enrollment. Such petitions will be considered in cases of verified unusual circumstances. Students may request information or a Petition to Appeal Academic Dismissal and Request Reinstatement from the Office of the Associate Dean of Student Advocacy, Rights and Responsibilities (Conlan Hall, Room 106). If students are reinstated, their reinstatement will be conditional based upon a review of the academic record at the end of each semester. Readmitted students will be subject to the continued requirements of the academic probation and academic dismissal regulations.

Financial Aid Probation: The rules for financial aid probation, academic progress, or disqualification may be different. Please see the appropriate section in the Catalog under Financial Aid.

Grade Reporting
Midterm Grades are no longer mailed to students. Midterm and Final Grades are made available to students through STARS (Student Telephone Automated Registration System). The dates and
times that they are made available through STARS is located in the Schedule of Classes for that school term. In addition, final grades are mailed to students at the end of each term.

**Repetition of Credit Courses**

Course repetition is regulated by Sections 55762 and 55763 of Title 5 of the California Code of Regulations. It is student-initiated and is not the same as course repeatability. Courses offered for credit may be repeated only when one (or more) of the following circumstances applies:

- the student has previously received a substandard grade of "D", "F" or "NC";
- the student has not previously earned a substandard grade and the district finds that the student's grade is, at least in part, the result of extenuating circumstances; for example, accident or illness, military service, jury duty and so forth. However, the new grade cannot be counted for calculating GPA;
- the district has determined that a student should repeat a course as a result of a significant lapse of time since the student previously took the course. However, the new grade cannot be counted for calculating GPA. The notation of Post Grade Only on the academic transcript will be used instead;
- the district finds that permission to repeat a course is a valid disability accommodation, as verified by the City College of San Francisco Disabled Student Programs and Services Department. Authorization to repeat under these conditions only apply to special classes which utilizes curriculum and materials specifically designed to address the educational limitations of the students with disabilities;
- the district finds that course repetition is necessary for a student to meet a legally mandated training requirement as a condition of continued paid or volunteer employment.

**Institutional Policies Governing Repetition of Course Work**

Students may repeat course work for which they have earned a substandard grade of "D", "F", or "NC" by registering for the same course in a subsequent school term. If the student earns another substandard grade for the same course the student will be blocked from registering for the course. To be allowed to repeat the course for the second time the student must complete a Petition to Repeat a Course form, have the petition approved by the departmental representative and submit it to the Office of Student Advocacy, Rights and Responsibilities. If the second repeat is approved and the student successfully completes the course with a passing grade the new grade cannot be used in recalculating the GPA. However, the units will be counted in meeting general education, transfer, associate degree, certificate of completion and award of achievement requirements.

*It is recommended that the student seek the advice of his/her counselor and departmental representative prior to repeating a course for standard work.*

The following regulations, policies and procedures apply to the repetition of course work:

1. when a student repeats a course, the previous grade earned is not removed from the student's academic record.
2. when a student repeats a course for the first time as a result of a substandard grade ("D", "F", or "NC"), the grade previously earned will not be used in calculating the student's City College of San Francisco grade point average.
3. course repetition may affect a student's financial aid eligibility or other benefit status.
4. some transfer institutions may calculate all grades in the overall grade point average.
5. once an associate degree has been awarded, courses taken prior to the awarding of the degree cannot be repeated, unless special circumstances exist as determined by City College of San Francisco.

**Course Repetition Petitions** are available in the Office of the Associate Dean of Student Advocacy, Rights and Responsibilities, Conlan Hall, Room 106.

**Course Repeatability** is different from course repetition because it is a characteristic of the course itself, is requested by the department concerned and is subject to review by the Curriculum Committee. Courses with established content have course repetition but no course repeatability. Three other types of courses have course repeatability. The College Catalog course descriptions will note if a course has course repeatability.

Courses with Variable Content are defined as courses in which the essential course content changes substantially from one time of offering to the next. There are two allowable types of variable content courses: Umbrella courses and Independent Studies courses. Umbrella courses consist of an umbrella and a series of letter courses. For example, ENGL 48 is the umbrella for ENGL 48A, 48B, 48C, etc. A student cannot repeat the same version of the course. Independent Studies courses allow a student to conduct special studies or research on a topic in his or her major and to receive units for such studies or research.

