Finding Sources Using OneSearch

To use OneSearch, go to www.ccsf.edu/library
To access resources off-campus, use your RAM ID and password.

Starting a search with OneSearch

Search print and online books and videos, articles, and more, all at once with the OneSearch tab, or choose a more limited tab.

Reading the Results Screen

Example of a RESULTS LIST from OneSearch, part 1

The top of the results list will show the number of results for your search, followed by reference articles that give you background and overview information, and then any related research guides that have been created by CCSF librarians.

Search Results: 1 - 10 of 5,725,549

OneSearch RESULTS LIST, part 2

The rest of your search results, books, videos and articles, will be listed after the research guides.

Click the blue titles in the results list for the FULL ITEM DISPLAY (as seen below)

The full item display shows the source information, how to access the physical item or online, and related subjects. For articles, it may also show the full article at the bottom of the screen.

Cite your sources!

A citation is the information you need to identify and find a work. It usually includes, as applicable, author(s), segment title, title of the entire work, date, page number, and sometimes volume and issue numbers. For online resources, it will also include the website or database URL.
