Peer-Mentoring and Service-Learning
The Office of Mentoring and Service-Learning offers two types of programs to increase student success and transfer, and enrich the college experience with hands-on application of classroom learning. In the Peer-Mentoring program, a student is matched with a peer mentor. The peer-mentor is a student who has experience in a particular course or program, and who provides information, advice, support and encouragement. The peer-mentor is selected by a Project Sponsor for the course or program. Mentors are currently available to students taking specific courses in science, social science, liberal arts, and vocational programs. In the Service-Learning program, students enrolled in courses offering service-learning are placed in the community, where they apply both academic and practical skills for the benefit of society. Service-Learning integrates community service, and civic engagement with academic instruction and campus-community outreach so that each strengthens the other, and provides time for reflection and critical thinking while making significant contributions to individuals, organizations, and neighborhoods. For example, students taking biology courses may contribute to habitat restoration. In Project SHINE (Students Helping in the Naturalization of Elders), students in political science, psychology, sociology, foreign languages, and health prepare elders to take the citizenship exam. Students involved in service-learning or volunteer opportunities may enroll (when available) in IDST 12 - Reflection on Service-Learning to share their experiences with other students (see course description). For more information about mentoring or service-learning opportunities, call (415) 239-3771.

For any further questions regarding out-of-state fee waiver, please contact the Veterans Services at 415-239-3486.

Note: VA benefits do NOT pay out of state fees.

Out-of-State Students: At this time, out-of-state students who do not physically live in California are not permitted to take fully online or online courses with required on-site meetings at City College of San Francisco. Federal regulations require institutions offering distance education to acquire authorization from any U.S. state in which it “operates.” City College does not have the required permission for students from other states to take courses at City College. This permission is required to maintain eligibility for students of that state to receive federal financial aid. At this time, City College is not filing for authorization to operate in other states. We recommend that out of state students seeking community college courses look for classes offered from an institution in their state of residence.

`MW` Military Withdrawal: For more information, please refer to the Academic Policies and Procedures section of the Catalog.