Courses that Build on Experience or Physical Skills are allowed repeatability with a maximum number of repeats set at three regardless of how the particular subject is subdivided. (For example, if a subject is divided into beginning, intermediate and advance courses, the intermediate and advance courses are counted as repeats.)

Passing grades (i.e., A, B, C or Cr) are generally given in these courses to indicate progress toward (or degree of attainment of) these goals, and students are allowed to repeat only if they are making satisfactory progress toward attaining the established goals. A student cannot be allowed to repeat the course if the course goals have been attained. If a student does not make satisfactory progress, the student will receive a substandard grade (D, F, or NCr) and will thereby open the possibility of course repetition as defined in a preceding section; however, the total of the repetitions cannot exceed three.

Courses in the Performing and Visual Arts: In order to allow students who are planning to transfer in the Performing and Visual Arts to maintain proficiency until such time as they transfer, City College policy will allow extended repeatability for Performing and Visual Arts courses identified by the departments and approved by the Curriculum Committee. Three conditions must be satisfied:

(a) a Performing and Visual Arts course must be one that develops a professional/vocational skill in the Arts and there must be a reasonable expectation that transfer opportunities exist in that skill.

(b) a Performing and Visual Arts skill may not be subdivided into more than three course levels (beginning, intermediate,
and advanced) and may not have more than one course per level. The extended repeatability will consist of a maximum of one repeat at the beginning level and a maximum of three repeats at each of the intermediate and advanced levels.

(c) the concept of satisfactory progress described above must be built into any Performing and Visual Arts course using the extended repeatability. A department may not allow a student to repeat a course unless there is evidence that satisfactory progress is being achieved by the student. In the event that a student exhausts this extended repeatability prior to transferring, the student may with departmental approval, apply to the Vice Chancellor of Academic Affairs for a waiver of the Performing and Visual Arts repeatability limits.

Students may use the Course Repetition Petition (available in the Office of the Associate Dean of Student Advocacy, Rights and Responsibilities, Conlan Hall, Room 106) to ask to be allowed to repeat a course under Course Repeatability.

Academic Renewal/Exclusion
A student may petition to have college grades of D, F, or NC excluded from grade point average calculations if that work is not reflective of the student’s present level of performance. However, to ensure a true and complete academic record, the permanent academic record will show all of the student’s course work, including excluded classes.

A request for academic renewal will be granted under the following conditions:

1. A student must have completed at an accredited college at least 24 degree applicable semester units with a grade point average of at least 2.0 or 12 semester units with a grade point average of at least 3.0. These units must be earned subsequent to any grade of D, F, or NC to be lined out.
2. Two or more years must have elapsed since the most recent course work to be excluded was recorded.
3. A maximum of 24 units can be lined out, and academic renewal will only be granted once.
4. A student’s official transcript will include a notation of when the request for academic renewal was granted as well as the fact that grades from other institutions may have been used to satisfy the requirements for academic renewal.

The petition for Academic Renewal/Exclusion may be picked up at the Admissions and Records Office, Conlan Hall, Room 107.

Students are reminded of the following:

• Only courses taken at City College may be lined out.
• Some transferring institutions may not accept the lining out of grades and may recalculate the grade point average. Students who plan to transfer to other institutions should inquire of the transfer institution its policy on lined out grades.
• Once an Associate degree has been awarded at City College, courses taken prior to the awarding of the degree cannot be repeated or excluded.

Students who wish to have grades lined out under this policy must request a petition from the Office of Admissions and Records. Since academic renewal will be granted only once, students considering the petition are advised to file the petition at a time close to their graduation of transfer.

Changing Final Grades
An instructor may not change any final grade, except that of Incomplete, on the basis of additional work completed by a student after the close of a semester.

