# Student Demographics

It is best to examine demographics of CCSF students by looking at credit and noncredit students separately, as their profiles are rather different. Most credit students are in their 20s, in contrast to noncredit students, whose ages are more evenly distributed. Students aged 40 and above attend noncredit courses in large numbers. Females outnumber males in credit, with about 53 percent of total headcount, and even more so in noncredit, where females constitute over 60 percent of students. Proportionately fewer whites and African-Americans enroll in noncredit, with proportionately more Asians and Latinos enrolling in noncredit, likely related to the large noncredit English as a Second Language (ESL) program and its service to immigrant communities.

Credit Headcount
2016-2017 AY - N = 34,807

	Asian	Latino	White	African American	Filipino	Two or more Races	Pacific Islander	American Indian /Alaskan Native	Unknown
percent	30.1%	24.9%	23.5%	7.7%	5.8%	5.4%	0.7%	0.3%	1.6%
count	10,462	8,680	8,172	2,691	2,018	1,896	237	88	563

NonCredit Headcount*
2016-2017 AY - N = 18,455
