Overview

- Degree Works is a web-based education plan and degree audit system to guide student success and timely completion. This tool helps students and counseling faculty create a map and monitor student's progress toward program completion.
- Degree Works provides a more accessible, convenient, and organized way for students to know where they are academically and how they can plan the rest of their college careers.
- Degree Works is not a substitution for consultation with a counselor. Students will still need to see a counselor for educational planning and career exploration.