Academic Transcript of Records
A student may obtain an official or unofficial academic transcript of records by completing and submitting a Transcript Request Form to the Transcript Department, Conlan Hall, Room 107. Students may also request a Transcript of Academic Records by FAX to (415) 239-3836 or by letter to:

City College of San Francisco
Transcript Department, Box E-107
50 Phelan Avenue
San Francisco, CA 94112

When requesting an Academic Transcript of Record the following information must be included:

• Student’s full name while attending CCSF
• Current mailing address
• Telephone number
• Present full name if different while attending CCSF
• Birth date
• CCSF Student ID number
• Date last attended at CCSF, i.e. Spring 1998
• First Date of attendance at CCSF, i.e. Fall 1996
• Where the Academic Transcript of Record is to be mailed
• When the Academic Transcript of Record should be sent, i.e., after this semester’s grades are posted, after degree/certificate has been posted
• A listing of all courses currently in progress at CCSF
• Number of copies requested
• Student’s signature
• Date

It is strongly recommended that students wishing to transfer to another college/university complete and submit a request well in advance of the date in which the transcript is needed.

Processing time during peak periods will take from two (2) to four (4) weeks. Academic transcripts are reviewed and processed as they are submitted.

Processing Fee
The first two requested official and/or unofficial Academic Transcript of Records are free of charge. A processing fee of $5.00 is assessed for each additional transcript after the first two.

Rush Service
Students may contact the Transcript Department and request Rush Services for the issuance of Academic Transcript of Records. Normal processing time for this service is twenty-four (24) hours. The fee for this service is $10.00 per requested copy.
Transfer of Grade Points to City College

City College counts the grade point average of transferable units earned at other universities or colleges toward the combined grade point average of 2.0 required for graduation. The combined grade point average takes into account both the cumulative grade point average at City College of San Francisco and the grade point average of transferable units.

Credit by Examination

According to Section 55753 of Title 5 of the California Code of Regulations, community college governing boards are authorized to grant credit by examination, under certain circumstances:

a. City College of San Francisco may grant credit to any student who satisfactorily passes an examination approved or conducted by proper authorities of the college. Such credit may be granted only to a student who is registered at the college and in good standing and only for a course listed in the college catalog.
b. The student’s academic record shall be clearly annotated to reflect that credit was earned by examination.
c. Units for which credit is given shall not be counted in determining the minimum 12 semester hours of credit that must be taken at CCSF to meet the residence requirement. (See Associate Degree Graduation Requirements.)

1. Credit by CCSF Examination

Currently enrolled students who have completed a minimum of 12 units at CCSF, earned a grade point average of 2.00 or better, have not attempted the course, or have not completed more than 12.0 units of Credit By Examination are eligible to be considered for credit by examination. You may obtain a list of courses that may be challenged from the Admissions and Records Office.

Permission to challenge a course by examination is granted by the appropriate department chair.

All students who challenge a course for credit by examination must pay the enrollment fee for the courses challenged.

2. Credit by AP and CLEP Examinations

Currently enrolled students who have completed a minimum of 12 units at CCSF, have earned a grade point average of 2.00 or better, and have not attempted the courses are eligible to be considered for credit by AP and CLEP examination.

1) Advancement Placement Test (AP)

City College will grant subject credit for most College Board Advanced Placement examinations, depending on the exam score obtained by the student. Credit awarded by CCSF applies to the associate degree. Transfer students must consult with senior colleges and universities to determine how AP credit will be awarded by the receiving institution.

2) College Level Examination Program (CLEP)

City College will grant general credit toward graduation for CLEP examinations. CCSF offers elective credit for the following examinations: Mathematics, Humanities, Natural Sciences, and Social Sciences and History. Generally, students must pass the examinations with a score of 500 or above (Paper and Pencil Testing) or a score of 50 or above (Computer Based Testing CBT).

All California State University (CSU) campuses will accept one chemistry and two math exams for college elective credit. Individual CSU campuses may accept additional CLEP exams for credit and/or apply them toward graduation requirements. Students should check with the CSU campus for information on how the campus applies CLEP exam credit.

Credit under both AP and CLEP programs is usually granted only to students with no college work completed. Students who have completed college work prior to taking the examinations, or who wish both advanced placement and CLEP credit, should consult the individual Departments for approval. (Students who plan to transfer to a four-year institution should contact the transfer institution regarding the acceptability of AP and CLEP credit, or should consult a CCSF counselor.)

