Math placement can be determined by U.S. high school transcript. Use the Guided Placement tool if:

- You didn’t complete grades 9 through 11 in a U.S. high school
- You don’t know your high school GPA because you’ve been out of school for several years.

Speak with your counselor about choosing the Math sequence that’s best for you and your academic goals. For general academic counseling questions, send an email to: academiccounseling@ccsf.edu

Liberal Arts Math Pathway

This pathway is appropriate for students in many non-technical majors, such as the arts, English, languages, etc.

Statistics Pathway

This pathway is appropriate for students in majors that require a Statistics course.

STEM Pathway

This pathway is appropriate for students in majors that require CALCULUS or Math 75.

Interested in retaking high school basic math and algebra? You could take Math 30 (Prealgebra with Basic Math) and Math 40 (Elementary Algebra).