3. Petition for Credit by Examination

Students may petition for credit by examination for selective courses offered at City College of San Francisco in accordance with the following policies and procedures:

1. Determination of eligibility for credit by examination:

a. The student must be currently enrolled including the course which the student is petitioning for credit by examination.
b. All enrollment and or nonresident tuition fees must be paid in full and all HOLDS must be cleared prior to petitioning for credit by examination.
c. The student must be in good standing, and have successfully completed a minimum of twelve (12) semester units at City College of San Francisco with a minimum cumulative grade point average (GPA) of 2.0.
d. A petition form must be filed to take an examination for course credit only if the student—
   i. meets the requirements for the individual course as specified in the current City College catalog;
   ii. has neither already completed nor is currently taking a course more advanced than that for which credit by examination is requested.
e. A student who has previously enrolled in the course for which credit by examination is requested and subsequently failed the course is not permitted to request credit by examination.
f. A student who failed an examination for credit by examination cannot petition to retake the course for credit by examination.
g. The department offering a course which may be taken for credit by examination will determine the type of examination to be given and the conditions of its administration.

2. Maximum credit allowable:

a. The maximum number of units creditable by examination toward the Associate degree is 45 semester units.
b. Under no circumstances will a student be permitted to receive an Associate degree credit by examination for
more than three quarters of the units completed at City College.

3. Limitations:

a. Credits awarded by examination are not applicable in meeting unit load requirements for veterans or social security benefits, scholastic honors or graduation residency requirements.

b. Only one course in a direct series of courses may be awarded credit by examination, e.g., Mathematics 92, Mathematics 95, or Mathematics 110A or Mathematics 110B, not more than one of these courses. A student with the appropriate knowledge may take the examination in Mathematics 110B and receive four semester units for this course; however, the student cannot take examinations in all four courses above and be awarded 16 semester units of credit by examination. (The Allied Health and Nursing Programs are exempted from this policy.)

Credit by Petition for Noncredit Courses

Students who have attended noncredit classes at City College of San Francisco and who wish to matriculate in a credit program at City College of San Francisco to continue their education for an Associate in Arts or Associate in Science degree may petition the appropriate department at City College for credit upon achieving a certificate in a specific noncredit certificate program. Units may be applied toward the Associate degree after students have completed one City College credit course with a value of at least two semester units. Students may obtain a Credit by Petition form from the campus where they obtained the certificate. See the list below for eligible programs:

Dean’s Honor List

In the fall and spring semesters, the College recognizes students who have attained high scholastic achievement. Students registered for and completed a minimum of twelve (12) semester units for the semester (only those courses where A-F grades were assigned are counted) with a grade point average of 3.30 or higher and are in good academic standing are placed on the Dean’s Honor List. Good academic standing is defined as having a cumulative grade point average of 2.00 or higher and not being on academic and/or progress probation.

Graduation with Honors

Students who have maintained a grade point average between 3.30 and 3.49, inclusive, will be graduated with honors. Those who have maintained a grade point average between 3.50 and 3.74, inclusive, will be graduated with high honors. Those who have maintained a grade point average between 3.75 or higher will be graduated with highest honors. In determining whether students will qualify for honors at graduation, the Office of Admissions and Records does not count units, grades, or grade points earned in physical education.

Students with transferable units from another accredited college or university will have the grade point units earned count toward graduation with honors. Such students, however, will not be granted higher honors than those earned at City College of San Francisco. Students should arrange to have transcripts from other colleges or universities sent to the Office of Admissions and Records in order to have transferable units counted toward graduation with honors.

Withholding of Services to Students in Default on Loans or Owing Refunds

If a student or former student is in default on a Title IV loan (Federal Family Education Loan, formerly Guaranteed Student Loan) or on a Federal Perkins Loan (formerly National Direct/Defense Student Loan) or owes a refund on a grant (Pell, FSEOG), the District shall withhold the following services: provision of grades, provision of transcripts, and provision of diplomas.

The term “default” is defined by the U.S. Department of Education as the failure of a borrower to make an installment payment when due or to meet other terms of the promissory note.

The services withheld may be provided in certain circumstances which will be addressed on an individual basis by the administration.

Student’s Responsibility for Satisfying Academic Requirements

Although counselors and advisers assist students in planning their programs, each student must assume complete responsibility for compliance with the instructions and regulations set forth in this catalog and for selecting the courses that will enable him/her to achieve his/her educational objective, whether it be graduation from the College, satisfaction of requirements for transfer to another college or a university, or preparation for an occupation.

Prerequisite Courses. A student may not enroll in a course that is a prerequisite to a course he/she has already completed. Each student is responsible for satisfying prerequisites for the courses included
on the study list. For information concerning prerequisites, students should refer to the course information in this catalog in the section entitled “Announcement of Programs and Courses.”

A student may not receive credit for any course which is prerequisite to any course already taken.

Field Trips. Field trips are required in a number of the courses offered by the College. Instructors in these courses provide information pertaining to such trips.

Final Examinations. Final examinations are required of all students in all courses except physical education activity courses. Final examinations must be given on the dates and at the times shown on the official schedule and in the classrooms or laboratories in which the classes normally meet. This schedule is published in the Class Schedule. Students are required to take final examinations with the section in which they are enrolled. There are two exceptions to this policy: 1) A department, with the Vice Chancellor of Academic Affairs’s approval, can schedule a common date, time, and place for all sections of a course to take a common examination; 2) The Vice Chancellor of Academic Affairs can approve an alternate examination schedule for a course in cases of emergency or necessity.

English Placement Information

The results of the City College English Placement Test are used to determine the English courses in which a student may enroll. The student may enroll in the required course or sequence during any semester or summer session.

Students requesting exemption or change in placement on the basis of their SAT test scores or AP test scores should see the English Eligibility Coordinator or the English Department Chair.

Courses below English 1A taken at other institutions are not accepted as prerequisites for English courses. Transfer students who have not successfully completed English 1A at another institution must take the English Placement Test for placement into English courses.

The Chair of the English Department will rule on all matters of equivalency in connection with English courses students have taken at City College or elsewhere.

English Eligibility Essay Exam

The English Eligibility Essay Exam is given each semester by the English Department. Students who pass this essay exam earn eligibility for English 94, 96, or 1A. For more information about this exam, students should contact the English Eligibility Coordinator, Batmale Hall, Room 514.

English as a Second Language

The degree and kind of English-language proficiency achieved by students for whom English is not the primary language will be determined by additional, specially designed diagnostic examinations. Placement will be most commonly in one or more courses in English as a Second Language (ESL). Appropriate courses taken in summer session are acceptable. Students for whom English is clearly the main or only language will not be permitted to enroll in ESL courses. Students who take the ESL placement test but are judged to be sufficiently competent in English are referred to the English Department.
Faculty and Administration

Coit Tower
FACULTY AND ADMINISTRATION OF CITY COLLEGE

The faculty and administration at City College of San Francisco consists of more than 1,500 men and women chosen for their training and competence. Because City College is a community college, offering instruction to meet the educational needs of both its students and the community, its teaching staff is necessarily diverse. It includes, for example, philosophers and nurses, historians and executive chefs, artists and criminologists, linguists and chemists, engineers and ornamental horticulturists, geologists and broadcasters, mechanics and biological scientists, welders and computer programmers, political scientists and printers, dentists and accountants, carpenters and physicists, tailors and journalists, specialists in literature and radiologic technicians.

Diverse Backgrounds

They bring to their students extensive backgrounds gained through years of study and research in the United States and in foreign countries; and through extensive experience in business, industry, education, travel, the Armed Forces, and government service. Many are prominent in the life of the community. Others are officers and policy makers in professional organizations. A number are authors of nationally and internationally used texts in their fields. And a surprisingly large number have done pioneer work in developing special courses and curricula.

Interest in Students

This diversity in the backgrounds and professional interests of faculty members has made a considerable contribution to the College and the community. The outstanding characteristic of the faculty, however, is neither its diversity nor its acknowledged competence, but rather a common interest in students—through teaching and its closely related activity, guidance. For these are the principal functions of the College, as they have been from its founding more than six decades ago.

The College offers many advantages, but it can offer none more important than the interest of instructors and counselors in those whom they teach and advise. Without it, the most impressive and lavishly endowed college is educationally valueless. It is the quality from which students at the College benefit most.

It is the quality most emphasized throughout the College; for instructors spend the major portion of their time working directly with students—in classrooms, in laboratories and offices, on the campus, and in the field—so that the men and women entrusted to their care may acquire knowledge, skills, and understanding that will enable them, in the years ahead, to lead lives that are both useful and rich.

APPENDIX

CCSF Computer Usage Policy

This policy is displayed to users via Message of the Day (MOTD) in the first two weeks of each semester at their logon to the CCSF HPUX computer system, and each user must agree to it in order to continue to use the CCSF computing facilities.

Violation of these policies will be dealt with in the same manner as violations of other College policies and may result in disciplinary review. In such a review the full range of disciplinary sanctions is available including the loss of computer use privileges, dismissal from the College, and legal action. Violations of some of the policies below may constitute a criminal offense.

Rights and Responsibilities

CCSF is pleased to make computer accounts and resources available for student use in the pursuit of their instructional goals, and to faculty and staff to support the institution’s instructional goals. In so far as the computing resources are under the user’s control, the user is fully responsible for their proper and legal use.

The Computer Usage Policy applies to all members of the College community using our computer resources. This includes administrators, faculty, staff and students. This includes use of computer equipment at any CCSF facility including in the various computer labs, classrooms, offices, libraries and the use of the CCSF servers from any location.

Computer accounts and computer access are privileges, and require the individual user to act responsibly. By using the CCSF accounts, users have agreed to respect the rights of other users and accounts, to use the account only for school-related purposes, and to safeguard the integrity of the system and its related physical resources. Users have further agreed to observe all relevant laws, regulations, policies, and contractual obligations of the College.

Other organizations operating computing and network facilities that are reachable via the City College network may have their own policies governing the use of those resources. When accessing remote resources from City College facilities, users are responsible for obeying both the policies set forth in this document and the policies of the other organizations. It is the user’s responsibility to be informed of the policies of other outside organizations to which they establish a computer link.

Confidentiality

All user files, including e-mail files, are not to be relied upon as confidential. CCSF explicitly does not guarantee or warrant the confidentiality of these files. It is the practice of Information Technology Services (ITS) to respect the confidential nature of user files, but the ITS Department reserves the right to view or alter user files when it is necessary. Any ITS employee must have their manager’s permission prior to investigating a user file.

User files may also be subject to search under court order if such files are suspected of containing information that could be used as evidence in a court of law. Student files as kept on ITS facilities are considered educational records as covered by the Family Education Rights and Privacy Act of 1974 (Title 20, Section 1232(g) of the United States Code, also referred to as the Buckley Amendment).

In addition, a system administrator may access user files as required to protect the integrity of the computer system. For example, system administrators may access or examine files or accounts that are suspected of unauthorized use or misuse, or that have been corrupted or damaged.

Existing Legal Context

All existing federal and state laws and College regulations apply, including not only those laws and regulations that are specific to computers and networks, but also those that may apply generally to personal conduct.

Misuse of computing, networking or information resources may result in the loss of computing and/or network privileges without notice. This includes both those that ITS administers, and those that may exist in other departments associated with City College of San Francisco and connected to its network. Deliberate violations of these policies will be dealt with in the same manner as violations of other college policies and may result in disciplinary sanctions including, but not limited to, loss of computer use privileges, dismissal from the college, and/or appropriate legal action.

Additionally, misuse can be prosecuted under applicable statutes. Users may be held accountable for their conduct under any applicable College or campus policies, procedures, or collective bargaining agreements. Complaints alleging misuse of the College’s computing resources will be directed to those responsible for taking appropriate disciplinary action as specified under Enforcement below. Illegal reproduction of software protected by U.S. Copyright Law is subject to civil damages and criminal penalties including fines and imprisonment (See CCSF Policy Manual 8.10).

Copyright

All users must follow all relevant copyright laws. U.S. Copyright law governs reproduction and distribution of software and other material, including text, fonts, graphics, sound, video and others. The End User License Agreement (EULA) for a product specifies the conditions under which a user may copy or install the product. The EULA purchased by a department also controls the number of simultaneous users of the...
product. Please review the EULA for complete information on your rights as an end user of these products.

Nondiscrimination

Computer users need to follow the same non-discrimination policy including those governing “sexual harassment” and “hostile educational environment.”

All computer users must follow the non-discrimination guidelines as stated in the CCSF “Equal Opportunity Statement” listed in the catalog: [http://www.ccsf.edu/Catalog/Admin/nondiscrim.html](http://www.ccsf.edu/Catalog/Admin/nondiscrim.html)

Any user who files a complaint or otherwise protests against discrimination has the right to be free from any retaliatory action because of the complaint or protest. The CCSF administrator who receives a complaint of discrimination should inform the complainant of this right and that the complainant may file an additional complaint if he or she experiences retaliatory conduct.

Examples of misuse include, but are not limited to, the following activities:

**Breaking into another person’s account**

1. Using a computer account that you are not authorized to use by the ITS Department.
2. Obtaining a password for a computer account that is not your own account.
3. Using the Campus Network to gain unauthorized access to any computer systems.
4. Attempting to circumvent data protection schemes or uncover security loopholes. This includes creating, running, and/or distributing programs that are designed to identify security loopholes and/or decrypt intentionally secure data.
5. Masking the identity of an account or machine. This includes, but is not limited to, sending e-mail anonymously.

**Harassment**

6. Using e-mail to harass others.
7. Posting on Internet services information that may be slanderous or defamatory in nature. This includes, but is not limited to, posting of said type material on Usenet News.
8. Displaying sexually explicit, graphically disturbing, or sexually harassing images or text in a public computer facility, or location that can potentially be in view of other individuals.

**Commercial Use**

9. Using your account for any activity that is commercial in nature. Commercial activities include, but are not limited to, consulting, typing services, and developing software for sale.

**Copyright**

10. Violating terms of applicable software licensing agreements or copyright laws.

**Changing Files**

11. Attempting to monitor or tamper with another user’s electronic communications, or reading, copying, changing, or deleting another user’s files or software without the explicit agreement of the owner. Files owned by individual users are to be considered private property, whether or not they are accessible by other users.
12. Modifying another user’s files, which is illegal under California Computer Crime Laws.

**System Misuse**

13. Sending mass e-mail to a large number of people on the system. It is acceptable, however, to use organization or department mailing lists, listservs, to send e-mail to groups of people on the system.
14. Knowingly or carelessly performing an act that will interfere with the normal operation of computer systems, including running, installing, or giving to another user a program intended to damage or to place excessive load on a computer system or network. This includes programs known as computer viruses and worms.
15. Deliberately wasting/overloading system resources, such as:
   - Printing resources – This includes, but is not limited to, printing multiple copies of a document or printing out large documents that may be available online, or that might impact significantly on other users printing resources.
   - System file space – Storing or transferring of large files or using a large amount of file space in the temporary file system area which degrades overall system performance or preclude other users right of access to disk storage also constitute misuse of resources. The ITS staff may remove or compress disk files that are consuming large amounts of disk space, with or without prior notification.

**Additional System Information**

- Batch jobs or background tasks should be consistent with individual academic goals or institutional academic goals. Jobs that do not appear to coincide with the academic goals of the institution may be “killed” without warning.
- Any files stored in the temporary file systems are not backed up and are subject to deletion at any time. Users’ file names and directory names starting with a period or another punctuation or special character will be deleted immediately.

**Enforcement**

After the appropriate investigation and/or hearing procedures have been followed, the penalties below may be imposed under one or more of the following: City College regulations, California law, the laws of the United States.

- Infractions of the CCSF Computer Policy may result in the temporary or permanent loss or modification of computer account and resource access privileges, and may be
subject to further disciplinary action.

- Offenses which may be in violation of local, state or federal laws will result in the immediate loss of all computer account and resource privileges, and will be reported to the appropriate College or institution involved and law enforcement authorities.

An individual’s computer use privileges may be suspended immediately upon the discovery of a possible violation of these policies.

Such suspected violations will be *confidentially reported* to the appropriate supervisors or instructor and/or department chair.

**This policy is subject to revision.** The Information Technology Policy Committee will approve changes to the guidelines, as needed.
